He Found the Mother Lode, and Many People Are Rushing in to Seoure Claims.

Portland, Or., Aug. 7 .- F. Wood-Co., and likewise an experienced prospector, has just returned from Stevencaused excitement. Six months ago, will have to step down and out. Timothy Sullivan, an old prospector, who has lived in Portland off and on traces of color from the Vancouver side, at last stumbled upon the muchsought-for mother lode that the prosto locate ever since it was found that the places at the headwaters of the Washougal river would not pay.

of course could not keep his discovery to himself. The news quickly spread creek which rises at the foot of Look. majority for Orr of fifteen votes. out mountain and makes its way down to the town of Stevenson, fifteen miles south on the Columbia river. Reports flurry of excitement in the little country town, and in less than a week's a stretch of ten or twelve miles there

for the foregoing, said yesterday to a any track being made.

this will prove a rich find. I had been and broke the track record. The second over that country, about four years ago and third heats, in 2:04%, where conprospecting, and, as soon as I heard of sidered phenomenal, but the crowd was Sullivan's discovery, I took a lay off not prepared for the great surprise from my engine and went over to see when the fastest fourth heat ever paced what there was in it. When I got to or trotted, was made, the time being Stevenson I found every one there wild 2:0234. with excitement, and hundreds of stories about the mines going the rounds; but I paid no attention to these and made up my mind that the Admission of Negroes to Creek Nation best thing to do would be to go out to the mines without delay.

"I pushed on up Rock creek to the ber of claims staked out and I hurriedbrought in and followed right up to the assayer's office, so that there could be no salting. I just received a report from the assayer this morning, in which he says the rock assays about \$4 a ton. This is regarded as being pretty good for croppings, as I took it just as it came, and the ore is sure to improve further down. It is free milling ore, too, and easily worked, and wood and water are handy to develop the claims. As there are more than 150 square miles in that tract, you can see that the supply of ore is practically inexhaustible

PAID THE PENALTY.

Ravishers Find Louisiana's Climate Very Unhealthy.

St. Joseph, La., Aug 7.-Some days ago a respectable white woman employed as a domestic in a prominent family on the border of Franklin parish, was sent across Tensas river on an errand, and failing to return in proper time, the family became alarmed and sent parties in search of her. The searching party, after several hours, fourd the dead and horribly mutilated body of the woman in the woods, partly concealed by brush. The most intense excitement followed the discovery and in a short time the whole section was aroused and in the saddle. Suspicion pointed to a white tramp who had been seen near there. Dogs were used and in a few hours the tramp was caught. He confessed he had ourtaged the woman and to cover up the crime had murdered her. The infuriated crowd Lound the brutal wretch, staked him to the nearest tree, and after burning his body and riddling it with bullets quietly dispersed.

A Plunge Ends All.

Portland, Or., Aug. 7.-Charles R. Howes, whose family resides at Tigardville, Washington county, committed suicide at 9 o'clock last night by plunging headlong into the river from the Morrison-street bridge.

Organizing a Military Company. Cleveland, O., Aug. 7 .- The Knights of Labor at a meeting last night took steps toward the organization of a military company. Letters were oreach to furnish a certain number of organize a regiment of about 700 members and drill them in military tactics.

Colored races never have blue eyes. Their eyes are always dark brown, brownish yellow or black.

Welcomed With Enthusiasm.

Buenos Ayres, Aug. 7. - The party of merchants from the United States now visiting this city today inspected the public buildings, banks, the exchange and other points of interest. The visitors were welcomed everywhere with great enthusiasm.

Bald Lowered a Record Grand Rapids, Mich., Aug. 7.-In the bicycle tournament today boune Bald lowered the third of a mile record, held by W. W. Hamilton from

Declared by Judge Pritchard to Have

ORR TACOMA'S MAYOR.

A Prospector's Discovery Stirs was today declared by Judge Pritchard to have been duly elected mayor of Tacoma, by a majority of fifteen votes, at the election held last spring. He will take his seat as mayor as soon as the ORE WILL BE EASILY WORKED judgment in the case is signed, unless a supersedeas bond is permitted to be filed, pending an appeal to the supreme

court. Judge Pritchard handed down his decision on the disputed ballots at 4:30 o'clock this afternoon. It covers of opnion in the provisional national twenty-five pages of typewritten manuworth, a fireman on the O. R. & N. script, and deals exhaustively with the call a convention and nominate another

A. V. Fawcett, who was, after the and Southern members opposed a third son, Skamania county. Washington, official canvass, declared elected by a ticket, but when they were told in the where the recent gold discoveries in majority of two over Orr, the previous Middle States party fealty was so rethe vicinity of Lookout mountain have mayor, and candidate for re-election,

The contest case has been on trial two weeks. It was at its commence. South were withdrawn, and the decifor many years, while following up ment that it was discovered that the sion to hold a convention was unanivote of four precincts, that gave ma- mous. jorities for Orr, had been stolen from the city vaults. The court, however, pectors in that section have been trying went ahead with the count of the other ballots, taking the figures of the missing ballots from the returns.

The undisputed ballots gave Orr After staking out claims on several 2,620 and Fawcett 2,590 votes, includof the supposedly rich leads, Sullivan ing the four stolen precincts, the official made his way down to Stevenson, and returns of which were counted. Four disputed votes which were counted for Orr, gave him a total of 2,624, and that an immense gold field had been nineteen disputed votes, counted for discovered at the headwaters of Rock Fawcett, gave him a total of 2,609, a

Columbus, O., Aug. 10.-Robert J. time dozens of parties were on their again demonstrated today that he is way to the new Cripple Creek. The the greatest paper ever harnessed to a gold fields, it is estimated, run fifteen sulky. Frank Agan was the favorite miles up the mountain side and within in the free-for-all pace, and, relying upon his remarkable performances at is any number of leads. When Mr. Cleveland, nearly every horseman on Woodworth left, a week ago, there the track backed him to win Previous were already between fifty and one to the second heat of the great race, hundred claims staked out, not a few Robert J. had few backers in this town of them by Portland parties; while on outside of Hamlin and the attaches of his way into Stevenson he passed at the Village Farm stables. When least fifty men on their way to the Robert J. took the second heat, howfields. There are immense quantities ever, he became a hot favorite. It was of ore, according to Mr. Woodworth, evident from the first that Robert J. the supply being practically inexhaust- was to be driven to win, and the fact ible, and as Rock creek affords plenty | that Agan was so heavily backed made of water power and the country is it certain the rape would be hotly conbeavily timbered, the mines ought not tested. And so it was. It was the to require a great amount of capital for greatest race of the year, the fastest four consecutive heats and the greatest Mr. Woodworth, who is authority fourth heat ever paced or trotted on

In the first heat, paced in 2:0834, There is no doubt in my mind that Agan lowered his record half a second,

NO LONGER CITIZENS.

Perry, O. T., Aug. 10.-The final derose has been promulgated from gold fields, which are about fifteen Okmulgee, capital of the Creek nation. miles north, and got there that after. as it had been handed down by Judge noon. There was already a great num. Adams, chief justice of the supreme court of the nation, in the citizenship ly selected a couple of locations and case. It strikes from the rolls of citithen gathered some of the float, which | zenship of the nation the names of over

The decision held that the action of the emancipation act by the United States, in admitting the negroes to tribal relations, was unconstitutional, and, therefore, at this time invalid. Since the passage of the act these negroes have drawn in annuities \$1,000. 000 from the Creek government, and have improved their farms, and have educated their children at the nation's expense for twenty years. From the

decision of the court there is no appeal. The interior department has held to the same opinion in a similar case. The Dawes commission, which has been appealed to by the deposed negroes, claims it has no right to interfere with the decision of the Indian court.

BOOKS IN A MUDDLE.

Expert Report of Ex-Treasurer Minto's Accounts.

Salem, Or., Aug. 10. -The report of the expert committee, appointed to ascertain the ex-treasurer's standing with the county, which was given out by the county court today, corroborated the information before published and showed that besides the \$1,577 held back in the First National bank, there was \$741.45 wholly unaccounted for. The experts further said the accounts were so badly confused and the methods so poorly adapted to the requirements that the office books would have to be rewritten for the period of the treasurer's incumbency. The treasurer's receipts for the special school fund and taxes, amounting to \$79,817, were not entered on the book of receipts and disbursements, nor was the by Minto was \$349,378.

NEW NAME IN HISTORY.

National Democratic Party Born Into the World of Politics.

Indianapolis, Ind., Aug. 10.-The name of the new party is the National Democratic party. The national convention of the party will be held at Indianapolis the first week in September

There was unanimity in the conference in the selection of the name of the National Democratic party and in determining to distinguish the two parties by referring to those supporting the Chicago platform as the Populist-Democratic party. There was no difference committee, at which it was decided to national ticket. Some of the Eastern garded that many Democrats would not vote unless there was a third ticket, then all objections from the East and

Astoria Gambling-House Keepers Object to Unequal "Fines."

Astoria, Or., Aug. 10.—There is a immunity from police interference. For the past two years, each house in which games of chance, such as 'craps," roulette, faro and the like, are conducted has paid the city monthly the sum of \$50, but since the opening here of a large saloon and sporting house, those of the gamblers who have only sufficient money to make a showing in a single bank-roll have become dissatisfied, because of the fact that the more wealthy of their class run as high as five or six games and they pay no more for the privilege than do those who conduct a single "crap" table. It is likely that at the next meeting of the city council steps will be taken to have the matter adjusted in an equitable

ney, in his annual trade circular, just ed, says:

on the Columbia river. Confronted with a strike at the opening of the season, and with but few fish packed until June 24, it seemed at that time that the output would of necessity fall far short of that of any preceding year since 1877. The abnormally heavy runs of salmon, however, and the prodigious efforts of canners to recover the losses sustained during the strike have resulted in a pack aggregating 75 per cent of that for 1895. Throughout the year salmon have been unusually large, and in color, firmness of flesh and quantity of oil excelled those caught at corresponding periods in any former season. A noteworthy feature of the year's business was the large proportion of chinook salmon, the pack of this variety representing a much larger percentage than usual of the entire out-

MATTERS OF INTEREST TO FARM-ER AND HOUSEWIFE.

Creameries Do Not Make So Large Proportion of the Butter Used as Many Suppose-One Reason Why Wheat Is Cheap-Farm Notes.

Farm and Factory Butter. The idea is generally prevalent that the amount of butter which has of late years been made by individual dairymen was insignificant as compared with the output of creameries and butter factories, but figures given in "Statistics of the Dairy," by Henry E. Alvord, chief of the dairy division, shows this belief to have had no foundation in fact, up to 1890.

While the increase in population from 1850 to 1890 was about 170 per cent., the production of butter for the census year of 1890 exceeded that of 1850 by 284 per cent. This increase was not uniform with either population WHAT WILL THE "EQUITY" BE? or butter production, but quite the contrary, as may be seen by the following figures:

BUTTER.

ingly send forth false information nor base an official statement on mere guesswork, and being in a position to know whereof he speaks, his figures may be relied upon as correctly representing the situation. But it will be a genuine surprise to nearly all who have given the matter a thought to learn that 85 per cent. of all butter produced in this country was, as late as 1800, made on the farm. Here is Astoria, Or., Aug. 10 .- M. J. Kin- what he has to say on the subject:

"The most noteworthy fact in connection with the production of butter The season just about to close has on farms is that, nothwithstanding the been one of the most remarkable in the great extension of the creamery syshistory of the salmon canning industry tem and the decline in the amount of butter annually exported, such production has increased even more rapidly than population. To go back to the census of 1850, it is found that the 'otal production of butter on farms in 349 was 313,345,596 pounds, or 13,51 pounds per capita of population. In 1860 the amount reported was 459,-681,372 pounds, or 14.62 pounds per capita. In 1870 the amount reported was 514,092,683 pounds, which gave an average of only 13.33 pounds for each inhabitant. Up to this time there had been no creamery butter reported. but in 1880 the production of farm butter averaged 15.50 pounds for each inhabitant, and that of creamery butter 0.58 pounds for each inhabitant, the At the eleventh census, however, the averaged 16.33 pounds per capita of Boston, Aug. 10.—The nude bronze increase that the total production of heats. Drying Wheat for Seed. There is often an injury to winter wheat seed from heating after the grain represents a girl laughing as she trips is gathered, which is always done in along, at a baby, who sits in the fold hot weather. If the straw and grain of her left arm and reaches down to- are slightly damp when put in the mow ward a bunch of grapes which she is or stack, it will almost surely heat. dangling above the child. It was first This heating may not be injurious in exhibited in Paris, and was so much itself, but it leaves the grain damper admired that the French government, than before, and it only dries out when unable to purchase the original, or- cold weather comes. So it often happens that when winter wheat of the present year's crop is used as seed, it damp as it was when garnered. Such wheat germinates slowly. It is already expanded with moisture, and so does not swell in the soil as it should. For this reason many old farmers who grow winter wheat prefer wheat a year old for seed. It is, however, no better than if as good as this year's wheat, which has been thoroughly dried and if possible without any heating in its moist state. Put the seed wheat in bundle on scaffolds where it will dry, spreading so that it will not heat. Then thresh it out with the flall and put it in a fruit evaporator for twenty-four hours. By that time the grain will seem much less plump than new wheat ought to be, but it is all the better seed

Why Horses Slobber. A correspondent of the American Cultivator expresses the belief that the reason why the second growth of clover makes horses slobber is because of its seeds. Clover seed at present and prospective prices is altogether too dear feed to be given horses, even the most valuable. But, says the Cultivator, we ascribing the slobbering to the clover seed. Neither do we think it is the second growth of the clover itself. Many definite period. Work in the mine was years ago we made an investigation, and found that the slobbering only occurred where the lobelia plant, often low price of silver, made it inadvisable | called Indian tobacco, was found mixed every farmer knows, a most powerful emetic. Even on land where it is abunthe day there were four fatal cases of dynamite. Two weeks ago two rifle dant, it does not get large enough to go into the first crop of hay. But after the first and heavy clover crop is removed the lobella makes a very rapid growth, and its blue flowers are often very plentiful where clover is grown on low,

The fassel of Corn. The flower of the corn plant is divided into two portions, the tassel, or male section, which furnishes the pollen, and the silk, which is the female portion of the flower, which receives it. Each thread of silk carries some of the pollen to the ear, and there a One window for every two cows should Russian battle-ship Rostitian, to Adnot only for refrigeration, but as a grain of corn is formed. If the sun can shine distinct the profusion of silk is so great that the grains of open to throw the manure out of them, if necessary. If the sun can shine distinct the profusion of silk is so great that the grains of open to throw the manure out of them, if necessary. If the sun can shine distinct the profusion of silk is so great that the grains of open to throw the manure out of them, if necessary. If the sun can shine distinct the profusion of silk is so great that the grains of open to throw the manure out of them, if necessary. If the sun can shine distinct the profusion of silk is so great that the grains of open to throw the manure out of them, if necessary is necessary. If the sun can shine distinct the profusion of silk is so great that the grains of open to throw the manure out of them, if necessary is necessary is necessary.

THE FARM AND HOME fact it is more likely due to the drying up of the tassel, so that not enough pollen is formed to fertilize all the silk. If there is either a very dry or very wet time when the tassel should be distributing pollen, these defective ears will be plenty. Heavy rains in one case wash the pollen off, and the dry weather causes the tassel to shrivel and become worthless. The blossoming is exhaustive. If the season is just right one-quarter of the tassels produced would make a full crop of welldeveloped ears. But as in every crop there are more or less defective ears, it is unsafe to cut them out. The suckers usually tassel later, and for this reason they often increase the corn crop on the main stalk after the earlier tassels have dried up.

Eggs and Young Chickens, In the twenty-one days that it takes to turn a perfectly fresh fertile egg into a chick, there is more profit in proportion to the capital invested than in any other farm operation. So the old lady was not so far out of the way when she said she would not sell eggs under a shilling a dozen, or a cent each, because it didn't pay for the hen's time. If an egg is worth one cent, a lively young chick, newly hatched, is worth at least six cents, if not ten. Six hundred to 1,000 per cent. profit in twenty-one days' time is not to be sneezed at. There is another side to this, of course, when sickness or something else thins off the young chicks, and their dead little bodies are not worth even the cent that the egg costs from which they were hatched. It is by looking on all sides that conserva-Emanating from some other sources | are saved from enthusiasm in the egg the figures given by Mr. Alvord might and poultry business that have dereasonably be subject to doubt, but ceived and disappointed many who Mr. Alvord is not one who would know- have gone in without experience and have come out with more experience, than they wanted.

> Rye Straw for Binding Corn Stalks. It is a good plan for farmers who grow rye to save a few bundles to be threshed by hand, and use the straw for binding corn stalks. We cut corn much earlier than we used to do, and it is wise to do so. In using green corn stalks for binding the tops of stooks, perhaps two or three will break, wasting stalks, spoiling patience and taking time, all of which would be saved by having a wisp of long rye straw to use in binding the tops. There is still auother advantage of the rye bands. They will hold, while if a dry, hot spell comes a good many of the stalk bands will break, letting the stook fall apart, and when rains come most of the stalks will be found in the mud. Those who use rye bands for binding corn stalks will never after be without them, even if they have to grow a small piece of rye every year for this purpose alone .-

It is natural at planting time to put some composted stable manure in melon hills. The soil is then rather damp and too cool for the melons. The manure dries and warms it, which gives the seed an earlier start than it could get without the manure. But total average being thus 16.08 pounds. about this time the man who has melons with manure in the hill wishes he production of butter on farms alone had not put any there. No matter how well composted the manure, it will not the population, and such had been the hold its moisture into midsummer statue of a bacchante or priestess of butter averaged no less than 19.24 melon hills is to make deep holes down below the manure in the hills, and then Monies, the famous sculptor, destined As no creamery butter was reported slowly fill and refill them with water and is well saturate soil, and the surface is kept mellow to prevent evaporation, the melons will not suffer for lack of moisture in even the dryest times.

> Substitutes for Wheat, Possibly one of the reasons for the low prices of wheat the past few years is that so many substitutes have been found for it as human food. We still use a great deal of wheat, but in cities especially wheaten bread is less the staff of life that it used to be. The use of oat meal has increased, and it daily forms part of the nutritive ration, and very good nutrition it is, too. We use far more fruit than formerly, and also more potatoes. The latter are not so good in nutrition as wheat, and for this reason their increased use is not often is sown when very nearly as for our advantage in health and strength. Like all other starcy foods, potatoes are difficult to digest, and should only be eaten in moderation, except by those whose digestion is strong.

Facts for the Farmer.

Mice love pumpkin seeds, and wil be attracted to a trap baited with them when they will pass by a piece of meat. An excellent axle-grease: Tallow, eight pounds; palm oil, ten pounds; plumbago, one pound; heat and mix

To help the early lambs, the ewes should have a liberal meal of oatmeal gruel, a little warm, every morning, as soon as the lamb is born.

The feet of foals very seldom receive the care and the frequent inspection so necessary to their future protection of form and soundness. Horses' feet from this cause alone frequently become defective and unhealthy. Ignorance and carelessness

are, perhaps, equally to blame. It is the business of the farmer to ascertain if he has any stock that it think our correspondent mistakes in does not pay to keep. It is suicidal business policy to be feeding and sheltering stock that do not pay for their

A correspondent of an exchange sug-

gests to prevent apple trees from splitting where they grow in forks, taking a sprout that is growing in one branch and grafting it on the other. The branch will grow with the tree and become a strong brace. A difference of a very few days makes a great difference in all kinds

of crops some seasons. Clover sown just before a beating rain would become imbeded in the soil, and would grow better and stand more dry weather than if sown immediately after the rain. Owing to the location of some stables, it is impossible to get much sunlight in them; but in the greater number of barns, where the cows stand in

easy matter to put in a few windows.

THAT TERRIBLE SCOURGE.

Malarial disease is invariably supplemented by diturbance of the liver. the bowels, the stomach and the nerves. To the removal of both the cause and its effects, Hostetters stomach Bitters is fully adequate. It "fills the bill" as no other remedy does, performing its work thoroughly. Its insredients are pure and wholesome, and it admirably serves to build up a system broken by ill health and ahorn of strength. Constipation, liver and kidney compaint and nervousness are conquered by it. To a certain extent one's character may read from one's walk.
