According to an official report, the total amount of the circulating mediums in the hands of the people is \$1,100,000,000. Of this amount less than one-twenty-fifth is in sillars and less than one-tenth in silver ceri icates. As much of either kind of money is used in 'le payment of bills, the inference is that every man holps on to the other varieties and works off the silver dollars, or the certificates representing those coins, with all possible speed.
