HEN WILL CONGRESS AD-SITT JOURN?

There is a wide difference of opin-

ion among the Washington correspondents of the New York papers as to the probable length of the session. The Herald dispatches credit the Democrats with a desire to hurry up things to the utmost in order to reach an early adjournment. But the Times' correspondent has discovered a very large mare's nest. He is convinced that Randall is purposely holding back with the appropriation bill for the purpose of prolonging the seaing back with the appropriation bill for the purpose of prolonging the session until after the Cincinnati convection, so that the candidates can be investigated at Uncle Sam's expense before the adjournment. This isn't an improbable theory, and if the Republicans commit the blunder of nomitating any man whose record is not olear he deserves to be put through a course of sprouts. The man who sends this news from Washington seems to think the Cincinnati convection will as likely as not commit that very blunder, and he, therefore, gives a word of caution to republican aspirants who couldn't stand an investigation, advising them to withdraw of property of property in the substance, is that this importants who couldn't stand an investigation, advising them to withdraw of the substance is a willing and ready servant, and gation, advising them to withdraw of the substance is a willing and ready servant, and gation, advising them to withdraw of the substance is a willing and ready servant, and gation, advising them to withdraw of the substance is a willing and ready servant, and gation, advising them to withdraw of the substance is a willing and ready servant, and gation, advising them to withdraw of the substance is a willing and ready servant, and gation, advising them to withdraw of the substance is to be substance. This advice is a severe commentary upon the men who are running the party now in power, and the worst of it is that it is ndoubtedly needed,

SNUFF-BLIGHTED BELLES.

Talk about the opium eater or the hisky-drinker, how much more are is addicted to dipping snuff? We believe there is more snuff used in Hopkinsville than any other place of its size in Kentucky, and its use is steadily on the increase. Hopkinsville has a reputation for beautiful women, but how long will that repu-tation last 'tis hard to tell. Some of the prettiest women we knew ten or twelve years ago are now nothing but faded flowers. Lips that once looked like red cherries, and for one kiss from which a man would almost give his right aim, now look more like dried apples than anything else we can think of. The cheek once full and rosy, is now sunken and color-less. The chin which looks longer now, glories in a bronze-colored stripe, which reaches bown to the stripe, which reaches bown to the

We were going down the street the other day, and noticed a lady coming up. It was a windy March day, and the lady's skirts were lifted a little above her boot-tops. We knew the aristocratically arched foot, but hang it! what had become of the neatly rounded ancle? It wasn't there. When we got near enough to look into the lady's face we saw that souff had done its work. Snuff is robbing women of their beauty and depriving them of husbands. (Whoever saw a lady that wanted to marry?) It is more harmful than smoking, and more repulsive than chewing, and its use by ladies is almost as much to be condemned as the drinking of whisky by men, and if the ladies have grounds to talk about men drinking and smoking, they are assured that snuff dipping in the eyes of men is about as repulsive as the smell of a two-cent-and a halt cigar, or a sniff of "rifle" whisky to the olfactories of the fair sex.

We indulge in the hope that soon there will be an anti-snuff society formed, which will be a twin sister of It will knit every possible variety of plain and fancy work our temperance society. We have no idea how many ladies in our city will take exception to this article; if all that use snuff were to get after us we would call their name legion, but we are upheld in our action by some of the most sensible mothers in town in entering a protest against a habit the adoption of which by a girl is al most as much to be dreaded by a parent as is the first taste of liquor by his boy.

Among the interesting relies brought back by gentlemen connect-ed with Geberal Crook's recent expedition against hostile Indians, and found in the village of Crazy Horse, after it was abandoned by the band, and previous to its destruction by General Crook's soldiers, was a book full of enrious drawings, which appear to be the military record, expressed in picture form, of some one of the young warriors belonging to the In-dian band. We have seen the book, which many contains sketches remark able for bold delineation and truthfulness to nature, bearing in mind of course, that the same is the work of GENERAL MERCHANDISE, an untutored Indian artist. The pictures represent attacks on American wagon trains, parties traveling along the highway. In a few instances female figures occur. The victims are pictured as being scalped, shot with rifles and arrows, and stabled with a. In some of the pictures the parties attacked are Indians of other tribes, Crows and Pawnees being especially notable. Nearly all the scenes are painted in bright colors; the blue uniforms of the murdered soldiers and the red trappings of the Sioux braves are especially vivid. It is quite certain that every scene so tured was an actual occurrence. The warrior to whom this book belonged has a very sanguinary record, if that is true. The book itself appears to have been an account book that was stolen from some post-tra- CALL AND SEE MY STOCK. der. It bears date 1869.

DR. DOHLRTY'S Largely and Steadily In-creasing Practice, which has constantly kept pace with the unex implest increase and steady growth of the Pacific Coast induced his removal from his long established and well-krown quarters, on the corner of Sacramento and Leidesdorff streets, in this city, to more commodious and eligibly located constructions at No. 649 Chr. Sciences. corner of Sacramento and Leidesdorff streets, in this city, to more comm diseased eligibly located apartments, at No. 649 Clay Street, where he has a spacious suite of handsomely fitted up and conveniently arranged Examination and Con-sultation Rooms (occupying the whole of the two upper stories) which patients may at all times visit, and see only the Doctor and his as-

istants.

With the most grateful sentiments of reward for the liberal patronage bestowed on him for the past thirteen years, at his old office, DR. DOHERTY

desires to inform the General Public, and especially all those laboring under all forms of Chronic Complaints, that he can be consulted at 649 Clay street, on every variety of Disease of the Langes, Liver. Kidneys, Digestive and Genito-Urinary Organs, and all SPECIAL DISEASES,

SPECIAL DISEASES,
of which the list is numerous, and which are
more closely connected with the general health
than the majority of people are aware. Unhappy
invalids for years persist in concealing their condition from a motive originating in mistaken delteacy, and suffer in silence until their miseries become too acute to be repressed, and mental and
obysical debility untils the sufferer for active
duties of life. This latter type of affliction manifests
itself in the complaint professionally known aSyphilis, in all its forms and stages; Seminar
Weakness, and all the distressing forms of SelfAbuse, or Onanism; Gonorrhora, Gleet, Stricture:
Nocturnal and Diumal Emissions, Sexual Debiliey, Diseases of the Back and coirs, Inflammation
of the Bladder and Kidneys, etc., etc. The number of persons suffering from these horrible Discases, in whom the Dector has effected a radical
cure, can be counted by the thousand, and the volmitary certificates in his possession, received from cure, can be counted by the thousand, and the volnutary certificates in his possession, received from
nersons he has restored to health are enough to satisfy all that the Doctor's skill in the treatment of
these affections, enables him to warrant speedy
cures, even in obstinate cases, and in everinstance give relief. Diseases which formerly
toffled the medical skill of the most learn
ed and experienced Practitioners of the heating art, and were regarded by the majority of
Physicians as utterly in urable, now readily yield
to missery remedies, when prescribed by the inteligent Practitioner who makes the human sysem, and these special adments, his constant study em, and these special adments, his constant study
