THE NEW CENSUS .- The census has at list been completed. Chicago is now the second city in the Union. In 1880 she had bit 503,000 and Philadelphia 846,000. mly ten years shows Chicago with 1,098, 000, a gain of over half a million, while Philadelphia has 1 046,000, a gain of but 200,600. It looks now as though New York would soon be playing second fiddle to Chicago as well. In 1880 New York had 1,206,000 and now she has 1,513,000. or a gen of a little over 300,000. The south is also shown to be waking up. At lanta, with 34,000 in 1880 now has 65,500. nearly doubling her former population. Birmington, Ala., with less than 10,000 in 1880, now has 26,000. San Francisco's increase has been a little disappointing, but she has passed Cincinnati in the race in a handsome manner and is now 8th, pretty for behind Baltimore with her 433,000, The Atlas publishers will reap a harvest this year, as the consus statistics and new maps, etc., causes an immense boom in the business. We take the above figures from the Standard Atlas of the World, which will in all pro ability sell, by thousands, as Corvallis, Oregon, made an assignment for will in all pro ability sell, by thousands, as benefit of creditors to the undersigned, and it is one of the most complete and accurate works of the kind we have ever seen. It is safe to say the first agent in the field will fairly coin money, as we all want the new census statistics and the new feature in this Atlas which commends it to everybody. Cold and moisture combined have a torporizing effect upon the bodily organs, and the digestive and secretive processes are apt to be more tardily performed in winter than in the fall. The same is true, also, of the excretory functions. The bowels are often sluggish, and the pores of the skin throw off but little waste matter at this season. The system, therefore, requires opening up a little, and also purifying and regulating, and the salest, surest and most thorough tonic and alterative that can be used for these purposes is Hostetter's Stomach Bit-Persons who wish to escape the rhen matic twinges, the dyspeptic agonies, the painful disturbances of the bowels, the bilions attacks, and the nervous visitations, so common at this time of the year, will do well to reinforce their systems with this renowned vegetable stomachic and invigorant. It improves the appetite, strengthens the stomach, cheers the spirits, and renovates the whole physique.

> THE R. R. COMMISSION .- The railroad commission have recently been on a tour of inspection of railway lines of Western Oregon. The Salem Statesman says they recommended several new bridges on the east side line of the Southern Pacific road. The west side is in a fair condition, although the track and roadbed from St. Joe to Corvallis has not had much done to it since it was built twelve years ago. This is probably due to the fact that the travel over this line is generally not very heavy, there being only three trains a day. The Oregon Pacific was in a splendid condition, and It is well known that this company has the finest track, although crooked, in the state. The present law governing the railroad commission requires that it makes tours of inspection twice each year, and afterwards a report of each road for the respective managers, these reports to be included in the commission's biennial statement to the legisla-
