The horticultural department will soon begin experiments to determine the amount of pollen produced by each variety of fruit such as apples, pears and plums. This will be a great benefit; to all fruit growers for they will thereby be guided in planting their trees so as to use varieties that are pollen producers. Experiments are also being made with Italian prones. The great rendered charming music for the skaters difficulty in producing these is that they drop off the trees before ripe. It has been found that this is due to a lack of fertilization and therefore extended tests in fertili zation and cross fertilization are being made. The results of all these tests will duly appear in the college bulletins.

The short course has at present an rollment of fifteen persons. The work is very interesting and all seem well pleased with it. It is desirable to increase the attendance of these classes and every one wishing to become a member will be welcome. Remember that tuition is free.

The city has reached the constitutional limit of taxation, and son who shoots dogs under such circum. how to reduce expenditures or increase receipts is the question. It has been suggested that a small toll be placed on the bridge at Albany connecting Linnfand Benton counties. Respecting this matter the Herald says:

Viewing this proposition carefully it does not seem to be a wise course for the city to pursue, even if it could legally do so. The bridge was built with the understanding that it should be a free bridge. Citizens across the river in Benton county subscribed money for it with that understanding, and the cityl was granted the right by the Orogon legislature through its amended charter2to! build a free bridge. Whether or not the city could now collect tolls upon it would probably involve much legal controversy. But aside from the legal aspect of the smatter the Herald does not believe it would result beneficially to the city to attempt such; a course. In the first ten-cent admission fee will be charged to place a small toll only could be collected; one or more trusted men would have to be employed on the bridge to collect it; men who subscribed to the bridge fund would not willingly pay toll, and if they were excused, it would so greatly lessen the proposed toll, which is to be small anyway, that it is doubtful if the city would realize much profit out of it. Then again the city should endeavor to encourage and invite trade rather than drive it away. If such a proposition had been offered when the bridge question was up originally, a small toll could no doubt have been placed upon it without much opposition, but now the people across the river in Benton county, who naturally prefer to trade in Albany, are already up in arms over the matter, and would oppose it to the bitter end.

PRUNES FOR HOGS.

Mr. C. E. Hoskins, of Springbrook, has made an interesting experiment this year with feeding prunes to hogs. When grading his prunes before drying, all prunes which passed through the 7-inch opening (prunes which would ruu from 120 to 140 per pound when dried) were placed on the trays just as they came from the grader and dried without cleaning and and dipping. These he used to feed hogs with and SIMPSON.—In Philadelphia, Jan. 16, 1894, found the results very satisfactory. The hogs did remarkably well on their prune diet and the pork was of unusually good company recognizes the loss of a member of flavor, as might be expected. Mr. Hoskins expresses the opinion that every prune grower should make a note of this and try the experiment next fall. No prunes of the size mentioned ought to be sent to market from Oregon under any circumstance, and if. as his experience this last year indicates. they have special value as hog feed they should be utilized for that purpose. The knowledge of such a fact would also be of value in case there should at any time be such a depression in the price of pranes as there is in the price of wheat at this time. Oregon hogs raised on clover and milk, and finished off with prunes, ought to give a product rivaling in quality the famous

Later on and in the presence of Wm. G. Steel, Esq., o Portland, Oregon, who has ever advocated a reasonable reserve, I prevailed upon Secretary Noble to reduce the reserve so a to merely include Mt. Hood and Crate lake and the surroundings, pending legislative action in Oregon, and I stated to the secretary that unless this was done we feared that gigantic land grabbing by specu lators would result. The secretary directed that new maps and a modified proclamation should be prepared, but this action was too late for executive action. In this administration I found the same persistent influence at work to secure the withdrawal of the entire range. I personally and repeatedly protested, and asked that the reserve be diminished as above suggested, and in addition to the reasons given, I stated that valuable mineral lands would be withdrawn. I favor a forest reserve on the Crecade range and elsewhere before it is too late. The reasons are apparent. But there should be a careful segregation of that which is forest by examination and survey in the field and when made not an acre should be sold.
