An Earnest and Effective Argument. Unfortunately the rumbling war like sounds of the battle field during the last week fell upon our ears.

Her remains were laid to rest in the beautiful cemetery on the hill near Elk City amid the tears and grief of the whole neighborhood who were present to witness the solemn ceremonies.

Her parents, brothers and sisters, were overwhelmed with grief at the great and irreparable loss.

Yakima, W. T. Mr. M. S. Woodcock, Sir—As this is Christmas time perhaps you would like to know how the people of this upper country manage to enjoy themselves, and as I was a looker on many I can manage to tell some things that would be of interest to your readers. Saturday before Christmas the day was spent in shooting for turkeys and also pigeons. The distance for the turkeys was 40 yds. off hand and 60 with rest. The Cow Boy took aim shot and walked off with a large goulter, and if nothing happens I will help to pick his bones on New Year's day. There was a large crowd in the city and a heap of whiskey drank but not a row of any kind during the day.

Sunday I listened to a good sermon preached by a Methodist preacher and I must say by far the best discourse I ever heard in this upper country. Monday opened out a little cloudy but soon cleared off and the day was the finest Christmas day I ever saw. All the day they were arranging for the Christmas tree and when the doors were opened the crowd gathered fast and the hall was crowded full. The trees was full of valuable presents and there was many little hearts made happy. After all was over the hall was cleared out and the dance commenced. There was not as many there as would have been on account of another dance within two miles of town, although I understand there was 62 numbers sold and 63 at the dance near town. So you see our people all dance and but few go to church. Thursday morning the 28, we woke up and found about two inches of snow covering our beautiful valley for the first time this winter. To-day it is quite cold with a north wind most all the time. Clear in all directions excepting to the west; from the looks of the black clouds that come over the Cascades I should say rain day and night down there. Up to this storm our roads were dry and nice.

There was a grand rush made in Moxee valley a few days ago for land. I understand there were eleven sections taken and there is a company with seventy-five thousand dollars going to bring a large ditch out to irrigate the land. This land is on the survey of the railroad. Land in that valley is bringing a good price and a great deal has changed hands. The talk is that there will be a town in that locality and the people of Yakima City are somewhat uneasy as it is on the opposite side of the river, and they fear it will take the business from their town. When I hear the whistle of the locomotive than I will begin to think we will have a railroad and not until then.

Yours Truly, Cow Boy.

Summit Items. It blew a tremendous gale here on the 6, inst. trees could be heard falling in every direction and it was said to have been the biggest windstorm since the 9th of Jan. 1880.

The Misses Savidge, I am glad to hear, are rapidly recovering from their severe attack of fever.

There is a large body of as fine timber as there is anywhere in the county on the N. E. fork of the upper Mary's river. It is estimated to contain at least six million ft. of the very best of lumber. The trees vary from two to ten feet in diameter and are nearly all perfectly sound and easily gotten at. This it seems to me would be a good location for a portable sawmill as there is a good market for lumber in the neighborhood.

I am requested by several gentlemen living at the summit to complain of the disorderly state of the mail service between here and Corvallis. It seems that the same complaint is made here as at Newport, viz: The delay in getting the mail and the state of the mail on delivery. One gentleman showed me a paper covered with mud as a specimen I am assured that there never has been reasons for complaint in previous years. It is to be hoped that after this notice there will be no further good news given for complaint.

Col. Isaac Smith is staying at Mr. Crane's and temporarily filled Mr. McMillan's position as town superintendent last week. Messrs. McMillan and McGilivray have resigned.

Dr. Farra was down here to-day attending Mr. Blake.

George Blake one of the men who were burnt in the fire at Inman mill near Monroe was of good English parentage and was educated at Cheltenham one of the large English Public Schools with a view to his entering the English Church. He, however, ran away from home and enlisted in the 11th Hussars. He served with credit through the Indian mutiny where he was wounded and obtained his discharge. He afterwards emigrated to America and joined the Victoria B. C. police force. By his good conduct an efficiency he rose to be chief of police which office he filled satisfactorily for several years. Last year he worked on the Oregon Pacific and afterward for the King in Corvallis.

His only fault was that he was too fond of his glass (a very general fault) which was the cause of his death. He was very much liked by all who knew him and his demise is deeply regretted by all who knew him.

T. SIDNEY NASU, From "The Times."

Editor of Times—The veterinary department in your valuable paper is always read by me with great interest, and I value the information received from it a hundred fold more than the small amount paid for the paper. One year ago you published a letter from Dr. John Bates, relating the wonderful success he had in curing spavins and splints with Kendall's Spavin Cure, and his illusion is using it now in his practice for several human ailments on account of the success he has always had with it. The above statements from so prominent a physician gave me great faith in its efficacy, and as I had been afflicted for years with rheumatism and hip-joint lameness so bad that it could hardly walk at times. I procured a bottle and as it has completely cured me, I wish to proclaim it to the world, as the most wonderful discovery made for the benefit of afflicted men as well as the poor horse, for which it was first used. As this remedy must be of incalculable value to the

world, I write this letter to express my thankfulness to you for ever mentioning it in your columns, and to ask another favor in behalf of my fellow men who are afflicted in body, that you continue to make known to the world, the great value of Kendall's Spavin Cure for man as well as beast.

Respectfully yours, ARNOLD PARKER, Rochester, N. Y., Sept. 1st, 1881.
