Matters of Interest Pertaining to Improvements and Future O. C. & E. Plans.

The Oregon Central & Eastern people are contemplating immediate extensive improvements. Orders are already in for 750,000 feet of lumber, besides a great number of ties. This will keep all the mills on the line busy for some time running at their fullest capacity.

When a GAZETTE representative called at the office the other day, looking for an item, Manager Stone had just finished writing Mr. Hammond a detailed statement of the conditions and prospects. He enthusiastically favors the beginning of work at once on the extension to Independence prairie, which would add greatly to the business of the road.

Mr. Stone is confident that the people of Crook county would build a wagon road to the end of track immediately, and has so written Mr. Hammond. The importance of beginning the work at an early date is pointed out in order that the road may be in a position to handle next season's wool crop.

J. B. Walker has returned to America, and is now in New York. He writes from there to relatives in this city that he has employment with the well known firm of Mann & Co., publishers of the Scientific American.

P., with a view to securing more favorable tariff arrangements, but the latter gentleman wished to defer the matter until the then pending litigation was settled.

VACATION JOTTINGS.

Sounds from the Sea. A Dash of Spray Fresh from Old Ocean.

"Better late than never" is a very convenient, if not consistent, old adage. My intention has been to write a few notes to your many readers, long ere this, but when a minister goes away to rest and recuperate, the pressure of inactivity and indolence often prevent much correspondence, and his pen is almost forgotten.

Once more for a few weeks we have been sojourning at our Ocean View cottage, a little south of the famous Nye Creek. There are very few changes at Newport, and its surroundings, except here and there a new cottage and an improved sidewalk.

The weather has been so cold of late, that almost all of the bathers, as they emerge from the water, have the appearance of the poor child after his mother had given it a severe spanking. In another direction there is a sweet family picture.

Far away the sobbing sea sweeps the horizon, while the unfettered waters sink and swell, flow and flash in the sun's warm rays. Then some shouts "There goes the ship!" and we think of the ship in the offing, whether bound and how laden.

There are ships that went to sea many, many years ago. They have not come back to me, but are sailing to and fro. They remind me of the gulls, flying low, flying low.

Their sails shall ne'er again be furled In this fitful, fleeting world; They have reached the peaceful shore, Where the billows chafe no more, And they dwell within the shadow of the throne evermore.

Oh, the mind as well as the body gains rest and health and vigor amid such scenes and in such air as one breathes on this shore at Nye beach. It makes living a luxury and existence a delight.

Tom Moore, while in one of his poetic flights, tells us that the broken, vast retains the scent of the roses that once adorned its chafed lip. So in like manner the tourist carries the ozone of the ocean beach with him to places far remote.

Oh, the mind as well as the body gains rest and health and vigor amid such scenes and in such air as one breathes on this shore at Nye beach. It makes living a luxury and existence a delight.

SURROUNDED BY MYSTERY! A Great Mistake.

A recent discovery is that headachy dizziness, dullness, confusion of the mind, etc., are due to derangement of the nerve centers which supply the brain with nerve force; that indigestion, dyspepsia, neuralgia, wind in stomach, etc., arise from the derangement of the nerve centers supplying these organs with nerve fluid or force. This is likewise true of many diseases of the heart and lungs. The nerve system is like a telegraph system, and will be seen by the accompanying cut, The little white lines are the nerves which convey the nerve force from the nerve centers to every part of the body, just as the electric current is conveyed along the telegraph wires to every station, large or small. Ordinary physicians fail to regard this fact. Instead of treating the nerve centers for the cause of the disorders arising therefrom they try to act on the part affected.

Franklin Miles, M. D., L. B., the specialist and author of many noted treatises on the latter subject, long since realized the truth of the first statement, and his Restorative Nerve is prepared on that principle. Its success in curing all diseases arising from derangement of the nervous system is wonderful, as the thousands of unsolicited testimonials in possession of the company manufacturing the remedy amply prove.

Dr. Miles' Restorative Nerve is a reliable remedy for all nervous diseases, such as headachy, nervous debility, prostration, sleeplessness, dizziness, hysteria, sexual debility, St. Vitus' dance, epilepsy, etc. It is sold by all druggists on a positive guarantee or sold direct by the Dr. Miles Medical Co., Elkhart, Ind., on receipt of price, \$1 per bottle, six bottles for \$5, express prepaid. Restorative Nerve positively contains no opiates or dangerous drugs.
