Burt White Plowing.
Last Saturday morning about eight o'clock Fred Oltjenburg was plowing in a field near King's Valley, in Benton county, with a three horse team, when he met with quite a serious accident. One of the tugs became loose, and he stepped forward to hitch it up, when the horses gave a plunge, the plow striking him on the left leg making a bad gash three or four inches long and reaching to the bone. He was dragged several rods when he was able to extricate himself, says the Albany Democrat. He was immediately placed in a wagon and brought a distance of eighteen miles, to this city, reaching here about seven o'clock in the evening. Dr. Hill sewed up the gash and dressed the wound in a skillful manner, during the time Oltjenburg not uttering a word, although the operation was very painful. He is now stopping near this city and will not be able to work for sometime.
Lime and Marble.
Captain Lewis, of Assotin, informed us that his limelime on Snake river, two miles below the mouth of Grand Round river, is working finely, and that he has new ready for shipment 250 barrels which, with the aid of his little steamer, he can deliver at the head of Snake river. He thinks that next summer he will be able to place 1,200 barrels of lime in the market every month. Mr. Lewis also informed us that there is a fine marble ledge adjoining his lime quarry a fact not very generally known throughout this country. The marble is of three kind, one specimen, called "nut marble" being especially fine. Good judges have passed favorable sentences on this ledge.—Pomeroy Republican.
Deliberate Suicide.
Mr. Nelson Cole of Columbia county, and who represented that county in the legislature four years ago, committed suicide by shooting himself through the body with a rifle ball recently at the residence of his son. It is said that a rapidly growing cancer which had baffled all skill to cure it and had eaten away a large portion of the jaw led him to thus suddenly end his earthly existence.
Worse Than A Boast.
Two women one of which is the wife of a Dalles man well known, cast away a young six weeks old babe belonging to one of them, on the door step of a second street house at Portland recently. They were pursued by a man who saw them leave it and induced to allow the child to accompany them.
Discharged.
It is understood that a large majority of the white man employed on the works of the R. R. extension south of Roseburg have been discharged for the winter says the Plaindealer. The bad condition of the road and a lack of transportation facilities have necessitated this course. Work will be continued on the tunnels and near the terminus.

Robbery at Alsea Bay.
A friend sends us the following account of the robbery at Alsea Bay, says the Post. On Monday night, November 27th, the store of H. A. Lutzien, at the mouth of Alsea Bay, was entered and seventy-five dollars in money taken from the drawer; five dollars of the amount was left on the floor, probably dropped, and in a hurry to get away the robbers failed to find it. There were fresh marks left by a boot which had apparently landed just below, and from the boat to the store were the tracks of two pair of bare feet, both about nine inches long. Two men were seen in the vicinity of the store about the supposed time the robbery was committed. One of the men was recognized, and warrants have been issued for him and his supposed associate in the robbery. LATER.—One of the suspected parties has been arrested. LATER.—Toledo, where they will probably have a preliminary examination.

That Deer Hunt.
During the past two weeks a deer had been seen, by several parties, a few miles south of town, and on last Tuesday Ed Wariner and Eperam Cameron started in pursuit of the animal. They had not been gone long when the animal sprang from the brush, a few steps away, and Cameron fired and it wound it. It soon recovered and made efforts to escape, but Ed with his usual presence of mind, ran up and caught it by the hind leg and held it until Cameron could reload and shoot again, but even in this instance he was not successful in killing it. Ed realizing the situation braced himself against a tree and with a firm determination held the deer tighter than ever. The deer kept kicking and blating and Cameron kept loading and shooting until all his ammunition was gone, when the animal in its efforts to escape fell and broke its neck. The boys brought in their game, but they declare they have hunted deer for the last time.

New Arrivals.
Mr. C. F. Kendall, son of Albert Kendall who died at Salem in an early day, and nephew of Col. J. S. Kendall of this county, recently arrived from St. Louis, Ohio county, Cal., near Moro Bay. He came to take charge of and run the Col's large farm about three miles north of town, where he will remain in charge while his uncle intends to give up the place and move to town. Young Kendall moved from Salem after his father died when about twelve years of age to Nevada and from thence to St. Louis, Ohio where he last came from. He appears like an energetic and business like gentleman who will certainly make things move to success on the farm which the Col. passed the remainder of his days in rest and ease.

The Nimble Nicks.
In the retail trade throughout the Pacific coast, anything less than ten cents is seldom used in the medium of exchange. Nearly every small article is sold at a "bit" and consequently it has never been necessary to use the five cent piece in making the transfer. We believe, however, this will soon be innovated and the "nimble nicks" will be used as much, if not more, on the Pacific coast, than any other piece of money made without timber. The most substantiating evidence we have of this, is the fact that Wells, Fargo & Co. received at Portland last week an enormous invoice of nickle five cent pieces, which were minted this year, for the coast trade. One of their employes in giving an idea of the number required stated that "they could not get men enough around the package to lift it."

A Trip to Spanish Hollow.
Henry Elliott returned recently from a trip to the Spanish Hollow country, between the Deshutes and John Day rivers. He is very much pleased with the country. They have a nice valley there about sixty miles long and extending back from the Columbia river and about twenty-seven miles wide. The land is high rolling land without timber. He remained a while with his brother-in-law, Mr. A. B. Wooly, formerly marshal of this city and who was well and favorably known in and about Corvallis as a good jolly fellow. Mr. Wooly has a fine ranch there and is well pleased with the country. Mr. Elliott brought with him some different varieties of vegetables raised about ten miles back from the Columbia river in the high rolling land, among which was a large onion 1 1/2 inches in circumference raised from the seed by Mr. John Barse who formerly lived about four miles from here down the river on the Linn county side. Also a couple of ears of corn raised by Mr. Wooly, of the white dent kind which was perfectly filled clear to the point, measuring 7 1/2 inches round and 7 1/2 inches in length, and a potato measuring 1 1/2 inches round. These samples were not the largest raised but simply picked as average samples of the crop. The country is settling up there rapidly and all seem to be well pleased with the locality. Mr. Elliott before leaving took a piece of land under the timber culture act. He thinks Mr. Wooly will be down next fall to see his old friends and acquaintances.

Philomath Items.
Ed. GAZETTE.—We took occasion to visit the public school at Philomath on Saturday last. Prof. M. L. Koffger, principal, Miss Laura Allen assistant teacher; there being two separate rooms, we did not visit both one department. This being the last day of the last term for this school year, quite a number of visitors were present to listen to the declamations and essays, which were generally well but few exceptions rendered very well. At the close of the exercises Prof. Koffger gave a public examination of his two grammar classes of 17 each. Their prompt answers to questions propounded, proved they had been diligent in their studies, and especially the B. or primary class done well, for only one out of 17 ever studied grammar before the commencement of the term; (I will try and get a report of the grade of standing of the pupils). Miss Fonia Davidson created some merriment in declaiming the new version of Mary had a little lamb viz Mary had a little ramie. Miss Emma Bole's essays on Oceana, and Miss Lulu Bunnell's essay on Autumn, were brief but well composed and read. Frank Watkins, is safe from indulging in the use of the poisonous weed tobacco, judging from his selection for a declamation. Frank Leggett, did exceedingly well on the "Deacon, his potatoes and the poor widow."

The quarterly conference of the U. B. church, was held at the college chapel last Saturday and Sunday, Rev. Woods presiding.

The M. E. church will hold their quarterly conference on the 9th and 10th of Dec., at this place. Principal services to be held in the college chapel, Rev. I. D. Driver presiding. Praise the Lord for this unity of spirit.

The second term of public school commenced the first election of the city of Philomath occurred yesterday; we were not present, but learn that they set a good example to other towns, by permitting the ladies who paid taxes to vote. The result of which was that the tallented and larger men in the city were elected to the principal offices. Viz: M. Boone, marshal, W. T. Bryan, mayor, and Julious Brownson, recorder. Yours Truly, J.udson Seely.

The largest telescope in the world will soon be completed for the Russian Government by the firm of Alvan Clark & Sons, of Cambridge. This largest of all glasses is for the Russian Observatory at Pulkovo, which was founded in 1829 by the Czar Nicholas. In 1875 the Government authorized the astronomer Otto Struve to draw on the Treasury for whatever sum might be required. The grinding of the new lens has now been proceeding for twelve months and it is expected that it will soon be completed. The length of the Pulkovo telescope will be forty-five feet and the diameter of the object glass thirty inches. It will be mounted on a lawn to the southwest of the principal building of the Observatory. It is estimated that this new lens will practically bring the moon within a distance of thirty-eight leagues from the earth.
