

EDITED BY
YANTIS & WOODCOCK,
ATTORNEYS AT LAW.
OFFICIAL PAPER FOR BENTON COUNTY

IT IS FINISHED.
The republicans of the New York legislature have at last fully realized their sense of duty, and have unanimously put their foot on Conkling's tail.

When Mr. Conkling was solicited by democrats in the United States senate to assist him in opposing the administration, and otherwise badly behaving, we predicted his political downfall at some time in the near future, and as the good-old book repeatedly says: "It has come to pass."

Mr. Conkling's spoils system is generally considered by the American people as a very injurious and contemptible one, for its unform tendency is calculated to spoil the whole country, and eventually liken us to the Roman Empire which descended from her once model government of the world to anarchy, ruin, and dissolution, which was the result of the spoils system; not exactly the same in form as Mr. Conkling, now seeks to enforce, yet the principle is precisely alike and prosecuted with similar motives.

The republican party has accomplished much good to the country during the last twenty years. Yet her attention for the first half of that time was so deeply engrossed with matters which seemed to immediately threaten the life of the country that she has more through oversight than any thing else failed to eliminate from her ranks the practice of some of those injurious systems established by her democratic predecessors; among which is the spoils system.

The republican party is decidedly a party of reform, not merely in word but in deed, for as soon as an evil injurious to the country is disposed of another is immediately taken up and worked out of existence.

The spoils system is evidently in very bad odor with republicans and will no doubt never again be revived by that party. While we do not attribute to Mr. Conkling, any intention to endanger life by so persistently adhering to the system so long ago established by the opposing party, yet it is by no means certain that the president will recover from the wound which is a direct out-growth of Mr. Conkling's blunder.

The Daily New York Tribune, enumerates some of the results of Gorham's shot, and among them the following: Gorham has been more coarse, brutal and unscrupulous than any other adherent of Conkling in assailing the President. Whether the President lives or dies, the election of Gorham as Secretary of the Senate has become impossible. Not only the condemnation of Gorham is needed, but also the reconsideration of the case of Virginia, as presented by the nomination of Riddleberger in the State Convention which Mahone easily swayed. Riddleberger made the only zealous opposition to the nomination finally made, and it was then proved that he did not fairly represent the wishes of the friends of General Mahone. There are other Independents in Virginia and in other Southern States whose nomination and support by the Republicans of the Senate would mean success. The recovery or death of the President may make a great difference in the condition of parties. At the South a very strong and sincere sympathy has been shown for him. In Georgia and some other States men of influence have avowed their intention to support his Administration. A broad national policy would be welcomed by many Southern men, who are already disposed to kindly feeling, and it is not impossible that Southern aid might be found in the form of suppression of all violators of laws designed to secure purity of elections.

There are in Shasta California, 720 miles of mining ditches which supply an average daily run of 11,000 inches of water; also, 200 miles of irrigating ditches and 1,400 acres irrigated.

Jack Powers is reported as making encouraging progress toward recovery. He is able to leave his bed for short periods, and the symptoms of his wound are favorable. Louis Arax, the young Italian who was wounded in the same affair, is also slowly recovering.

THE OFFENDING COW.

The city of Corvallis on the 16th of May last passed an ordinance which is commonly called the cow ordinance, although its provisions apply to almost all kinds of stock which is liable to be found running at large. Among other things this remarkable legislative enactment provides in substance that no cattle and other stock therein named shall be permitted to run at large within the corporate limits of said city between the hours of 30 minutes after sunset of each day and 30 minutes before sunrise, and if found running at large the marshal shall place them securely in a pound and after giving at least five days notice of the time and place of sale, shall proceed to sell the same at public auction to the highest bidder.

This may be a good law in part and bad as to the rest. So far as it applies to all stock except cows, we do not now think of any serious objection, but from the best knowledge that we can gain, we understand that the same was passed more particularly to restrain the liberty of town cows.

An ordinance providing for the restraining and disposing of any breachy cows which might be found rambling around town at unusual late hours of the night in order to save from destruction the gardens and lawns of the town, might and no doubt would be a wise provision. But while we are aware that the cows milk, for those who have them, furnish a great portion of a family's living and many children and young babes are fed almost exclusively on the milk of the cow, and that many families are probably able to keep a cow when they could not afford to buy the milk from other parties, we can not see the reason and wisdom of placing the poor cow under such unusual restrictions. So that if she happens to be coming home late she may be caught up, and if the owner is unable to pay the marshal's costs of keeping her over night, then she must be sold; thus depriving the unfortunate party of the much favored luxury.

THE RAILROAD.

The contracts for furnishing the ties for the Yaquina railroad have been let to different persons, who are now or soon will be engaged in getting them ready for delivery. The survey will soon be sufficiently located that a large force of men, who are already engaged and in waiting, can commence the work of grading. The iron is on the ocean bound for Yaquina bay, and thus at the present writing the most skeptical are forced to confess that the predictions of the GAZETTE are soon to be verified, and that the highway to the sea is soon to be made smooth. We feel that it would not be inappropriate at this time to return to Col. Hogg and his many faithful assistants the thanks of the people for their efforts in carrying out an enterprise so fraught with good results to every resident of the Willamette valley.

MINING CLIPS.

Shasta county California, has six quartz mills, three flour mills and ten sawmills. The Leadville Consolidated Mining Company's properties at Nevada are producing about \$1,500 in ore per day. The new strike in the Moulton, Montana, 200-foot level is 61 feet wide; solid ore in drift. Native silver is freely encountered. Santa Ana parties have located a ledge of silver ore 25 feet in width near the Fish Ponds. The assays run from \$20 to \$25 a ton. A steamer from the Cassiar mines has brought \$22,000 in treasure to Victoria. The Chinese hold the best claims in the district and are making money. A force of six men started work on the Keystone copper mine, Copperopolis, two weeks ago, but they have been discharged and work stopped for the present. The Great Western Quicksilver mine, Lake county, has five furnaces and three retorts, all running in full blast and turning out quicksilver at the rate of over six hundred quicksilver flasks per month. The Mount Pleasant and Malton mines at Grizzly, El Dorado county, and the Springfield mine near El Dorado, are getting out and crushing large amounts of fine ore, and realizing handsomely in bullion. The Southwestern Mill Company are working 18 stamps and a roaster night and day at El Dorado Canyon, San Bernardino county, and the Lincoln Mill Company are dropping five stamps on custom work. A rich strike has recently been made at Collierville, Calaveras county, in a mine owned by Mrs. Collier. The vein is about three feet in width, and the ore pays an average of \$120 per ton. The Collierville mines are generally rich. A miner from Tacon British Columbia, gives a glowing account of the quartz mines. Several claims had changed hands at large figures. The diggings are believed to be very extensive, and prospectors report new discoveries daily.

STATE NEWS.

Work has commenced on the insane asylum at Salem. Staton, Marion county, has a new school house. Wood River papers continue to give favorable reports of the mines in that section. Over one hundred tons of wool has been shipped from Penewawa on Snake river this season. Mr. D. P. Mason, of Albany, has let the contract for building a handsome residence on the corner of sixth and Ferry streets. Albany has commenced a thorough system of underground drainage to the river by laying 18 inch pipes 12 feet under ground. A large quantity of flax has been pulled on Jason Wheeler's farm in Linn county. The yield generally in that county is good. The Wood River miner says nearly one hundred thousand sheep, from Washington territory, have been driven through Hailey this summer. The new Presbyterian church of Union was dedicated as a place of worship last Sunday night. The exercises were conducted by Revs. Shields and Boyd. Mr. F. E. Robinson formerly of this place has nearly completed a large and commodious dwelling at his new warehouse in Albany. Mr. J. H. Campbell is also commencing to erect a residence in the latter town. Hon. E. D. Shattuck is building a large residence on his farm near Scatterville, Washington county. It has a large number of men employed grubbing and ditching. Last Saturday Clash-Mox-Mox, a Umatilla Indian, charged with selling whisky to another Indian was found guilty and sentenced to pay a fine of \$5 or 30 days in the county jail. Gen. Nelson A. Miles, successor to Gen. Howard in command of the department of the Columbia, left New York for Vancouver Barracks on the 1st of July. Justice H. A. Johnson and wife, of Salem, celebrated the fortieth anniversary of their marriage at their home in that city last Monday. The Squire and wife are both hale and hearty. Indians made a raid on a traveler from the Spokane country last week and took a horse out of his team said to have been lost during the war of 1878. The Indian was assisted by U. S. Deputy Marshal Morse and Indian agent Fay. It is needless to say that the owner gave him up.

POSTAL CHANGES.—Established: Gardnerville, Douglas county, Or., Lawrence Gillman, postmaster; Snipe, Umatilla county, Or., John B. Clifford, postmaster. Discontinued: Yainax, Lake county, Oregon. Name changed: Wildcat, Kikikat county, W. T., to Highland. The new iron steamer Mississippi arrived at Valparaiso on the 16th en route from New York to Portland. She will be employed in the Seattle coal trade in connection with the Willamette. A third steamer under the name of the Umatilla has just arrived at New York from the ship yard in Pennsylvania, and will soon sail for the Pacific coast. An Indian girl in Umatilla county committed suicide by hanging a short time since—cause, disappointed love. This would look as if the Indians in that section were becoming civilized, and the faster they display this one feature of civilization the better for the country. Horsemen declare that there is the finest field of horses present at the east side track ever before assembled north of California. The array of names of fast runners and trotters is formidable. If these races do not prove a success there is little need of testing the matter again.—Telegram.

Mrs. Sparks who died near Sheridan in Yamhill county recently, was almost a centenarian, being 92 years old at the time of her death. Mrs. Sparks was married when 16 years old, and became the mother of 17 children, six girls and eleven boys, with the exception of one that died in infancy, all lived until the youngest was 28 years old, and ten of whom are now living. She came to Oregon in 1851. During her long life she was never sick but once, and she passed away without sickness, dying without a struggle while at the dinner table. One of her daughters, Mrs. John Lynch, now living in Polk county, has had 16 children, all of whom are living but one.

A Mr. George Silmar and Mr. Richard Knolls of Portland, who had been out calling until late last Friday evening, upon returning to their room about 10:30 o'clock, they discovered a light through the window in Mr. Silmar's room and a stranger there going through his pockets. Hearing the footsteps the thief leaped out through the open window, but Mr. Knolls having remained outside seized him and held him until Silmar quickly returned to the scene they both overpowered the thief and threw him to the ground and immediately signalled the police. Two officers soon arrived and conveyed the offender to jail where he will no doubt languish until Judge Caples gets a penitentiary lick at him.

SOUTHERN OREGON—TIMES.

Jacksonville is to have a real estate agency. Castle Bros. have driven 1,000 head of cattle from the western end of Lake county. Mrs. C. Carter of Big Applegate killed a large rattlesnake, having nineteen rattles on it, the other day. The youngest son of Quincy A. Brooks of Linkville fell into one of the hot springs near his residence last week and was painfully scalded. A disease supposed to be the scarlet rash, is becoming epidemic among the children of Jacksonville. There are several cases at present, but none have proven serious as yet. J. P. True has ten acres of grain that will compare favorably with the best anywhere. He estimates that it will yield at least 60 bushels per acre.

PACIFIC COAST CLIPS.

Captain Roberts' steam wagon has arrived at Riverville, Tehama county, California, in good working order and has entered on the work of moving wheat to the river. Two large lamps, which cost \$9,000, have arrived at San Diego for the new light houses that are to be erected, one on the harbor side of Point Loma, and the other on the west side. About 200 persons assembled in Irish American Hall, at San Francisco one evening last week, pursuant to a call for a mass meeting of the Socialists Labor party, to discuss the cause which led to the attempted assassination of President Garfield. Most of the speakers attributed the act to the spoils system. A cloud-burst occurred Sunday afternoon at Devil's Gate, 12 miles west of Eureka, California. It swept through the house and premises of Andy Lock, badly frightening the inmates, but doing no serious damage. The waterpout at El Paso, N. M., last week damaged city property to the amount of \$50,000. Southern Pacific Railroad property \$8,000, and washed away a bridge on the Atchison, Topeka and Santa Fe Railroad. Up the Sweetwater Valley, San Diego county, seven miles from the bay, is a narrow gorge through which the river flows. Above this gorge is a large valley surrounded by hills. It is the intention of the National City Land Syndicate to construct a dam at this point 100 feet high, and form a reservoir that will cover 600 acres of land to an average depth of 40 feet.
