SCIENTIFIC MISCELLANY. Written expressly for the GARETTE by Eastern Scioutist

From observations made in New York and neighboring cities, Dr. A. A. Julien concludes that the various stones used for buildings will retain a decent appearance in walls for the toliowing periods: Coarse brownstone, from five to fifteen years; laminsted fine brownstone, from twenty-five to fifty years; compact fine brownstone, from 100 to 200 years; Nova Scotia stone, probably from fifty to- 100 years; Ohio sand stone, 100 years; Caen stone, from thirtyfive to forty years; coarse dolomite marble forty years; fine marble sixty years; pure calcareous marble, from fifty to 100 years; granite, according to variety, from seventyfive to 200 years. Among the chief destroyers of the stones are solvent substances washed from the air by rains, and the heat of the sun.

The injurious results which have followed

the removal of forests in the French Alps have been described by Mons. Demontzey. These effects have been chiefly the washing of great quantities of detritus down from

and ravines, and the inundation of good valley land with sand and gravel. To romedy further growth of the gulleys it is protercept the sediment that is being carried they passed, and women who once went down by the streams, and to stop the wear-

be planted as rapidly as possible.

On the basis of the capillary phenomena, De Heen has calculated that a cube of waan inch contains about twenty-five trillions of molecules.

Dr. J. E. Pollock considers that the evidence furnished by the Brompton Hospital London-which has had by far the most extensive experience with the disease of any institution in the world-proves that consumption is not conveyed from one per son to another by contact or by breathing the same air. At least, during the thirtysix years the hospital has been in operation, the medical attendants, nurses, and others employed about the establishment, have

been unusually free from this affection. Prof. Tait lately announced to the Royal

on the horse, which we propose to give Society of Edinburgh that he had succeeded away to every subscriber paying in advance, in obtaining a specimen of pure indium, if requested, whether personally, or by and that by means of this and pure ruthenmail; if by mail send 3 cent stamp to pre ium he expected to succeed in making a ray postage. This book is well worth the standard thermy-electric couple. Such an price of the paper \$2.50 to any person apparatus would give what he had long having horses. The American Cultivator has sought-a definite standard for comparing the following to say of the treatise: "Kendall's Treatise on the horse is a book very high temperatures, such as those o farnaces, etc., for which no suitable instruof about 90 pages, with paper covers, fully illustrated, and containing an "Index of

ments exist at present. and the best treatment of each; a table giv-Dr. John Hopkinson, F. R. S., states ing all the principal drugs used for the that electric lightning in London must now horse, with the ordinary dose, effects and cost rather more than lighting by gas. In antidote when a poison, a table with an enregard to future increase in the economy graving of the horse's teeth at different of the former, it may be said that no maages, with rules for telling the age of the terial change can be expected in engines, horse; a valuable collection of receipts, and boilers or dynamo-machines, although the first cost of the dynamo-machines may be much other valuable information. In preparing copy for this book it was the aim of

the slopes, the rapid formation of gulleys like to h'ar from him." Sir Isaac Walpole thought he could see agreat improvement in social etiquette. Colored brothers who had formerly heaved posed to build numerous small dams to in- brick-bats at him now raised their hats as

barefoot in their shoes now wore stocking ing away of the bare hillsides trees are to costing six bits.

Givendam Jones had seen a great change

in his race in ten years. When a black man who never owned a fowl in his life ter whose sides measure one twenty-fifth of had chicken pie three times a week the year round there was a combination of genius and progress which could not be kept

lown nor drowned out.

Waydown Bebee thought the colored man was more industrious than in former years. He had known lots of them to work hard all day for insignificant wages to get money to patronize policy shops and purchase lot tery tickets. Several other choice bits of information were cheerfully tendered, and the Secretary was instructed to incorporate them and write his report in red ink.

The Forse,

We have received a quantity of treaties 'It is not wealth, or fame, or state, But get up and git that makes me great." YOU SEE THAT A. HEMPHILL still sitting on the smoothe side of poverty drawing out the cords of affliction in behalf of his old customers, where

DATLY HIM LOW DULARD. ADAMS, N. Y., Jan 30, 1883. Dr. B. J. Kendall & Co., Gents: Having used a good deal of your Kendall's Spavin Cure with great success, I thought I would let you know what it I as done for me. Two years ago I had as speedy a colt as was ever raised in Jefferson county. When I was breaking him, he kicked over the cross bar and got hat and tore one of his hind legs all to pieces. I employed the best ferriers, but 'they all said he was spolled. He had a very large thorough-pin, and I used two bottles of your Kemall's Spavin Cure, and it took the bunch entirely off, and he sold afterwards for 51800 (dollars). I have used it for bone spavins and left the leg smoth. The a splendid medicine for rheumatism. I have recommended it to a good nany, and they all say it does the work. I was in Witherington & Kneeland's drug store, in Adams the other day and saw a very in picture you sent them. I tried to you it but yould send me one. I wish you would and I will do you all the good I can. Very Respectfully, E. S. LYMAN. From the Akron Commerci-

al, Ohio, Nov. 25, 1882. Readers of the Commercial can not well forget that a large space has for years been taken up by Kendall's advertisement especially of a certain Spavin Cure. We have had-dealings with Dr Ken-dall for many years, and the truth is fully and faith-ully proven not only that he is a good honest man, and that his celebrated Spavin Cure is not only all that it is recommended to be, but that the English language is not canable of recommending too highly. Kendall's Spavin Cure will cure spavins. There are hundreds of cases in which that has been proven to our certain knowledge, but, after all, if any person confines the usefulness of this celebrated medicine to curring spavins alone, they make a big mistake. It is the best n edicine known as an outward applica-tion for rheumatism in the human family. It is good for pains and aches, swellings and lameness, and is just as safely applied to men, women and children as it is to horses. We know that there are other yood linaments, but we do believe this spavin cure to be far better than any ever invented. Kendall's Spavin Cure

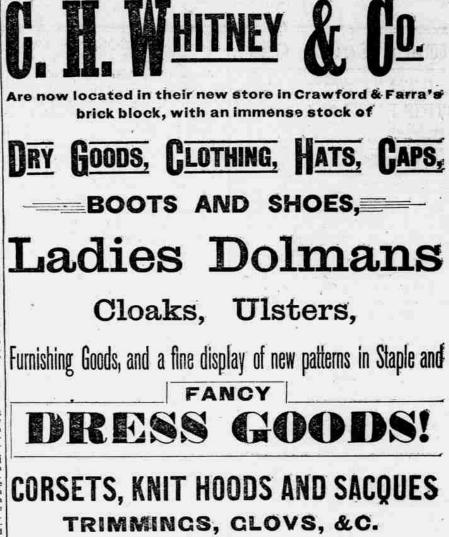

Colton, Cal., Oct. 3, 1852. Colton, Cal., Oct. 3, 1852. B. J. Keddall & Co. Gents: --While in the employ of C. C. Hastings, the well known horseman of San Francisco, in the year ending 1880, we had a young horse two years old that contracted a bone spavin and seeing your liniment known as Kendall's Spavin Cure advertised, upon my own responsibility I commenced using it and within thirty days from that time and after having used only three bottles the spavin was removed entirely, and therefore 1 naturally have the utmost confidence in its merits. I do not hesitate to recommend it to all who have occasion to use the medicine ard should any one desire to confer with medicine and should any one desire to confer wi me I shall be glad to answer any communication relating to the case in question. Respectfully Yours, JOHN ROADMAN.

Kendall's Spavin Cure

Renciall's Spavin Cure San Francisco, Cal., Jan. 16, 1882. Messrs. J. B. Kendall & Co., Gents:-Through the recommendation of a friend about a year ago, I was induced to give your Kendall's Spavin Cure a trial and I am pleased to say that I was fully satisfied with the results. I used it in several instances upon splints, which after a few applications were entirely removed. I also used it on a spavin with the same results. The medicine has grown in popularity in this vicinity in the past few months and what is said here to-day I believe is put out upon its merits. ALEX McCORD, Foreman for City R. R. Co. Send address for illustrated circular which we Send address for illustrated circular which we think gives positive proof of its virtues; No remedy has ever met with such unqualified success to our knowledge, for beast as well as man. Price \$1 per bottle, or six bottles for \$5. All drug-gists have it or can get it for you, or it will be sent to any address on receipt of price by the proprietors, DR. B. J. KENDALL & Co., Enosburgh Falls, Vt.

however, possible in incandescent lamps. With these great economy of power can be had by driving them at high pressure, but then the lamps soon break down; and the problem is to so improve the lamps in detail that they will last for a considerable five times as much light for a soverign 'as can be done now.

A series of photographs illustrative of some experiments made by Prof. Von countenance.

the latter body have already signified their intention of attending the Canada meeting.

From a discussion of the sunshine records made in Great Britain during the years 1881 and 1882, Mr. W. W. Rundell, F. M. S., makes it appear that the coast enjoys more bright sunshine than the inland country.

In a paper read before a Manchester (Eng.) association, Mr. Veitch-Wilson, after recounting his experiments with lubricants. stated that the safest, most efficient and most economical lubricants for all kinds of bearings are to be produced by judicious mixtures of animal or vegetable with good mineral oils.

After being broken on a testing machine bars of steel and iron are found to be magnetic. Bissinger finds that the phenomenon to the shock and trembling of the metal on and described on the maps and plats of the gover breaking; and both parts are converted into magnets of sensibly equal power.

When you come to town to do business, never patronize a person who does not advertise in your county paper; because the advertiser gains the largest patronage, by the use of printers mk and by so-doing, he can always sell to you cheaper, than the party can who waits for the customers to saything for sale. Always patrouize the man who advertises, in your best friend, the county paper.

Josh Billing says "Most men conpede that it looks foolish to see a boy dragging a heavy, sled up hill for the fleetin' pleasure of ridin' down Boards! Boards! again; but it appears to me that the boy is a sage by the side of a young man who works hard all week, and drinks up his wages on Saturday ight. ight.

the author to make it as plain as possibl for the non-professional readers, and give Corvallis, them information which is of the greatest importance to horsemen, and yet avoiding STEAM all technical terms as much as possible, and also condensing the book as much as pos sible without eaving out the real essential time when pressed to their highest efficiency. sible without caving out the subject. Every Chinaman mus go-its cheap to use stean By realizing such improvements Dr. Hop-kinson believes it would be possible to get these little books.
