"German

The majority of well-read physicians now believe that Consumption is a germ disease. In other words, instead of being in the constitution itself it is caused by innumerable small creatures living in the lungs having no business there and eating them away as caterpillars do

the leaves of trees. The phlegm that is coughed up is those parts of the lungs which have been

gnawed off and destroyed. These little bacilli, as the germs are called. are too small to be seen with the naked eye, but they are very much alive just the same, and enter the body in our food, in the air we breathe, and through the pores of the skin. Thence they get into the blood and finally arrive at the lungs where they fasten and increase with frightful rapidity. Then German Syrup comes in, loosens them, kills them, expells them, heals the places they leave, and so nourish and soothe that, in a short time consumptives become germ-proof and well. @
