AND COUNTY. CITY

Gor Hoxx.-Geo. W. Ritter, who was arrested by Deputy Sheriff Hogan, of Donglas county, at this place last winter was interviewed by a reporter at Laramie from which it is learned that Ritter, after skipping out of Laramie, last fall, took the Denver train at Cheyenne, proceeded directly to St. Louis, where he remained ten days under medical treatment, then went to New York with a view of taking a ship for the Pacific coast, but not finding one ready to sail he recuperated his health at Providence. R. I., for about ten days. He then sailed from New York, around Cape Good Hope, and northward to British Columbia; but finally brought up at Portland, Oregon. Remaining there but a few days, he went southward to Roseburg, where he was suddenly accosted in the street with, "How are you, Ritter?" by one McDonald, a gambler from Cheyenne. The fleeing defaulter was so much disconcerted that he took McDonald for a U. 3. detective, and offered to shrrender himself. It happened that the city marshal was a listener, and, going to the sheriff of the county, asked him if Ritter was not the name of the man for whom there was a reward offered. He replied that he was, and straightway dispatched a deputy named Hogan in pursuit, but Ritter had departed, and Hogan had a long journey for nothing. Coming back, he found his man at Eugene City, where he was arrested. Ritter says will be about an average acreage of grain that he had made up his mind to be a fugi- sown with a prospect for fally an average tive no longer, and had telegraphed home yield. for money to bring him back, the night before his arrest. At any rate, he had a strong disgust for Oregon "mists," and told some of the web-footers that he would sooner tive in the Wyoming penitentiary than have a farm in Oregon. When Sheriff Brophy reached that land of mud and mire, he had a 300-mile journey by stage from Roseburg to Redding, over the worst roads in Christendom. One day they made but six miles, having frequently to dig the horses out of the mud, and often the coach got over only 12 miles of mire per day. The reward was 'divided-\$200 going to the city marshal of Roseburg, and the remaining \$800 divided equally between the sheriff and Deputy Hogan, who made the arrest. The expense of Sheriff Brophy's trip was nearly \$800. Examination was waved by Ritter's counsel, Downey & Kingman, and his bonds were

came to town and gave himself into the custody of Sheriff E.ken last Saturday and in-'derwent a preliminary examination before Justice Brown on a charge of murder. It was concluded that the evidence was not of a character to sustain this charge and he was bound over in the sum of five thousand in the world. dollars to answer to the charge of manslaughter. There was no evidence that Mo-Cabe went to Zumwalt's for the purpose of having any trouble with the deceased; but having gone there young Zumwalt concluded that he had come for that purpose and a quarrel ensued which resulted in Zumwalt's death by a blow from a club in the hands of McCabe.

Brown, acting Coroner. The jury, after hearing the testimony, returned the following

That the deceased, Albert Monroe Zumwalt, aged 20 years, a native of Gregon, came to his death by a blow on the head by the hand of James McCabe on the 17th day of April, 1876, in Mohawk Valley, Lane county, Oregon.

GALE GETS A NOTICE .- A correspondent of the Oregonian, writing from Canyon City, gives Henry Gale the following first-class

We have a paper started here, which is also an evidence of progress. It started out with very liberal views, and so went on for aix weeks. Like the Saviour on the Mount of Olives, be tried to gather us all under his wings; but it occurred to him that he was getting spread out rather thin, and so he threed the Independents out of his flock to nonness to the ledies of Eugene that she scratch for themselves, so early in the spring will open a first class stock of Millinery and rainy weather, too. Too bad, wasn't it?

He's making love to the Republicans as they rie Rankin on or about the 4th day of May. An opportunity is offered to the ladies of Eugene of getting stylish millinery at reasonable rates. The ladies will do well to call Democrats a few crumbs of comfort. The Independents would respectfully suggest that he give himself no uneasiness about their "tall." As his animal was took week in the back to carry a tail, it will probably serve to piece out a tail for the Democrats, as it did before.

! Nor FIXED .- The water has been so high during the past week that the Mill Company has been unable to repair the break in the dam. The hole was stopped on Wednesday evening for a short time, but while the workmen were gone to supper it washed out, and no further attempt to repair it will be made until the water subsides.

Going East.-Last Tuesday Mr. Jas. Ebborts and wife and Stephen Edwards and A. C. Nichols of this county left for the East.

Bunno.-The Salem Woolen Mills were totally destroyed by fire this week. The loss is estimated at \$120,000, with an insurance of about \$60,000.

The following lines should be repeated to him at every meeting of his Sunday school :

"No beast that roams the valley free, To slaughter I condemn, Taught by the power that pities me I learn to pity them.

We are indebted to F. W. Helmick, the great music publisher of Cincumsati, for t new piece of music entitled. "That Banger is Hundred Years Old." The publisher pro-poses to give, free of charge, five beautiful photographs of the different centennial build-ings at Philadelphia, to every purchaser of this great centennial song. 1st. It is far more durable because it is all 2d. It is Cheaper because of its simplicity and 3d. It is Less Complicated, because there is only three pieces of operating machinery.

4th. It is more powerful than any other Mill, on account of the thin fan, and consequent in-creased suction of air, and because it is operated by an eccentric, being far superior to the crank shaft or rest pin, as a lifting and falling power. 5th. It needs no care, no watching, having self-feeding oil caps and self-regulating vanes. It regulates, protects and takes care of itself. 6th. It never warps, shrinks, or swells, heno it is not liable to get out of order. Once up, it goes all right,

7th. It does more work, runs easier and throw pressure, there being a graduated lever for that
