The funny man of the New York Telegram gets off this: There isn't much doubt that William Penn was as good or a little better than the average early settlers of America, but of late it has been discovered that he could have been a great deal better than he was and not hurt his constitution a bit. Some of the old school readers had a picture representing Penn making a treaty with the Indians under a large tree. In that picture the great man had his arms Penn making a treaty with the Indians under a large tree. In that picture the great man had his arms spread out, a sweet smile on his face, and he seems to be saying:

"I want to be ten times as good to you as you can be to me."

"Delice from a formation. She has tried many physicians and many remedies. The only thing which has given her relief is Centaur Liniment. I am rejoiced to say this has circled her. I am deling what I can to extend its sale.

W. H. RING.

you as you can be to me."

He made several treaties with the red men. It was his policy to treat with such tribes as insisted that an Indian did not lose all his hereditary rights as soon as the first white man appeared. William wasn't a fighting man, and he found it cheaper to buy land at a cent an acre than to buy powder to blow the Indians off it. There was a good deal of spare land in America when the Quaker arrived, and the Indians didn't begin to appreciate its value. They sold all the territory embraced within the present preciate its value. They sold all the territory embraced within the present for about \$30 in cash and goods. The cash was all right, but the goods conserver cases of Spavin, Sweeny. Wind Gall. Big Head and Poll Evil, are little less than marvellimits of the State of Pennsylvania sisted of glass beads and calico, and were turned in at 200 per cent profit. Penn had such a soft, sugary way with him that he made the Indians believe they had swindled him out of at least \$15 in trade, and they shook hands with the great land speculator and gave him the upper part of the Ohio river as a personal present.

Historians differ as to whether William Penn was an advocate of temperance. Some say he took his morning nip with as much relish as any of the pioneers, and that his best hold in making treaties with the Indians was contained in a four-gallon jug. Others affirm that nothing but clear spring water or pure milk ever passed his lips. It will probably be safe to take the middle ground, and say that Mr. Penn was more than once seen coming around the corner of a grocery wiping his mouth on the back of his hand and sighing: "Ah!

that old scrap-iron seemed to go right to the spot."

A woman who lived 58 days without eating or drinking, has just died at Mexico, N. Y. She was about 50 years old, and for ten years had been bedridden, as the result of a nervous disease. One day in February she was taken with a severe toothache, and, having had her teeth drawn, the pain went to her throat and chest, making it very difficult for her to swallow. She tried a little cream for a while, but it threw her into convulsions, and finally the sight or odor of would produce the same effect. From time to time, too, she became deaf, dumb and blind. Medications were introduced into her arms and Thoroughly remodeled, renovated and replenished she was bathed in milk, but when efforts were made to induce her to eat forts were made to induce her to eat GENERAL MERCHANDISE, pieces of food placed in her hands she refused, even after all trouble with her throat and chest had passed away. Yet when asked why she would not eat she could give no reason. The most striking fact of all was that, after death, no evidence of disease could be found in her body.

Lamar's broad and statesmanlike views on the Presidential situation will attract the confidence of all. He is sure the South proposes no aggressive political movement to secure her oboice, and no man was ever more correct in his opinion than the distinguished Senator is in his. The South simply asks the Northern Democracy to name their strongest man. Every other question will be subordinated to our earnest desire for reform, and a change of administration from the party which has crushed and pressed the South so terribly. The Southern Democrats are willing that the Northern Democrats shall say turkey for the North and crow for the South all the time, provided her Northern MUTUAL LIFE ASSOCIATION friends can secure a President, who will co-operate with the intelligent, honest people of the South, instead of sustaining the thieves and semi-barbarians, who made Southern Republicanism a hiss and a by-word, and whose hand-work in ruling is fully displayed in the rags and tatters of our once proud sisters-Louisiana and South Carolina .- Vicksburg Her-

Montgomery Queen, of circus celebrity, intends going into the business of ostrich farming and has purchased a tract of land in Alameda county, with that intention. Mr. A. Douglas, an English settler in Cape Colony, South Africa, commenced experiments about eight years ago with six ostriches. He has now about three hundred on hand, having sold eighty-five. Each bird eats about twenty pounds of vegetable matter per day, and the net profit from the sale of birds and feathers is stated at \$125., A-Ages of the beginning of the experiment is not given. The birds are hatched by artificial means and the process requires forty two days. In natural hatching one egg in ten fails; in the artificial process one in twelve.

DR. DOHLRTY'S Largely and Steadily Increasing Practice, which has constantly kept pace with the unexampled increase and steady growth of the Pacific Coast, induced his removal from his long established and well-known quarters, on the corner of Sacramento and Leidesdorff streets, in this city, to more commodious and eligibly located apartments, at No. 649 Clay Street, where he has a spacious suite of handsomely fitted up and conveniently arranged Examination and Consultation Rooms, (occupying the whole of the two upper stories) which patients may at all times visit, and see only the Doctor and his as-

With the most grateful sentiments of regard for the liberal patronage bestowed on him for the past thirteen years, at his old office,

DR. DOHERTY desires to inform the General Public, and especially all those laboring under all forms of Chronic Complaints, that he can be consulted at 649 Clay street, on every variety of Disease of the Lungs, Liver, Kidneys, Digestive and Genito-Urinary Organs, and all SPECIAL DISEASES,

of which the list is numerous, and which are more closely connected with the general health than the majority of people are aware. Unhappy invalids for years persist in concealing their condition from a motive originating in mistaken delicacy, and suffer in silence until their miseries become too acute to be represed and market and come too acute to be repressed, and mental and physical debility unfits the sufferer for active duties of life. This latter type of affliction manifests daties of life. This latter type of affliction manifests itself in the complaint professionally known as Syphilis, in all its forms and stages; Seminal Weakness, and all the distressing forms of Self-Abuse, or Onanism; Gonorrhoea, Gleet, Stricture; Nocturnal and Diurnal Emissions, Sexual Debility, Diseases of the Back and Loins, Inflammation of the Bladder and Kidneys, etc., etc. The number of persons suffering from these horrible Diseases, in whom the Doctor has effected a radical cure, can be counted by the thousand, and the voluntary certificates in his possession, received from cure, can be counted by the thousand and the vol-untary certificates in his possession, received from persons he has restored to health are enough to sat-isfy all that the Doctor's skill in the treatment of these affections, enables him to warrant speedy cures, even in obstinate cases, and in every instance give relief. Diseases which formerly baffled the medical skill of the most learn-ed and experienced Practitioners of the heal-ling art and were regarded by the missiliant. ing art, and were regarded by the majority of Physicians as utterly incurable, now readily yield to modern remedies, when prescribed by the intelligent Practitioner, who makes the human sys-

ligent Practitioner, who makes the human system, and these special ailments, his constant study and subject of observation.

In no case is publicity permitted except at the express wish of the patent; and the Doctor confidently trusts that his long experience and snocessful practice will continue to insure him a liberal share of public patronage. By the practice of many years in Europe and the United States, he is enabled to apply the most successful remedies against diseases of all kinds.

He cures without mercury, charges moderate fees, treats his patients in a correct and honor able way, and has references of unquestionable veracity, from men of known respectability and high standing in society. All parties who may consult him by letter or otherwise, will receive the best and gentlest treatment.

TO FEMALES.

AFTER A QUARTER OF

A CENTURY Of active work in the field of honorable practice in California during which time thousands of the most difficult cases of

Premature Decay and Diseases of Con-taminating Poison have been overcome and the sufferers restored to healthy and vigorous life and manhood the DR. J. C. YOUNG

Medical and Surgical Institute

still offers to the afflicted the positive assurance of bonorable treatment and rapid and absolute cures, as can be shown by thousands of testimonials from grateful Patients. Let me call the attention of those who suffer to some of the effects of SEMINAL WEAKNESS.

The preservation of health and life is dependent upon the proper condition of the procreative functions and any weakness or cause of weakness of the generative organs or their uses is a direct attack upon the general health as well as a sure destruction—if not properly cured—of the organs that are the pride of me sex and the blessing of the other. In Youth is laid the foundation of much of the misery of after years by the indulgence of the most destructive of habits making life a curse and spreading weakness and ruin among markind, for it is a well known fact that the indulgence in solitary vice, even in the slightest degree, plants seeds of weakness in the system that grow to a harvest of disease, sorrow and shame in after years. SEMINAL WEAKNESS.

shame in after years. YOUNG MAN

if you experience uny weakness you should not delay, for a day may imperil your health if not your life. In all forms of Weakness and Prema ture Decay a Cure is Gnaranteed by the Doctor to the Young, Middle-agred or Old, without Exposure or Hindrance from Business. The Remedies are purely vegetable and of a Nature that leaves no taint behind. Onserve the symptoms and basten purely vegetable and of a Nature that leaves no taint behind. Observe the symptoms and hasten to check the course of the complaint, if you experience any of them—nightly discharges, slight discharges at other times, trembling, anxiety, forgetfulness, confusion, pain in back, limb or body, torebodings, indigestin, timidity, aversion to society loss of power, want of control, variable temper, attacks of sickness akin to billousness, deposits in urine, irregular bowels, etc., etc.

TERRIBLE POISONS.

Among the most subtle and virulent of poisons in the human blood is that arising from Venereal Taint often breaking out, after years of apparent cure, in hideous sores upon various parts of the body. Its great danger lies in the fact that it is given to the innocent partner or to the unbornchild without showing in the person originally contracting it. TERRIBLE POISONS.

contracting it.

THE USE OF MERCURY
only aids in this terrible deception by drying it
upon the surface and driving it back into the
blood. ALL Venereal Poison is a blood poison and can be communicated in the blood
and the only certainty of prevention of transmission is in the positive cures of the reform treatment practiced at the Dr. J. C. Young Medical
Institute, comprehensive scientific and thorough,
having received endorsements as the best of al
modern practice. Recent cases cured in a few
days and chronic cases with remarkable rapidity.
Our tests of the presence of the Taint in the
blood are never failing. blood are never failing.

TO FEMALES.

There are no class of complaints that so enlist the sympathies of the medical mind or so command its gravest thought and study as those that afflict women. The Poctor after years of patient investigation and freatment is enabled to assure them rapid and thorough cures in all the complaints incident to the sex. The weak can hope for strength and the suffering for relief and cure. AND CURE.
