Flown and Captured.

The first news of the week was the intelligence that Ed Scott and George Hall, who are boarding with Sheriff Osburn until the fall term of court...

A charge of burglary, had escaped from their boarding hall, and were making rapid strides for the country.

Dr. Farra and D. Z. Irvin, who saw the culprits escape, immediately gave the alarm and in a short time Sheriff Osburn and a posse of deputies were in hot pursuit.

They were captured in a wheat field about six miles southwest of town and are again back enjoying the hospitality of the Benton county jail.

Their exit was effected by cutting away a portion of the arched door at the entrance to the jail with a pocket knife.

This work had been quite tedious and according to Scott's story the three days immediately prior to the escape had been devoted diligently to the task.

A Successful School.

If the closing exercises of school district No. 93 be taken as a criterion of the work accomplished by the scholars during the past three months, the directors certainly made no mistake in the selection of Professor George Denman as instructor. The program consisted of songs, recitations, dialogues and readings by the scholars in the rendition of which all acquitted themselves creditably and several individual efforts were exceptionally well given.

The New Wheat Pest.

The new wheat pest, first reported a few days ago from Roseburg, has been also reported to Prof. Washburn, entomologist at the experiment station, by observers at Salem, Grant's Pass, Elk Head, Douglas county, Eugene, Albany, and Harrisburg. Concerning it Prof. Washburn makes the following statement: 'The insect referred to is the grain aphid (Aphis avenae), which has at times been so destructive in the Eastern states. It may become equally destructive here though the minute parasites which are at work on it will possibly keep it in check.'

'No really practicable remedy can be applied while the wheat is standing. It is true kerosene emulsion will kill the aphid, but for various reasons this treatment is hardly to be considered where the acreage is large. As soon as the wheat or other grain is harvested, burn the stubble and all straw, weeds, litter and waste on or about the field. If the grain is not worth harvesting and is not too green, it should be burned while standing. The presence of fences is against this procedure but it is the best, in fact the only remedy known to entomologists.'

There will be a strawberry festival at the Blodgett schoolhouse next Saturday evening. Mr. and Mrs. W. A. Collier, of Corvallis are residing with the family of Mr. W. A. Gellatly.
