AND COUNTY.

Wheat.

We have heard of no sale of wheat during the past week. Portland quotations are the same, \$1 35 per cental, sacked, equal to 50 cents per bushel here. The yield in this county as the harvest progresses confirms our statement of last week that the crops would fall short from one-fourth to one-third Reports from other parts of the State shows about the same condition. The Dallas paper

Now that harvest has fully begun, it is plain that the yield of grain will not be as large as has been the case in past harvests in Polk county. We have heard of but one yield of wheat turning off 40 bushels to the scre—a field of 30 acres. The general average is under 20 bushels. Outs and barley on the whole turn out better than wheat. It is not very discernible what the market will offer this fall, but it is safe to predict that wheat will not command a price beyond 75 cents per bushel in this quarter. The farmers generally seem to view with concession the prospective market prices."

The Independent says: Several of the most extensive farmers in Douglas county, have nearly finished harvesting, and can now safely calculate the profits of the year's labor expended. Mr. James Dillard cultivated 200 acres this year, and has already cut and threshed 3,000 bushels of grain. The crop in Garden Valley is reported as a fair average this year, wheat going from 20 to 40 busbels to the acre; but from Ten Mile and Looking Glass we hear some complaints of the wheat crop being below an average yield. Throughout the country hyield of oats is unusually large; but taken as a whole, information received at this office would lead to the conclusion that the wheat crop falls a good deal short of the yield of

The Mercury says of the crop in Marion

The most of the fall wheat in this county is cut and threshed. The grain is plump and good, but the yield is far below last year. In Howell Prairie—the granary of this county—the average yield is less than twenty bushels to the acre. In French Prairie the yield is not more than twelve bushels per acre on an average. In the Waldo Hills the yield is better than anywhere in this county. The spring wheat will not yield more per acre than the fall wheat. The oats look well but will not come up to a full crop.

From the market report of the Standard of the 23d we quote as follows:

Although a number of the wheat fleetsome of them under charter—are riding at anchor in front of our warehouses, no effort is being put forth to provide them with cargoes, and every indication would lead the most casual observer to understand that the movement of the wheat crop during the Baker, who was arrested at Roseburg for bigamy, earlier part of the season is destined to be slow and difficult. The harvest is not yet of Douglas county, and has opened a tailor shop at thalf over, and growers having nothing to hope for in the way of an advance for a month or two, show no particular desire to market their grain, and with a prospect of cheaper freights as the season advance, will not do by Mrs. F. H. Grubbs. unless necessity compels them.

No SMALL Pox .- The Mercury of last Saturday says that a physician of Eugene visiting Iowa, hio and the Centennial. He will be had written to Salem for vacine matter, stating that there was a case of small pox in town, and there was great probability of its ian circus in Portland on Thursday examing. These spreading. If there is any case of small pox through what appears to have been rescality on the in Eugene that physician has kept it so part of their employers. out. The fact is that the only case of small pox in Lane county is the one mentioned in this paper last week, that of Winney, at the \$1,500 in all for the three robbers stopping the stage. farm of D. R. Lakin, and such precautions have been taken that there is not the slight-charge of having passed through a wheat field and left est probability of any spead of the disease.

Harrisburg Nucleus. It is neatly printed are high-priced cusses and well filled with interesting matter. Its mission on earth seems to be the division of certain counties in order to make a new one of which Harrisburg shall be the county seat. It proposes to take six whole townships and portions of six others from Linn county, about six from Lane and two from Benton county to make the new county The chances are decidedly in favor of the county seat going to Junction should the Harrisburgers succeed in their project.

To LEAVE Us .- From the Dayton, W. T. News we learn that our townsman Mr. H. H. Wolfe, has formed a co-partnership with D. C. Guernsey of that place to engage in the mercaptile business. Mr. Wolfe will leave here about the first prox. The people of that place will find in him an bor courteous and obliging gentleman.

ABOUT FINISHED .- The bridge across the river at this place is nearly completed, about the only remaining work being to put the covering da. Miller & Son will finish their contract next week, and a few days will suffice to complete the approaches, which will be done by the road supervisors.

BOARD OF EQUALIZATION,-The Board of Equalization for this county will meet at the County Clerk's office on Monday next, when all grievances in reference to asses-ments will be heard.

NEWS FROM THE MOUSTAINS .- A letter from Pine Openings, on the Military Wagon Road, Lane County, dated Aug. 13, to the Mercury, states that frost occurred there of Sheep. Enquire at the Photograph Galing their names as Sergeant Catlin and Private Little, stayed there the night of the 10th, stating that a short time before two soldiers at Fort Klamath had killed the Paymaster's Clerk and robbedhim of \$5,000 and that they were in pursuit of the murderers. As their statements conflicted, the suspicion was entertained by the writer that they were "rarring" and that they were the night before. Also, that two soldiers, giv- lery, of

NEW TEXT BOOK .- We were this week Haven, but for the last ten years a resident of Collifornia fruits, vegetables, etc. Go and lay in a supply before they are all gone. work designed as a school geography. From a somewhat burried examination it appears to us to be a most decided advance in the way of a text book for school use. Object teaching is the base of the work, and the arrangment is such that the learner operates systematically, always having an established point at which to begin, returning to the same point in one or more lessons, according to the magnitude of the subject. Much matter with which geographical works are lumbered up is omitted and its place supplied with more practical and useful information presented in a monner that will interest the learner. Prof. Rogers is attending the State Institute, and hopes to get his work put before the people in such a light as will warrant its publication. We have no besitancy in saying that it would be a decided advantage to have it introduced in every common school in the land.

EXAMINATION. - Prof. Bolon, County School Superintendent, will, by request of the county court, hold an examination in this place on Friday, September 1st, for the benefit of applicants for gratuitous testion in the State University.
