Serious Danger
Threatens every man, woman or child living in a region of country where fever and ague is prevalent, since the germs of malarial disease are inhaled from the air and are swallowed from the water of such a region. Medicinal safeguard is absolutely necessary to nullify this danger. As a means of fortifying and acclimating the system so as to be able to resist the malarial poison, Hostetter's Stomach Bitters is incomparably the best and most popular. Irregularities of the stomach, liver and bowels encourage malaria; but these are speedily rectified by the bitters. The functions of digestion and secretion are assisted by its use, and a vigorous as well as a regular condition of the system promoted by its use. Constipation and phlegm are thus deflected against the invasions of malaria by this matchless preventive, which is also a certain and thorough remedy in the worst cases of intermittent and remittent fever.

AMMONIA BAKING POWDERS MUST GO.
BAKING POWDER BILL PASSED BY THE MINNESOTA SENATE.

The recent newspaper discussion of the dangerous qualities of ammonia comes from the alarming increase of its use in baking powders. People who absorb it in small quantities from day to day suffer from slow ammonia poisoning. Taken internally in sufficient quantities it eats away the coating of the stomach and intestines and causes death. Slow ammonia poisoning produces various forms of stomach trouble.

Not one woman in ten thousand would use an ammonia baking powder if she knew it. Such powders not only undermine the health, but Ammonia imparts a sallow and blotched complexion.

Following is the bill recently passed by the Minnesota senate. It's the danger signal which the law throws out for the protection of the people:

A BILL FOR AN ACT TO REGULATE THE TRADE IN BAKING POWDER.

Section 1.—Any person who shall knowingly sell or procure the sale, or offer for sale of any package or can of Baking Powder, containing any Ammonia in it, not distinctly, legibly and durably branded, stamped or marked in a conspicuous place with the words in the English language "This Baking Powder contains Ammonia" in letters of great size, or any letters equivalent thereto in length, shall be guilty of a misdemeanor, and punished by a fine not less than \$20 nor more than \$50; shall be confined in the County Jail not less than ten nor more than twenty days or by both fine and imprisonment, at the discretion of the court.

Section 2.—The sale or offer for sale of the substance mentioned in the foregoing section in packages not stamped, marked, branded or labeled as therein required, shall be prima-facie evidence of knowledge of the character of said substance, on the part of the person so selling or offering for sale and his employer.

Section 3.—This Act shall be in force on and after its passage.

NOTE.—An incident occurred in the house when the senate bill came up for passage, in reference to an amendment proposed by Mr. Dimont. This was opposed by several members. Mr. Feig said that if the bill as it came from the senate was alright then the amendment was all wrong. The amendment compelling the printing of the word "Ammonia" on the label only affected only affected the Royal Baking Powder, and no wonder they felt the senate bill was a blow at them.

COLLEGE COLUMN.

The agricultural college has continued increasing attendance. Classifications have all been made, and the work moves on. The first year, section A, in English, is going over the hardest ground—the first month of brushing up the memory. Mind culture is the beautiful idea with the persistent, active student. It is almost useless to appear at a recitation without a well-learned lesson, and this class will realize the potency of this thought when the examination comes round.

That's a good class in political economy, but political economy is a strong subject for study. The country will need politicians with the rising generation just as it does now, but to be successful they will have to be mighty good ones. The progress of enlightenment among all classes is moving with momentous force at the present day.

The social Friday evening last was a very pleasant happening. Besides chocolate and sandwiches, a spelling match was engaged in, and this, too, was interesting.

The organization of the regular literary societies has been completed, and Friday evenings are the times of meeting. This is an important factor in college life, and no pains should be spared to make them interesting and stirred with enthusiasm.

The question of publishing a college paper has recently been agitated to some extent, but without apparent interest. It would be found that such an institution would meet with general public approval, if managed upon a proper basis, and there is no reason why it should not be established.

The new buildings in course of construction around the college are being pushed to completion and every convenience will be afforded this year.

Mr. Luther Benson, of Indianapolis, is expected to lecture in Corvallis on October 13th. He is the man on whom the mantle of John Gough seems to have fallen. W. P. Fishbrook, former law partner of President Harrison, says of him: "I have heard all the great apostles of temperance; Gough, Cary and Murphy and Luther Benson is second to none of them."

A Wonder Worker.
Mr. Frank Huffman, a young man of Burlington, Ohio, states that he had been under the care of two prominent physicians, and used their treatment until he was not able to get around. They pronounced his case to be Consumption and incurable. He was persuaded to try Dr. King's New Discovery for Consumption, Coughs and Colds and, as the time was not able to walk across the street without resting. He found, before he had used half of a dollar bottle, that he was much better; he continued to use it and is to-day enjoying good health. If you have any Throat, Lung or Chest trouble try it. We guarantee satisfaction. Trial bottles free at T. Graham's drug store.

FLAG RAISING DAY.—Friday, October 10th, is the flag raising day at the Corvallis public schools. The school children are now selling tickets, which represent the shares in the flag, the cost of which will be about \$10. Some prominent man is expected to make an appropriate speech on this occasion. This will be held on the evening of the first month at school. A programme of the exercises will be published later.

Pronounced Hopeless, Yet Saved.
From a letter written by Mrs. Ada E. Hurd, of Grotton, S. D., we quote: "Was taken with a bad cold which settled on my lungs, cough set in and finally terminated in Consumption. Four doctors gave up saying I could live but a short time. I gave myself up to my Saviour, determined if I could not stay with my friends on earth, I would meet my absent ones above. My husband was advised to get Dr. King's New Discovery for Consumption, Coughs and Colds. I gave it a trial, took in all eight bottles; he has cured me and thank God I am now a well and hearty woman." Trial bottles free at T. Graham's drug store; regular bottles 50c and \$1.
