### The Trouble at Pendieton.

Discharged railroad hands from the Baker City branch and from the O. S. L., who claim to have time checks and can not get pay upon without going to headquarters at Portland, boarded the train at Pendleton last Friday, to the number of 130 or 140. They were laborers of all nationalities, and ome took places in the passenger coach, others filled up empty cars further forward, and others kept upon the depot platform and along the train ready to do whatever circumstances should render necessary. Conductor Robeson, seeing the situation, asked them if they had money to pay their fares. They replied they had no money. but were going with the train all the same, he told them he could not take them, and

that they must get off. They repeated their determination to stay with the train, when the situation was at once telegraphed to headquarters at Portland, and it was suggested that the county or U. S. officials there ought to do sometning. Sheriff Martin could not say that he had any authority in standing upon the reservation, and he has learned by dear experience and Judge Deady's legal sagacity that he has no juris-

diction within the precincts of Uncle Sam's domain. Many of the citizens seemed to treat the situation as one ludicrous rather than serious, and a few zealous ones collect ed and sent ont large quantities of provisions for the men. During the evening warrants were made out charging the principle ones with conspiracy to obstruct the mails, but the U. S. commission held that no sufficient offense was charged, and refused to issue the warrants. A telegram from headquarters ordered the train held there for the night, and the next morning the situation was unchanged, as all the men had blankets and had been provided with provisions. Later in the day, bowever, about 100 of them left the train and starte. on foot westwa d along the ins of the rail road.
