VILLIRD'S RISE AND FALL

The cities of Oregon and Washing ton Territory have for the past month been much excited over certain railway elections, in which were involved the success or failure of a great financier. The issue was whether Henry Villard would resume his control of with a membership of thirty-seven perthe railroad interests of the northwest, from which a Wall-street combination forced him a few years ago. The result is his triumph over the enemies little whole week's work for some persons. who have aimed at his ruin. The secondary consequence will be the by the Northern Pacific and its feeding lines. This means prosperity for Portland and Tacoma and the commercial centres of the northwest genera:ly.

It was in 1870 that his thoughts and efforts first drifted into railroad speculation. In 1873 he went to Germany for his health, and there succeeded in influencing German capitalists to invest in American se carities. Returning a year later he began his labors for the construction of an Oregon and Transcontinental railway. This took him actively into Wall street, where he soon acquired a reputation for far-reaching deals in honds and stock. Go WAY CHIL'.-Here is a yarn about the incorrigible small boy, that was related to the editor yesterday. An Albany woman was telling a Corvallis woman who was visiting in this city of the rapidity with which rents were shooting skyward in Albany. The Corvallis woman, not to be out done, after listening a while began to tell of the Corvallis rents. Then her small son interrupted her, just as she had finished telling what she paid per month in Corvallis, by remarking: "Why, that wasn't for month, mamma; that was for a day." Both the women laughed at the boy's idea, but the little fellow kept right on and paralyzed his mother by adding: "It must have been for a day, any way, because the man used to come every day for the rent." Report says the Corvailis woman hurridly moved to indefinitely postpone the whole matter of rents, - Democrat.

SLUGS ON TREES .- This is the time of year that great damage is done to fruit trees and especially cherries, by "slugs," and the farmers may not all be aware of it. Those who have trees whose leaves are turning brown should make examination and whereever the slugs are found, some black lime or dry dust should be sprinkled on freely; this will stick to the slime and prevent the pest from working. In the early morning is the best time to find them and to do the sprinkling.

Having Combined our Two Stores, Corvallis and Philomath, we take this way of announcing that

We now have one of the largest and most complete stock of General Merchandise in Benton county, well selected and at prices to meet Competition. In the foregoing we state a fact which we can verify by giving us a trial and examining our goods and prices. Our many years' experience and close attention to business affords us advantages to serve our customers WELL, which advantage is not enjoyed by many others.

To the country trade we devote special attention, carrying in stock nearly everything desired, taking in exchange therefor all kinds of marketable produce, hides, furs, etc., at highest market prices. We extend a cordial invitation to all to call and examine our goods and prices.

Philomath, Benton County, Oregon.

Such has been the recent progress in our branch of industry that we are now able to affirm that the James Means' 3i Shoe is in every respect equal to the shoes which only a few years ago were retailed at eight or ten dollars. If you will try on a pair you will be convined that we do not exaggerate. Ours are the original 3i and 34 Shoes, and those who imitate our system of business are unable to compete with us in quality of factory products. In our lines we are the largest manufacturers in the United States.

One of our travelling salesmen who is now visiting the shoe recallers of the Pacific Coast and Rocky Mountain Region writes from there as follows:

"I are more than satisfied with the results of my trip. I have thus far succeeded in placing our full line in the lands of 'A No. I' dealers in every point I have visited." He goes on to say, "This is a splendid region for us to sell shoes in, because most of the retailers are charging their customers at retail about double the prices which the shoes have cost at wholesale. The consequence is that the people who wear shoes are paying six or seven dollars a pair for shoes which are not worth as much as our JAMES MEANS' 33 and 34 SHOES. Our shoes with their very low retail prices stamped on the soles of every pair are breaking down the high prices which have hitherto ruled in the retail markets here, and when a retailer puts a full line of goods in his stock they at once begin to go off like hot cakes, so great is the domand for them."

Now, kind reader, just stop and consider what the above signifies so far as you are concerned. It sources you that if you keep on buying shoes bearing no manufacturers' name or fixed retail price stamped on the soles, you cannot tell what you are getting and your retailer is probably making you pay double on the soles, you cannot tell what you are getting and your retailer is probably making you pay double on the soles have cost him. Now, can you afford to do this while we are protecting yon by stamping our name and the fixed reta
