TEMPERANCE COLUMN

SARTTLE, June 8 .- The queen city of the and presents an appalling sight this evening. The awful disaster swept down upon it so sudout of existence, nothing remaining to-night but blackened walls where two days ago were just ten days on the road. ousy scenes of business activity.

Edited by Albany W. C. T. U Rev W W Logan, of Portland, Or, stated in the United Presbyterian General Asembly, held in Springfield, Ohio, May 22, that a recent canvass of San Francisco revealed the startling fact, that 3,000 young men were found in churches and 20,000 Methodist Protestant.

The report of the Iowa State Tempernce Alliance shows that eighty-three counties reported the prohibitory law a success and benefit ; seventy-three reported decrease in crime varying from twenty to sixty per cent, a decrease of twenty five percent in the number of convicts in States

orison, and that over one-half of the jails

have been empty the past year.

Mrs Mary H Hunt says in regard to text books teaching Scientific Temperance : Before the opening of the next school year we shall have at least three, and we expect five, different indorsed series of the entire business portion of the city, causing a leave the train at Coburg. They run out of water before reaching Caburg, and the temperance physiologies, each published by as many different school book publishing houses, and all bearing indorsement because they were originally written to or have been revised to teach the proven and unqualified truths against alcohol with re- single large business house in the whole busilative facts of physiology and hygiene in less part of the city. language adapted to each grade of our The magnificent O public schools. The long months of close and often weary study, the denial of everything else for work on these books-work that must continue when others are away by the sea or at the mountains for summe rest, shall have no other n ention. Twelve million school children in our Republic are an audience worth any effort. The law requiring this study is enacted in twenty-five our States and for all our Territories and an ample number and variety of satis factory books are now ready with more to come, From this high vantage ground we must remind our W C T U readers that no law will enforce itself. The best statute needs the watchful and pushing care those interested in securing the results it is designed to accomplish. This care should be ours. Therefore every local union in the country without a local superintenden of scientific temperance instructions urg ed to appoint one at its very next meeting and report her address to County, State and National Superintendents for plans and helps. If the children in all the public schools under these laws were learning on every school day of the year nature's reasons for total abstinence as the mands, an intelligent sentiment in favor of personal prohibition would thus be forming that would be felt in every community all these States, and that would eventuate in the banishment of alcohol.
