STALLAS STATE

THE WHEAT AND TONNAGE QUESTION

San Francisco Journal of Commerce. The quantity of wheat and flour u harbor July 1st was 129,389 tons; the increase in receipts over exports since then has been 42,454 tons; the total now in port is 191,843 tons. This was the state of affairs on the 15th. It has not changed appreciably since. The tonnage in port to that date, including disengaded, about equalled He warned the farmers not to trust 70,000 tons register, the equivalent of 100,000 tons of wheat. There are to the Land act. It was, he said designed to break the League thus on hand 71,834 tons of wheat for which there was no tonnage in port. Under such a state of things, it is no wonder that spot freights should be firm. The probable arrivals within 30 days equal 137,816 tops of tonage. This will carry 196,880 tons of wheat of which we had on Thursday night 71,843 tons. It would take a month to load these vessels, so that there would be on hand two weeks after League. He pledged himself to head the arrival of the last, the receipts the laborers' movement if the farmer of six weeks. Receipts since July did not give them fair play. He re-1st have averaged 23,260 tons a week. asserted that fair rent would be the so that there would have been value of land in a state of nature brought hither 139,560 tons in the before it was improved by a tenant interval. Adding together this and or any of his predecessors. In regard the surplus of wheat over tonnage on to the industrial question, he said the 15th, we have the following result:

Surplus of wheat over tonnage Sep. 16th Probable arrivals.....

Surplus of wheat 14,523 That is to say, that even then there would be more wheat than could be actually loaded by the vessels on This showing does not do hand. much to sustain the leading members of the Wheat Grower's Association. Besides it is not absolutely certain that all this tonnage will arrive within the period specified, and some of i may direct its course to Oregon.

As to the statement at the meeting duction of the precious metals for made by Mr. Bell, we may say that out of the 416,754 tons on the way and loading for this port, pot more than three hundred thousand tons may be expected before January 16, probably all can not arrive before January 30th. A good deal of this will probably seek the shores of Oregon. The 23,587 tons not announced may be regarded as largely mythical. A few vessels unannouced will arrive can gold coins quickly followed. but they will be fully balanced by those which will never arrive-by those wrecked, obliged to put in through stress of weather for repairs, etc, It is impossible to say when the vessels now loading may sail, and we understand that some placed in that category are being built. It is certain that few or none would arrive by February 15th under the most favorable circumstances, and it advanced to five per cent; while the is equally certain that when the tele- Bank of France, the Bank of Belgium, graph and cable tell the English ship and the Imperial Bank, of Germany, owners that we have only half a crop followed suit, the latter putting up this year, as the farmer's statistician in their wisdom aver, none may be This, and the heavy crops of Southexpected not only by February 15, ern Russia, which may necessitate a lessened need for American bread but for months after, until the unreliability of that statement is found out stuffs, rendered it probable that the by experience.
