

SUPPLEMENT TO "THE STATES RIGHTS DEMOCRAT."

---

# ANNOUNCEMENT!

---

Realizing the very great pain of having teeth extracted and knowing the great benefits of breathing either Gas (Nitrous Oxide) or Vitalized Air, and their safety and certainty having been established by long years of usage, I have sent for and am now prepared to give either Gas or Vitalized Air for the painless extraction of teeth.

I have also a good local anesthetic to use in case one does not want a general anesthetic.

Having been practicing Dentistry for the past nine years, six years of which have been in Albany, I feel it is my duty to the public and especially to my patients to make this announcement and in this way that it may reach all.

Teeth filled, Artificial Teeth inserted both with and without Plates, Artificial Crowns, (Bonwill) (Logan) and others, attached to roots which are thereby made useful for many years.

Very respectfully,

**O. C. AWBREY.**

Office in Odd Fellow's Temple, Albany, Oregon.
