

BRIEF LOCALS

The First National Bank, of Corvallis, Oregon.

Ladies' and children's haircutting a specialty at Taylor's.

Organs and pianos cleaned and repaired at J. W. Will's. Prompt attention to all orders.

How about that horse show this year. Is it not about time to begin preparations for it.

John A. Bacon, of Monroe, was recently appointed a notary public by Governor Penneyer.

W. A. Wells spent Sunday in Portland where his wife had been visiting for the week previous.

Now is the time to get your sewing machines and children's carriages repaired at J. W. Will's. All work warranted.

The picture of the College band is on exhibition at Mullis and Chases photograph gallery. They are a fine looking lot of boys.

The famous Fisk jubilee singers will appear at the opera house April 4th in one of their inimitable concerts. Reserved seats at T. Graham's.

Mrs. Williams will lecture on Shakespeare, on Monday evening March 28th at 7:30 o'clock in the agricultural college chapel. Come prompt.

No trace of the body of Isaac Stone, who was drowned Tuesday of last week, has yet been found, although a diligent search has been kept up.

Rev. Kantner, of Lafayette, who recently accepted the pastorate of the Congregational church of this city will move his family here the first of April.

If you contemplate building this summer call on A. F. Peterson, contractor and builder. He will prepare the plans and guarantee the best of work at reasonable prices.

The Hesperian lyceum will hold an open session at the agricultural college this Friday evening to which everybody is cordially invited, it being the first open session of this year.

Election is drawing closer and closer at hand. A. F. Peterson, to whom the county court awarded the contract of manufacturing the election booths, has already delivered a large number of booths at the court house.

Prof. and Mrs. H. T. French entertained the officers and faculty of the agricultural college last Saturday evening at their residence on college hill. A very pleasant evening was passed by all who were in attendance.

The class meeting held at the Congregational church every Sunday at 10 a. m. proves quite a success. Many of the brightest scholars of this city attend regularly. The discussions are very interesting and of much benefit.

Regular services at the Congregational church next Sunday. Rev. Kantner's subject in the morning will be "The Reality of Christian Experience" in the evening he will take for his subject "The Three who would not Bow."

The summer excursion season is rapidly approaching and with the advent of settled weather no doubt numerous excursions will be projected. At Salem the steamer Elwood will probably make a regular feature of Sunday excursions.

Mr. O. G. Hopkins, accountant O. D. Co. and secretary of Corvallis Cannery and Cold Storage Co., made a trip to the metropolis last Saturday. He reports Portland is lively and his black-eyed beauty in good health.

Now is the time of the year that a good system of sewerage would be appreciated by all of our citizens, except the doctors. Many doctor bills would be saved this spring if Corvallis possessed a good system of sewerage.

The Fisk jubilee singers, who are billed to give one of their concerts in this city April 4th, have performed here before and have established an enviable reputation for their entertainments. Seats may be reserved at T. Graham's.

Many of our citizens are availing themselves of the opportunity offered by the present fine weather and are cleaning up their yards and premises. For the sake of good health, this should be done before the warm weather sets in.

Captain J. J. Winant, the veteran captain of the bay, was in the city Tuesday and Wednesday of this week shaking hands with old timers. He speaks with regret of the schooner Mischief, which he says is now capturing seals under the British flag.

Monday evening, April 4, the original Fisk jubilee singers will give one of their concerts at the opera house in this city. This is the company that devoted over \$150,000 of its earnings to the building of Fisk university, Nashville, Tenn. Reserved seats may be had at T. Graham's.

According to the Newport Times, D. P. Blue, of Yaquina, has recently planted near Yaquina, in this county, 5,000 Italian, 1,000 French and 1,000 Silver prunes, 1,000 pear, 1,000 cherry and 500 peach trees. Fruit raising will some day form the principal industry of Oregon and this gentleman is taking the proper steps to secure the cream of the industry.

In the Ingram murder case, in which Frank Ingram was charged with murdering his brother Henry, near Albany last October, the jury returned a verdict of guilty of murder in the second degree, the best penalty for which is imprisonment for life. The Ingram brothers had been in a dispute over the will of their deceased father, and it was over this that the crime was committed. The trial occupied three days.

Many of our horsemen were in the height of their glory last Tuesday. A horse buyer was in Corvallis purchasing horses for shipment. A large number of stockmen from all parts of the county were in the city with horseflesh to dispose of. A fine lot of horses were brought in and we doubt if any other county in the state can produce a finer lot of animals than Benton county when she tries.

The annual meeting of the stockholders of the Bellfontain fruit growers association will be held next Monday afternoon at the office of E. Holgate. The company have set out over 100 acres in fruit this season and have about 400 acres more land they expect to plant during the next two or three years. In time they will have one of the finest fruit orchards in the state.

Last Monday the Oregon Pacific Railroad Co.'s agency at this city was transferred from Mr. J. D. Brown to W. R. Harrison. Mr. Harrison is an old employee of this company, and hails from Yaquina, where he held the position of operator and freight clerk for the last four years. He is unmarried and of unimpeachable character. His hopes are to be transferred to Yaquina soon again. Certain attractions must be the cause.

DELINQUENT TAXES.—The allotted thirty days since the sheriff visited the various precincts to collect the taxes have passed and yet only a trifling over twenty thousand dollars are paid, leaving about seventy thousand dollars still due, to which will be added the usual penalty and mileage for sheriff, as provided by law. The taxpayers seem to be unusually slow this year about paying up, and consequently will be more out of pocket than if they had been prompt.

The Albany Democrat has the following to say about Carl Karr, our boot and shoe man: Mr. Carl Karr, the Corvallis wholesale boot and shoe man, was in the city today receiving orders for his goods. Mr. Karr was contemplating locating at both Crawfordville and Brownsville, but finally decided to start his factory at Corvallis. His samples show some well made foot wear at prices that will permit him to compete with the best eastern trade.

SOLD AN INTEREST.—Last Tuesday Geo. E. Fish sold one-half interest in his stove and tin store to C. A. Murphy. The firm in the future will be known as Fish and Murphy. Mr. Murphy is a Salem boy and a competent plumber by trade, is an up-right, moral young man and would be a good catch for some of our Corvallis young ladies to "fish" for this leap year. (This is on the quiet.) The new firm starts out with good prospects for a fair share of the future business, and besides their line of stoves and tinware they will make a specialty of plumbing in all its branches.

The Harvard Club of the northwest announces that examinations for admission to the freshman class of Harvard college, to the Lawrence scientific school and to the Harvard law, medical and veterinary schools, will be held in the chapel of the Unitarian church, Portland, June 28th and 30th, and July 1st and 2nd. Candidates should send their names to the secretary of Harvard university in time for him to receive them by June 10th. Further information may be obtained from the secretary of Harvard university, Cambridge, Mass., or from Earl M. Wilbur, 225 Fifth street, Portland, Oregon.

The Behring sea business is getting serious according to late dispatches. Lord Salisbury's note refusing to consent to a renewal of the modus vivendi and making a counter proposition has not met the approval of the president and United States senate. President Harrison insists on a renouveau of the modus vivendi without reference to insignificant or irrelevant conditions, and closes with the stirring assertion that if Great Britain declines to assist in protecting the seals during arbitration he will proceed to enforce the laws and exclude poachers from Behring sea, if the military force of the United States is required to accomplish it. The note created a sensation in the senate.

AN ARMORY.—Captain Warren, who has charge of the military department of the state agricultural college, is of the opinion that one of the worst needs of that institution at the present time is an armory of sufficient size to give the students a thorough training in military tactics and athletic exercises. He would as an inducement to the student to become thoroughly interested in his work suggest that at the end of the year the governor issue a commission to the three students having the best record and making the best showing. As it is at present drill has to be conducted on the college campus and during the rainy season it is impractical to drill the boys as they should be.

GRAND OPENING.—Last Wednesday was opening day at Stock's cash store, when the mammoth new stock of goods just received from San Francisco was for the first time exhibited to the eyes of the people of Corvallis, and the store was crowded all that day and evening. The goods were tastefully displayed in the windows, on the counters and in all other places where ingenuity and good taste could direct. In the evening another attraction was added. On one side of the store, on a large platform, the Marine band was stationed and during the entire evening a delightful stream of melody was pouring from their instruments. Perhaps the best number of the musical programme—which was all so good that it is difficult to say that one number was better than another—was an overture, "Fliesende Quelle." Stock's opening was an unqualified success.

THE FIRST TRIP.—A correspondent from Corvallis writes to the Statesman as follows: "As there is considerable interest taken in the steamer R. C. Young on the upper river, I will give a short history of the first trip from Corvallis to Harrisburg. The river was about three and a half feet above low water mark. We found plenty of water until we got above Peoria. Between there and Harrisburg there are several shoal bars, owing to the water running out through sloughs. Whenever the water is confined in one channel there is plenty of water for any of the upper river boats. A few thousand dollars spent in damming the sloughs and removing snags would allow boats the size of the Young to take a full load from Harrisburg to Corvallis on any stage of water that the larger boats can reach Corvallis. As it is the Young is bringing down thirty-five to fifty tons at a trip. In speaking of the accident to the Young's wheel, Captain Dove says it isn't necessary to go out on the land to find a stump to bump the wheel against; there are plenty right in the channel. She was only laid up for repairs one day."

TO CONSIDER APPLICATIONS.—The Executive Board of the agricultural college, consisting of Messrs. Nash, Shipley, Hayes, Weatherford and person, and the State Board of Education consisting of Gov. Penneyer, Secretary of State Geo. W. McBride, and State School Superintendent E. B. McElroy will meet at Salem next Monday to consider all applications for the place recently made vacant by the death of the late B. L. Arnold, president of the state agricultural college. It is understood that there are already twenty two applications for the position, among whom are some of the best educators of our country.

PROHIBITION MEETING.—The Christian church was filled to overflowing with an audience last Monday night to hear Mr. Wolfenbarger, of Nebraska, discuss prohibition as a party issue. Leaflets were handed around and Prof. Jenkins, who is a fine singer led the audience in a number of songs. He also sang several songs which were loudly applauded. After prayer by Rev. L. I. Mercer, the chairman, Mr. J. C. Hutton introduced Mr. Wolfenbarger. While we do not agree with him in many of the ideas advanced we must admit that he is a very forcible speaker and held the audience from first to last. A prohibition club was organized with a number of members and about fifty altogether have signed the million voters pledge. It seems to us rather odd of place to pass the hat after a political speaking. The drumming for subscriptions saved too much of the method used at some religious meetings. In this case the effect of the speech was largely dissipated by it.

FELL FROM THE BRIDGE.—Wm. Telly, an old man who lives in this county, a short distance from Albany, was found a few days since lying beneath the trestle of the Oregon Pacific railroad bridge, where he had fallen some time during the previous night. It was found that he was not badly hurt, but was in a drunken stupor. He had gone to Albany the day before, taking with him two sacks of greens, which he exchanged for liquor. He was evidently pretty well loaded when he started home some time in the night. Being intoxicated he fell from the trestle, a distance of about 30 feet, and landed in the water. He was not seriously hurt. He had a black eye and was bruised considerably, but no bones were broken.

DIED.

BRINKLEY.—At her home on Soap Creek, about ten miles north of this city, on Tuesday, March 22, 1922, Mrs. Henry Brinkley, aged about 87 years, died. Mrs. Brinkley, the deceased, was well known and had many friends in this city. She was born in Benton county, where she spent the greater portion of her life. She was a daughter of John Wiles, a prominent farmer living in the northern part of the county, and sister of Walter T. Wiles and Mrs. W. A. Walls, of this city. She leaves a husband and a large family of children, who have the sympathy of the community in their bereavement. The funeral services conducted by Rev. E. J. Thompson took place at the family residence Thursday afternoon and the remains were laid to rest in the Locke cemetery.

FISH! FISH!! FISHING TACKLE! it has arrived, including the largest assortment of fine rods ever displayed in Corvallis to be opened soon at J. Wm. Will's store.

Ammonia and Alum Officially Condemned.

INDIANAPOLIS IN THE WAKE OF OTHER CITIES.

Dr. Price's Cream Baking Powder is Pure.

IT CONTAINS NO DELETERIOUS INGREDIENTS.

(See Report of Indianapolis Board of Health, on Baking Powder November 4, 1901.)

AMMONIA AND ALUM NOT FITTED FOR FOOD.

Dr. Latz chemist to the Board of Health, who made the investigation of the Baking Powders on the market, at the request of the Board says: "Physiologists of high standing consider Ammonia and Alum deleterious substances unfitted for use in food."

These are the brands condemned by the Board of Health: Royal, Climax, Atlantic and Pacific, Keaton, Crown, Sea Foam, Bon Bon, Early Rising, Queen, Regal, Ruckelhaus, Forest City, Calumet.

Dr. Latz, City Chemist also says: "Dr. Price's Baking Powder, contains only such ingredients as a Pure Baking Powder ought to be composed of and I recommend the same to every housekeeper as pure, wholesome and effective."

(Signed)

PETER LATZ, City Chemist.

THE PACIFIC NORTHWEST.

A GREAT FRUIT REGION—A GLIMPSE OF THE FUTURE.

The Pacific Northwest includes for our purpose, treating it as a region for the growth of fruit, a scope of territory that fully equals in area and natural resources some of the great empires of Europe to-day, and that must in time not distant be occupied in the cultivation of its rich soils and the development of its great and as yet undeveloped resources.

The Columbia river and its mighty tributaries drain this vast territory, and only with the past decade have facilities for transportation come to assist development and make possible the era of progress and improvement only now commencing, that must go on and work out a destiny equal to that of any portion of the North American continent. Fifty years ago the tide of immigration had not set towards the Pacific, and exploring parties were fitted out to investigate and report to the nation. The greatest minds in our nation at that time had very little conception of the value of Oregon, which included then all the American interests on the Pacific ocean. When Dr. Marcus Whitman tried to make Daniel Webster comprehend what Oregon might be in 1843, that great statesman refused to believe that the destinies of the nation could extend thus far, and it was entirely due to the efforts of the Oregon pioneers that the empire borders the Pacific for 1,500 miles as it does to-day.

What we are to-day here in the Occident, compared to the isolation and wilderness of 1842, bears about the same relation to the future of half a century of progress that is to come, that the date given here to our own day, for, as the mind of Webster could not grasp the facts and progress many of us have witnessed and aided to accomplish, so the mind of to-day may fail to grasp a true idea of what the Pacific Northwest may become when another half century shall have wrought its changes.

West of the Rocky mountains there is to-day about the same population as occupied the Atlantic seaboard in 1776, when the colonies asserted their independence. Looking back on the pages of history, we see rapidly culminating events and wonderful progress that leave all the old times behind. In all the arts of war and peace the world has made wonderful progress since the first immigration came to Oregon in 1842. There is no reason to doubt that the invention and skill will unlock nature's secrets and furnish similar progress in the half century to come.

It is true that we possess here soil of unequalled fertility and a climate that is unequalled on this earth. As to resources, a portion of the Pacific coast equals in wealth of soil, of forests and minerals what are found in this region. When development shall reach maturity and population shall be apportioned to resources, then this Northwest of the Pacific will hold the scepter and dominate this western world. The thousands of water powers that come from our mountain ranges, the mines of iron, coal, copper, and immense forests form a means of wealth, prosperity and success equal to anything the world can grant to any people.

Only yesterday, as it were, the Iuland Empire was but a stock range, and Western Oregon and Washington were scarcely peopled and had no foreign commerce. It is not the same world we knew ten years ago, and ten years from now we cannot recognize it again. Within a few years the whole Pacific region has become more or less a land of orchards, producing semi-tropical fruits and those of northern zones, and it is only lately discovered that our fruit lands equal in richness of soil and production the most productive soils of California.

Ten years ago this industry was almost unknown, and the value of our fruit lands was not understood. Enough is known as the result of experience already had to show that we have a future in fruit-growing equal to that of any section in the world. In the future development of our section, this great resource will become an important element. The man who fears there will be no market for coming products simply fails to realize what time has in store for us.

Before many years can pass, every known industry will be successfully employed among us. Great cities will grow to encourage human labor. Development will convert our mines and forests into avail-

able resources, and will cause the product of our soil to increase to supply a home demand for coming millions, as well as to supply the world at large with our fruits as well as cereals. Commerce with Asia and the islands will supply a market, and the Nicaragua canal will make it possible to reach Europe at a reasonable cost.

Of course, all land is not adapted to fruit, and the need of selecting suitable locations is manifest, but throughout the great empire of the North Pacific there are locations and sections where fruit-growing must become a favorite occupation, and where enterprise and intelligent industry will find a rich reward. We shall show in course of time, the different sections of this great region and try to give some facts concerning each, to furnish an accurate idea of possibilities everywhere.

It seems as if nature has been chary of her gifts to many sections of earth and has limited the production of choice fruits in the greatest profusion and excellence to a few favored sections. If we, then, possess superior advantages of soil and climate for the growth of fruits of this latitude in the greatest excellence and with the most certain results, there can be no question that fruit growing on a large scale will enter into our future and become a means of income and wealth for all time.

We can fully believe that ten years from to-day, with the improvement sure to occur in commerce and transportation, Oregon and Washington will ship millions of dollars worth of choice fruits to the markets of the world, and the introduction of these products abroad will show the world their superior quality as to texture and character and will insure a demand that will create a reliable market.

The future has things in store for us if we only have the enterprise to deserve them.—Fruits and Flowers.

Services at the Presbyterian church as usual next Sabbath. In the evening the Society of Christian Endeavor will hold a service of praise in the church at 7:30. Music, recitations and short addresses will be the programme. A cordial welcome to all.

TO DESTROY SLUGS.

A number of our friends have complained that their plants are being damaged by slugs or snails. Prof. Washburn, entomologist of the state experiment station, sends us for publication the following remedy. He says these pests feed at night and during the day remain concealed under rubbish, stones, old wood, etc., and he recommends the following:

First, spread fresh wool ashes on the ground around the plants infested. Second, do the same with a mixture of fresh wood ashes and fresh slacked lime. Third, dust Paris green over the plants and on the ground about the plants. This should not be used on vegetables or anything which is to be eaten. Fourth, place fresh cabbage leaves on the ground among the plants infested, and leave them over night. The slugs will feed upon them and hide beneath them, many of them, and can be found there in the morning and killed. It would help probably to poison these leaves by dusting Paris green over them thickly. Fifth, punch holes with perpendicular diameters, six inches deep and two inches in diameter, plentifully, in the ground among plants infested, if they are out of doors. Many slugs will fall into these holes during the night and, being unable to get out, will be found there the next morning and killed. The eggs of this pest can be found in large numbers now and later, in moist earth, under old boards, in and, etc. They are clear whitish or yellowish and in bunches of six or ten or more. They should be destroyed whenever found by crushing. Yours truly, F. L. WASHBURN.

BOARD OF IMMIGRATION.—Secretary Masten, of the board of immigration, in Portland, reports business to be on the increase and that he is becoming pressed with work. The results which are being accomplished by the advertising car, "Oregon on Wheels," are beginning to make themselves apparent, judging by the amount of inquiries which come pouring in from those sections of the country which the car has passed through. The car is somewhere in the western part of Pennsylvania, and, as a consequence, many letters have been received from that state asking for additional information. The amount of mail received is increasing daily. For the last month the greater amount of letters have come from Ohio, showing that many people are not satisfied with the state and wish to come further westward.

PRODUCE PRICE CURRENT.

Corrected every Thursday.
Wheat, per cental in Portland.....\$1.24 to \$1.55
Wheat, per bushel in Corvallis.....82
Flour, per barrel.....5.00 to 5.25
