of men who have been afflicted with queer sons-in-law; anyhow, the relations of Benton, his daughter, Jessie, and her husband, General John C. Fremont, could furnish ample material for an interesting romance too lengthy for this publication. Some even say that the father-in-law sent Fremont out West to get him off his hands; and that may have been true, for the like has occurred many times since. Fremont, who imagined he saw Napoleonic honors in store for him, had unfortunately adopted Napoleon's definition of history, "Fiction agreed upon." But had Napoleon's ideas been in keeping with this age, his honors might have been more abiding, because unreliable history usually passes for a very poor grade of fiction; this may explain why more of the history of Oregon is not required to be taught in the public schools of the state. Fremont, in the name of the government, published lengthy reports of wonderful exploits, characterizing himself as the "Great Pathfinder." This must have been very novel words, meaning "a lover of learning," reading to those, many of whom are living, who knew that Fremont and his party the town was founded as a college town had merely followed along in the wagon by the United Brethren in Christ as road made by the Applegates and their early probably as 1863. The town and from 20 to 30 cents per pound, and party of immigrants. Just imagine a college enjoyed a steady growth for good, fresh butter is always in demand "Great Pathfinder" finding Oregon by many years; and as the church In fact, the Oregonian and other leada route hitherto traveled by men, young which fostered the college grew, ing journals of the state have time and and old, women and children-the true it gradually broadened its opinpathfinders of Oregon.
