Weleekly Corvallis Gagette.

FRIDAY MORNING, MAY 11, 1883. Entered at the Postoffice at Corvallia Oregon, as second-class matter.

-EDITED BY-M. S. WOODCOCK, ATTORNEY AT LAW.

OFFICIAL PAPER FOR BENTON COUNTY

AN EXPENSIVE CALF.

At the last term of the Circui Court for this county on the complaint of Miles Wilkins the grand jury indicted a Mr. Jones for the larceny of a calf found in Jone's possession which Wilkins claimed to be his. Jones was brought before a trial jury and a large number of witnesses testified on both sides. After the case was submitted to the jury they were only out a very short time when they returned into court with their verdict finding Jones not guilty. All those present at the trial whom we have heard speak of the matter, seemed to think the case on the part of the prosecuting witness against Jones to be the thinest pretext ever heard of to put a man on trial for a crime. The case seemed to develop the fact, that the two men. Wilkins and Jones had been in an honest dispute about the ownership of the calf, each claiming it. But in place of Wilkins bearing the burden of his own lawsuit, to test the right of property, by bringing an action to recover possession of the calf; he went before the grand jury and had Jones in licted, and put the burden of his law suit on Benton county. In doing so he succeeded admirably because by Jones coming clear the costs had to be paid by the county, costing the tax-papers about five or six hundred dollars, in order to fight Mr. Wilkins case, and protect his supposed calf. A motion was made after the trial of Jones to make Wilkins (the prosecuting witness) pay the cost, but owing to the peculiar view the court took of the construction of the law, he refused the motion and left the county to pay but thus far it misleads the public the same. After this the matter remained quiet until about two weeks gets the regular fee for all the arrests ago, when Wilkins took the calf into his possession and Jones sued to re-\$4 each. However, we are not precover it back again. After swearing about thirty witnesses on each sides, pay for the night-watch, but on the the jury brought in their verdict that Jones was the owner of the call and so it remains at this time.

The whole affair then presents the fact, that Jones was indicted by the grand jury of this county, at the in stance of Wilkins for stealing his own calf; and the tax-payers of this county had to"pungle" to the tune of five or six hundred dollars in order to enable Wilkins to find out that the calf belonged to Jones. It is our custom not to comment upon matters while they are before the court for trial; but as we now understand that this matter has finally passed out of the courts; we feel at liberty to notify the public of one of the many instances how the taxes they pay are consumed. There is hardly a term of the Circuit Court in Oregon, but what some person appears before the the grand jury, with his witnesses, for the purpose, of trying his private rights with some other person, who disputes with him as to his rights, Many times such cases fail to reach indictments; but the expense is made before the grand jury and no person. other than the grand jurymen know in what form such expense are incured. We sincerely hope, that the tax-payers of this county may be permitted, to excuse themselves and forever bid adien to Jones' calf.

"JUDICIAL MIND"-FOR RECORDER. Shackled to the City for \$900 to \$110

His Liberty in a Great and Pleasurable Sence is Taken From Him Because He Gets From \$900 to \$1100 per year for Laboring

For several issues of the GAZETTE we have been noticing the fact that is no truth in the statement made in the office of Recorder of Corvallis is paid much too high for the amount of service rendered, and at last we have found a "judicial mind," who comes forward and publishes to the people of this municipality, under the title of "Fault Finders Noticed," and thorough and safe abstract of a who signs himself the nomdeplume "Fair Play" but who in fact is Mr. a days work at such work as exam-S. T. Jeffreys, the present incumbent of the Recorder's office. This article \$25 or more nor more than half so of Mr. Jeffreys' so treats the subject in such a manner as to mislead the public as to the facts connected with | in proportion to the amount of pay the subject, that we feel inclined to received by the recorders he should notice some of them, although the have to charge at least \$100 each. article appears over such an innocent | We don't mean to say that Mr. name as "Fair Play." This judicial Jeffreys has purposely made this mind, Mr. Jeffreys, deems his argu- misstatement, but sometimes "judiment partly gained when he denom- cial minds" arrogate to themselves inates all those who may presume to an understanding of matters and at-

" Time !

propriety, who pay little or no taxes or revenue into the public treasury, and who are willing to hold the public officers, and draw their pay for filling such offices, from the tax payers, and when these tax pavers, the commonwealth, presume to invade the sacred liberties of that official with a "indicial mind," to simply inquire and discuss where the taxes go to, which they pay out every year, and whether they are paying such public officer their servant more than the labors of the office justly deserves, such officer rears back upon his "pastor joints" with his head raised heavenward, and while he presumes to assume an attitude of almost divine authority he by intimation says you "fault finders" who pay the taxes, you have no right to ques tion the amount of official pay which receive. You old "fossil grumlers who live around drug stores and barber shops" who pay the taxes from which I draw my official pay, you have no right to discuss the question as to where your money goes to or whether the pay of your public servant'is too great or not. Such flings as "Fault Finders" "fossil grumblers who live around drug stores and barber shops" may be convincing arguments to "judicial adopted to fill the Recorder's office, but with common sensible minds who pay the taxes to keep up the expenses of the government and who reason from their experience and observation of things do not regard it as at all convincing. Mr. Jeffreys laboring under the influence of a nighty 'judicial mind', based upon his experience in office growing out of the clerical branch of his duties, states for public information, that the night watch gets \$730 in city scrip per year for watching the city every night during the 12 months. This statement is good so far as it goes,

rumblers who live around drug

for public information, he should not stop by stating part of the truth, but he should state the whole truth. Again he states that the Marshal gets about \$640 from the city, in city scrip during the year. In this statement like the former he fails to give the full pay received by the Marshal because he stops short of stating the whole fact in this that he neglects to give the amount received by the Marshal during the year in the way of fees ontside of what the city pays him. But the Marshal's office like the night-watch as it takes their entire time if they make good officials and do their duty we have always expressed the idea that they were likely not paid too much. Another very convincing argument used by this judicial minded Recorder in his estimation although not correct-

because in addition the night-watch

which he makes at the rate of \$31 or

pared to say that this is too much

contrary we have always maintaned

that the night-watch was not paid

too much; but the point in alluding

to it is that when a public officer

possessing a "judicial mind" volun-

teers to publish statements ostensibly

ly stated wherein he says: "The expenses of this office seems to bother the GAZETTE. I think it illy becomes a man to argue that the pay is disproportionate to the labor done, who for glancing over the recorded deeds of a man's property and possibly taking a day's time will charge \$25 or more.

The above quotation furnishes another knock down argument no doubt to a "judicial mind" convincing him that the Recorder's fees are not high; but to the minds of us common herd it amounts to nothing and especially when we learn that there the above quotation. Because in the first place there are a half dozen other things to do requiring much more time than glancing at the recorded deeds of a man's property before a person can have made a man's title. In the second place for ining titles we have never charged much. In the third place if a man should charge for examining titles question the Recorder's pay being tempt to instruct the public about too high as "Fault Finders," "fossil it when really and in fact they know

nothing about the facts about which tores and barber shops" &c., and they claim to speak. Now we come thus it always has been in all ages of to that great and "highest office" of the world, that we find "judicial the city which requires a "judicial minds," with enlarged views of pub- | mind" and Mr. Jeffreys tells the publie that the city pays him \$620 in city scrip, but he fails to tell the whole truth so that the public may have full information on the subject by neglecting to tell how much the city Recorder receives outside of

what the city pays him. Mr. Jeffreys, in private conversation freely admits that he will make during the present official year at least \$900. Mr. Sawtell last year made about \$1100 out of the recorders office when in fact the duties thereof could have been preformed by consuming not more than one third of their time in either year. Plenty of men just as well calculated to fill the recorders office as these gentlemen who generaly occupy it can be found, who if they were to start out to find a situation would not be able to get more than five or six hundred dollars per year for every hour of their time except Sandays during the whole year. Then why in the name of common sense can not the recorders office be filled by some person in our town having some other kind of business and having time sufficient to spare to perform the duties of recorder under fee bill with the fees reduced to half the amount of the present fees. We feel safe in saying that there is not a minds" such as are particularly lawyer in this town who has no busi, ness out side of his profession to look after, who would not be willing to take the recorders office under a fee bill which would pay him three or four hundred dollars per year. We don't blame these recorders for get ting all the office will legitimately pay. But the idea that in order to perform the duties of recorder and make a good officer it requires a man with special judicial training is only so many high sounding words amounting to no more than "bosh." Any good steady man with fair business ideas and willing to follow established forms in his clerical duties can make a good recorder. These judicial minds may not think so but the "fault-finders" and "grumblers" who pay the taxes and thereby bear the burden of the day assume to say so because they differ from "judicial minds" who hold the office and get the taxes therefor.

CITY RECORDER'S OFFICE A FAT TAKE Some of our people who think our city Recorder's pay is not too high and especially those who were recan see what people from abroad say of the matter. We quote from the Daily Standard as follows: "There is to be a city election at Corvallis next Monday, and the city is becomng excited accordingly over the event. There are four candidates for ity recorder. Must be a 'fat take.' The term "fat take" made use of is a familliar term used by printers and newspaper men by which is meant a ob wherein there is big pay and little or nothing to do in return for such pay. And is certainly the case when four or five candidates are found running for a little municipal office that it is sure to be a "fat take,"
