out the safe in the building which still bears the captain's name an old chest was discovered in one of the dark corners of the vault. It had been there for years, and was supposed to contain only some plates and drawings of war pictures, used in connection with a book of war stories. The executors had passed the old chest by without examining its contents, supposing, of course, that it contained nothing but the plates and drawings, as indicated by the marking on the outside. One of the clerks engaged in the work had curiosity enough to take a peep into the chest. When the loose drawings were removed a sight met his gaze that fairly took his breath away. There, nestling among the sheets of war pictures, and at the bottom of the chest, was an im-

nomination, from \$1 to \$20. The discovery was so unexpected that the executors were at a loss for some time to account for the pile of treasure. The latest will was carefully scrutinized, but nothing in it could be found relative to the unlooked-for gold deposit. Various theories were advanced to explain the accumulation of coin, and it was finally concluded that the cantain the treasury gold reserve, and hoarded erally used to reduce the expense.
