The Engineers Say They Will Walt for a Permit and Settle Right-of-Way Claims in Advance.

Lewiston, Idaho, Nov. 23. - The Northern Pacific let a contract to Wren & Greenough, of Montana, for the construction of a section of road on Lapwai creek. The agents of these contractors arrived last week, and began preparations for grading a roadbed along the narrow Lapwai valley. This valley is all settled by Indians, except a halfmile adjacent to the Clearwater river, and the present line of the Northern Pacific road. The Indians hold these homes very sacred, as they were inherited from their fathers and then alloted to them by the government. They protested against trespass, although he railway agents offered to purchase the right of way through every holding and the engineers say they had no intention of proceeding without legal titles to the land appropriated. However, excitement ran high when the large force of graders appeared upon the scene. Indian Agent Fisher also protested against the trespass upon the government land without due authority

from the interior department. These conditions were reported to the government, and it is believed an order was asked placing the military at the disposal of the agent, to be used to eject the railroad force if necessary. The officers of the railroad company say the excitement was uncalled for. that they never entertained the intention of proceeding without first securing all the right of way through proper authority. In the meantime a large force is waiting for orders to begin

grading. The engineers say they will wait for the permit from the government, and they will satisfy individual claims for right of way before they begin. The Indians, whose interests are involved, are intelligent, and they will be guided in the matter entirely by the agent, in whom they have implicit confidence. and to whom they have appealed for protection in their legal rights. There could be no demand for troops other than to protect the rights of the govern ment and the Indian wards. The call, if made for this purpose, was from a misapprehension of the purpose of the railroad company.

Long Standing Friction Removed by Commercial Treaty.

Paris, Nov. 23 .- It was quite unexpectedly announced this afternoon that commercial treaty has been concluded between France and Italy, granting mutually favored treatment except for silk goods, which will remain subject to the maximum tax. A bill embodying the agreement will be submitted immediately to the chamber of deputies. The government also introduced a bill in the chamber today modifying the wine duties favorably to Italy. The negotiations that have culminated in these arrangements have been or foot for two years, but nobody believed that a definite agreement was pending

It is believed that the Fashoda affair was instrumental in inducing France to grant the necessary concessions, though it is noteworthy that the silk duties which caused the breaking of the treaty in 1887, remain almost unchanged. The negotiations have been conducted with the utmost secrecy. The effect of the concessions involved is not yet known, but it is expected that they will have an important political influence for the removal of a long-standing friction between the two countries. The treaty, it is noticed, was concluded during the absence of Emperor William from Germany, and there is much speculation regarding its probable re-

Thousands of Natives Making Troubl London, Nov. 23 .- A dispatch to the Times from Allahabad, capital of the northwest provinces of India, says: "Serious plague irots took place at Seringapatam, on the island of Cavery, Mysore, on November 18. Ten thousand natives from the villages round about concentrated at Seringapatam, and made a desperate effort to enter

the forts and rescue the prisoners there. "Another mob from the Mysore side tried to rush the bridge. In each case the police fired volleys and succeeded in frustrating the attempt. Many persons were killed or injured. For 36 hours the police were kept under arms. Ultimately troops were dispatched to the scene of the disturbance to be in readiness for any renewal."

Freight Locomotive Exploded Lima, O., Nov. 22.-A freight loconotive on the Chicago & Erie exploded near here this morning, killing David Little, the fireman, and probably fatally injuring Walter Shirtleff, engineer; Edward Quick, conductor, and Frank Smith, brakeman. About 25 cars were wrecked, and the track was blocked.

The Hoilo Rebellion London, Nov. 23. - The Madrid cor spondent of the Daily Mail says: deneral Rios, the Spanish governor of the Viscavas islands, cabled from Iloilo that the rebellion of the native forces in the Spanish military force has been subdued. Ninety-seven rebels were court-martialed, of whom 25 were shot and 69 sentenced to imprisonment for life with hard labor. The insurrection at Davas, in Mindona, has been sup-

The Daily Mail calls the offer of \$20,000,000 as indemnity, "a surprising act of generosity."

Vancouver, B. Those who returned by way of Laird river have reached Vancouver in safety after passing through great peril." Stone accompanied them, and it is alleged that on the second night they camped at the foot of a cliff rising 500 feet sheer from the river. Natural gas was escaping from the sides of the cliff. About midnight, so it is stated, the sides of the cliff broke forth in flames, the fire being started by hostile Indians of the Siwash tribes. The natives appeared in war paint, and demanded wnisky, which the prospectors did not have. For three days the demand was repeated, when the Indians fired a volley at the whites, which was returned, and the Siwashes fled. Stone savs he notified the government, but nothing was done.
