WEEKLY CORVALLIS GAZETTE. The 103rd anniversary of our Na OFFICIAL PAPER OF THE STATE **OFFICIAL PAPER FOR BENTON COUNTY** Corvallis, July 11, 1879. W. B. CARTER. - -

"INDUSTRIAL CO-OPERATION."

For years we have been strongly impressed that the above is one of the greatest needs of the people of Oregon. But how can it be successfully accomplished, is the great problem. Speak of this matter, when, and where, you will, and you are told the Grangers tried it and made a signal failure.

While this is too true, we claim that the Grangers did not pursue the right plan. If, instead of sending Band. hundreds of thousands dollars annually out of the country for farm machinery, they had established one or more manufactories in this State, and kept this money at home, we would not hear the ery of "hard times" No State in the Union possesses better facilities for manufacturing than Oregon. Our timber is excellent, our coal fields abundant, and our iron ore is the finest in the world, while our water-powers are unsurpassed. There is, no good reason why farming implements, wagons, buggies, carriages, etc. could not be and equally as good, as those shipped from Eastern factories.

In addition to keeping the money at home, which would be a benefit to the farmer, he would be directly benefitted by a home market that would require all his surplus proas it is a well known fact that a home Erb, in their uniform of gray with market is the best for the producer. glittering bayonets, formed a grand serves attention : English people are generally very careful in gathering statistics, and their statements of such are always to be relied on. The the Albany and Second Brigade Yankee has not time to gather up such things from the thousands of sources to which he has to look for them in order to get things exact. He makes a rough "guess" get things exact. He makes a rough "guess" usually, near enough for practical purposes and goes ahead. The English, however, leave no source of knowledge unexplored, and collect all the facts and figures obtaina-ble with the greatest care. Knowing this, people will not be surprised at the condi-tion of the industrial co-operative societies of Great Britain as shown by reports gath-ered from the English papers. There are now almost fifteen hundred industrial co-op-erative societies in England and Scotland, eleven hundred and seventy of which made full reports, from which it appears that full reports, from which it appears that they have about a half a million members, own nearly twenty-five millions paid up share capital, and employ besides nearly five millions more of borrowed money, most of which comes from the members. They keep a stock of goods on hand worth ten million dollars, and their annual purchases foot up over eighty millions, on which the net profit is over seven millions, which is more than ten per cent. on the annual sales. This great system has all grown up from the beginning made in 1844, at Rochmodest beginning made in 1844, at Roch-dale, when twenty-eight workingmen open-ed a retail store to furnish such things as they wanted to purchase. The original so-ciety has always maintained its pre-emi-nence, and has now nearly nine thousand members, who divide a quarter of a million in the shape of profits among themselves every year. It would be hard to exaggerate the advantages conferred by this voluntary association of workingmen, who, instead of grumbling because their lot was not better, took hold and bettered it themselves.

wonder is how our boys contrived to ional Independence was duly cele get up so much fun, in this line, withbrated in Corvallis, last Friday. The out the illustrious Jack Allphin to day was ushered in, at sunrise, by aid them. It was a grand success, national salute, accompanied by ring notwithstanding a large number of ing of bells, etc. The sky was dark the principal actors failed to put in and lowering, threatening rain, and an appearance. Among the most quite cool, which, no doubt, kept comical and mirth-provoking characmany at home. But, notwithstand
