THE FUTURE OF THE INDIAN.

The government pet, the sad-eyed red man, must learn to labor for his daily bread, even as his despised white bretheren are now compelled to do. The fiat has gone forth and unless congress interferes with or upsets Secretary Teller's plans, the enormous annual appropriation for feeding and keeping the Indians in idleness will be largely reduced and will finally disappear from the list of appropriations, so says an exchange-In accordance with orders from the Secretary, Commissioner Price has issued a circular to all Indian agents instructing them to announce to their several charges the fact that the secretary will recommend to Congress a reduction of the appropriation for the Indians, and that they must regard this as an indication that they shall speedily learn to support themselves in agricultural and other pursuits, with the understanding that the change of policy will be continued until the Indians are self-supporting.

ORIGIN OF FREE TRADE AGITATION. During the Presidential campaign

of 1880, the claim that free trade was advocated in the interests of mechanics, artisans and factory hands was effectually exploded. The howling against the tariff is as vehement as ever; but, if the motive of the outcry be asked nowadays, one is told that the interests of the Western farmers are being trampled upon by Portsmouth.

#### Making Steel Rails.

Pittsburg, Nov. 20.-A movement is oot in Wheeling to utterly revolutionize the iron manufacturing business of that city and of the whole country. The plan of iron and nail manufacturers there is to do entirely away with puddling, puddlers and of course puddlers' strikes. A syndicate formed in Wheeling during the recent troublesome strike have held a series of star chamber essions, the result of which has been the sending of one of Wheeling's most promi nent mill managers, Frank J. Herendon, to this city to arrange preliminaries for putting in operation the new plan. He said last night: "We calculate in Wheeling that we make above three sevenths of the nails made in the United States. Over five thousand puddlers are employed in puddling iron which we cut into nails. I am placing conrracts where they may be concluded at any time most suitable to the Wheeling syndicate for all. Suggested Tariff Changes. Washington, Nov. 20.-The argument

the Metropolitan Industrial League before the tariff commission, prepared by Chas. S. Hill, of the state department, has just been issued from the government printing office in a volume of 200 pages, supplied with diagrams showing the degree of inflaence that the several conditions affecting the results of the tariff have in the principal countries of the world. Mr. Hill recommends a rational reduction and abolition of the duplex system in cotton goods, an in-

crease of rates in hemp, jute and flax, protection to American wines and brandies against foreign adulterations, materia changes in rates in metals and minerals, and that a duty of \$2 per ton be placed on iron ore; also slight modifications in bread-

stuffs, provisions and animals. The existing average rates of sugars are generally Indorsed- But abolition of the duplex rates is strongly urged. Silk culture and reeling is also recommended; the abolition of duty on inmber is likewise advised. In wool and

woolen goods a simplification and consistent revision contemplating a change from the duplex system to an ad valcrem is recommended. A duty of ten per cent on quinine is advised. To the free list is added 25 articles heretofors rated, among which abor will be reduced 5 per cent. on Dec., 1, are spirits of turpentine, sponges, crude salt petre, rosin, asphaltum and nitrate of Every settler and land man should have copy of this valuable little book. lead.
