POISON IN THE ASHES

What the Mt. Lebanon Shakers Found-Incident in the History of a Quiet Community.

The Mount Lebanon (New York) Shakers are a quiet community, secluded from the fret and worry of the outside world. They are widely known, however, for their strict honor and probity in business.

The Shakers believe that nature has a remedy for every disease. A few have been foundthe rest are as yet unknown. Many were discovered by accident. Others came to light as the result of patient experiment and research.

Nervous Dyspepsia is a comparatively new disease, growing out of the conditions of modern life. It is a joint affection of the digestive organs and of the nervous system. These two were formerly treated as separate ailments, and it was left for the clear-sighted Shakers to prove that the basis of this terrible and often fatal complication lies chiefly in the disordered and depraved functions of digestion and nutrition. They reasoned thus:-"If we can induce the stomach to do its work, and stimulate the excretive organs to drive out of the body the poisonous waste matters which remain after the lifegiving elements of the food have been absorbed, we shall have conquered Nervous Dyspepsia and Nervous Exhaust-And they were right, Knowing the infallible power

of Shaker Extract (Seigel's Syrup) in less complicated though similar diseases, they resolved to test it fully in this. To leave no ground for doubt they prescribed the remedy in hundreds of cases which had been pronounced incurable-with perfect success in every instance where their directions as to living and diet were scrupulously followed. Nervous Dyspepsia and Exhaustion is a peculiarly American disease. To a greater or less extent half the people of this country suffer from itboth sexes and all ages. In no country in the world are there so many insane asylums filled to overflowing, all resulting from this alarming disease. Its leading symptoms are these: Frequent or continual headache; a dull pain at the base of the brain; bad breath; nauseous eructations; the rising of sour and pungent fluids to the throat; a sense of oppression and faintness at the pit of the stomach; flatulence; wakcfulness and loss of sleep; dis- Barns, gust with food even when weak from the need of it; sticky or slimy matter on the teeth or Braises. in the mouth, especially on rising in the morning; furred and coated tongue; dull eyes; cold hands and feet; constipation; dry or rough skin; inability to fix the mind on any labor calling for continuous attention;

and oppressive and sad forebodings and feats. All this terrible Shaker Extract Syrup) removes by its positive, powerful, direct vet painless and gentle action upon the functions of digestion and assimilation. Those elements of the food that build up and strengthen the system are sent upon their mission, while all waste matters (the ashes of life's fire) which unremoved, poison and kill, are expelled from the body through the bowels, kidnevs and skin. The weak and prostrated nerves are quieted, toned and fed by the purified blood. As the result, health, with its enjoyments, blessings ferer who had, perhaps, abandoned all hope of ever seeing another well day.

Hall, deceased, by order of the County Court of Line county, Oregon, duly made and entered of record, and all persons having claims against said estate are hereby required to present the same to the undersigned at Scio, Oregon, duly verified within six months from the date

Administrator's No ice.

JEFF. MEYERS,

March 31st, 1887. .

Notice is hereby given that the undersigned has been by the County Court of Linn county, Oregon, appointed Administrator of the estate of J. W. Slavens, deceased. All rsons having claims against said estate are months from date, properly verified to the undersigned at his residence in Santiam Preoinot, Linn county, Oregon, or to Weather- of inner Society History, from "ye olden time" to the sport & Blackburn, at Albany, Oregon.

The Chief of the Bureau of Statistics at Washington, Mr. Switzler, devotes wenty pages of his last quarterly report on trade and commerce, just out, to a review of the consumption of wines and liquors in the United States since 1840. Apart from the novelty of incorporating such a subject in the report, Mr. Switzler treats it in such a manner as to render it exceedingly interesting. He has teken a great deal of trouble to btain correct statistics and information on the subject. The consumption ! of distitled liquors or spirits, he points out, has increased from 43,000,000 gallons in 1840 to 72,000,000 gallons in 1886; and that of wines from 4,800,-000 galions to 22,000,000 gallons for the same years, while the consumption of beer or malt liquors went up from 23,000,000 gallons in 1840 to 642,000,. 000 gallons last year.

The consumption of spirituous liquore, however, has greatly decreased. when calculated according to population. In 1840 the quantity consumed per capita was 21 gallons; that consumed in 1886, 11 gallons. The consumption of wines, on the other hand, increased from twenty-nine hundredths of a gallon in 1840 to thirty-eight hundredths of a gallon in 1886. This was not a very large increase in the con- In the Circuit Court of the State of Oregon for sumption of this commodity, but the incresse in the consumption of malt liquors per capita is startling. In 1840 the quantity consumed was less than dants half a gallon per capita, but last Year it reached eleven gallons per capita. The average annual expenditure for all kinds of liquors is estimated at \$700,one's annual drink bill \$45.90.

Tables are given covering the years as a luxurious beverage is found to be annual expenditure of \$700 000 000 for whisky and some \$350,000,000 for to bacco, there ought to be no complaint of bard times in the country.
