The Naturalists' Agency
Minerals, Shells, Birds, &c.

THE NATURALISTS' AGENCY HAS been established at 3725 Lancaster Avenue, Philadelphia, for the purpose of giving collectors of objects of **Natural History** an opportunity of buying, selling or exchanging their duplicates or collections. Please state where you saw this advertisement.

Specimens sent to any part of the world by mail. A monthly bulletin of 8 pages sent free. My **MINERALOGICAL CATALOGUE** and table of species, by which most minerals may be identified, illustrated by over \$500 worth of Engravings, is now ready for distribution. It is an excellent check list containing in the price list every species and all the more common varieties arranged alphabetically and preceded by the species number. The species number indicates the place of any mineral in the table of species, after it will be found the species name, composition, streak or lustre, cleavage or fracture, hardness, sp. gr. fusibility and crystallization. Free to all customers. To others on receipt of ten cents for postage, &c.

The large increase of my business has compelled me to rent the store No. 3727, and use it entirely for Birds, Mammals, Shells, Plants, Books, Fossils, Mould Builders' Relics and all objects of Natural History except Minerals. I have secured the services of one of the best taxidermists in the country, a gentleman who was employed by the Smithsonian Institution in South America for three years. I have a very large stock of Western and Southern birds on hand. Also, Heads and Antlers for Museums, Dining-rooms, Halls and Libraries. I have now over 38 tons, and nearly \$35,000 worth of Minerals on hand. I have sold over \$17,000 worth since the 17th day of January, when the first box was put into my establishment. November 13th, my cash sales were over \$1,500 and cash receipts over \$1,200.

I have the best specimens ever seen of Amazon Stone, Ruby Silver, Samarskite, Amethyst-Brookite, Columbite of Yttria, Zonochlorite, Chiboulite, Chalcocite, Rutile in Quartz, Hydroxide, Ictonite, Nigra, Green Vanadate colored by Vanadium, Paganite, Smoky Quartz, Rock Crystal, Peridot, Schistolomite, Aegerite, Feldspar (pink, red, gray, brown and green), Embolite, Melanite, Oaxkite, and Chlorastrolite.

Collections of Minerals
For Students, Amateurs, Professors, Physicists and other Professional Men.

These collections illustrate all the principal species and all grand subdivisions in Dana and other works on Mineralogy; Every Crystalline system; all the principal Ores and every known element. The collections are labelled with a printed label that can only be removed by soaking. The labels give Dana's species number, the name, locality, and in most cases the composition of the mineral.
All collections accompanied by my Illustrated Catalogue and table of species.
100 Crystals and Fragments for Study..... \$1
100 Specimens, Student's Size, Larger..... 5
100 Specimens, larger, Amateur's size 2 1/2 x 1 1/2 inches..... 10
Collections of Gems, Ores, &c., for the past two Minerals used in any Arts or Agriculture, on hand or put up to Order.

We sell Minerals by weight, for the Chemist and blowpipe use, at very low prices, as Samarskite 25c. per lb., Brookite Pure Crystal 25c. per lb., Emerald 10c. per lb., Lepidolite 20c. per lb., Blende 10c. per lb., etc.

I desire especially to call attention to my remarkably fine specimens of **AMAZON STONE**, which I have or have had nine-tenths of all the specimens ever found. I have made six trips to the locality, and think I may safely say no more will be found. Good crystals from 15 cents to \$1 each.
I have just purchased the best of the Ruby Silver exhibited at the Centennial by the Chilean government. These are the only specimens weighing less than three lbs. that ever brought anything like \$1,000 each.

My **TITANIUM MINERALS** are the finest ever known. Besides the Hydrated Tetracetic Acid, Hydroxide, a mineral recently analyzed by Dr. Koenig, of Pennsylvania University. I have also remarkably well crystallized Perovskite, Brookite of enormous size, Rutile geniculated till they form a circle, Schorlomite, Warwickite, &c.
I have the most beautiful green Wavellite and Paganite ever known, colored by Vanadic acid.

I am selling **AMETHYST** at far lower prices than it was ever sold at before. Over \$2,500 worth sold since the 10th of July.
I have just bought the famous **CHILTON COLLECTION** of Minerals and Shells, which have been on exhibition at Tiffany's for the past two years. The original price asked was \$3,000. It contained a number of unequalled things, among them a Rutile in Quartz, for which Mr. Clinton was offered \$300 gold. A twin crystal of clear calcite containing 1/2 pint of water, weighing over 10 lbs. The only perfect spinynyx in the country.

My collection of plants is very fine, comprising many that are rare, from the far North and West. I have just secured the Northern and Middle States (including Va.) collections of A. H. Curtis, who will no longer deal in them. I have several hundred volumes of rare old works on Mineralogy, Chemistry and the natural sciences. Among them are many of the most interesting of the State and Government Reports.

Foster then submitted his proposition, which was in the shape of a new bill, appropriating half the sum appropriated by the last army appropriation bill (\$12,993,583) for the half fiscal year.

A shower of objections came from the democratic side.

Foster—If the House is unwilling to make an appropriation for half a year, let an appropriation be made for three months.

This proposition was repelled in a like manner on the democratic side, with the shouts of "Not for three days." [Great excitement.]

Foster—Then the responsibility must rest on you.

Garrison and others—We take the responsibility.

The yeas and nays were then ordered on Morrison's motion to adhere, and roll call was begun at 11:50 A. M., amid great confusion and excitement. When the hands on the clock dial were five minutes before noon, and when it was physically an impossibility to conclude the call, the Speaker interrupted it, rose and delivered his valedictory.

A Most Damnable Plot.
Standard.

Our readers are aware that the Hippelites have made their threats that Gov. Grover should not get his seat. They base these threats on the evidence they claimed to possess of fraud and bribery used to secure his election. These charges, of course, are as false as they can be; but in order to make them plausible, nothing was left undone on the part of the ring to secure perjured evidence. For months past one or more of the tools of the United States Marshal's office have been employed in circulating libelous and false petitions over the country, asking the Senate to refuse Gov. Grover his seat. These petitions were circulated in secret, and none but the most debased of the radicals signed them. But this was not all they desired, so a miserable little scoundrel named W. B. Higby, of Corvallis, procured an affidavit from an equally worthless villain, to the effect that the latter saw money paid to bribe members of the legislature to vote for Senator Grover. This affidavit Higby procured, under the assumption that the boulder clay and that Higby would furnish him a certain sum of money. But the perjurer found, after he had made his affidavit, that his confederate was a worse scoundrel than himself, and while he got him to swear falsely, he refused to pay the sum promised. Frequent correspondence ensued between the two confederates in crime, as the perjurer needed money and payment was long overdue. These letters are all in the hands of Senator Grover, and also a counter affidavit, which states on what conditions the first was made, and what the consideration was to be. This fellow Higby, was one of the principal speakers for the Radicals in the last campaign, and there is no doubt but that he was instigated in this conspiracy by members of the Hipplo Ring, as the letters plainly implicate the U. S. Marshal and others. Besides, there is living evidence of a most infamous plot in this perjury, which will bring men who walk our streets to-day, lower in the estimation of the public when the facts become known, than the two tools which they made use of in their infamy. They need not think that they are undetected. Senator Grover struck in the right direction when he demanded an investigation, and when it is through with, the people of Oregon will have some idea of the infamy of the ring in this State. If justice is done, Higby and others will serve the State in the Penitentiary.

FROM LOBBY TO SUPREME COURT.
How Judge Bradley and Judge Strong Came Upon the Scene.

From the Cincinnati Enquirer.

WASHINGTON, February 12.—Who is justice Bradley? Well he was an ornament of the lobby. You have probably heard of the lobby? No! Is it possible? I thought every one had heard of this third estate of the Government, that, owing to the dirt accumulated about it, might well be called real estate. It is the agency established by Congress to facilitate business between it and people appearing before it possessed of claims of all sorts. As the representative represents, and the agent reflects the tone and character of his employers, the lobby is quite as bad as Congress and is generally composed of mean men and low women. Attorney Bradley was in this lobby working for the New Jersey railroad companies. Attorney Strong was likewise in the lobby laboring for the Pennsylvania railroad companies. These two gentlemen had other clients, and were mixed in other schemes, but these were their principle employments and interests.

While these two workers were hanging about the passages and committee rooms of Congress, the Supreme

Court, under Chase, Chief Justice, promulgated its celebrated decision in the legal tender case. This gravely affected the railroad interests so largely represented by Messrs. Bradley and Strong. The companies hurried to Washington in a high state of alarm. In a few days the Arlington, Willard's, and Ebbitt were thronged with bald-headed, round-bellied parties of the highest respectability in appearance—all were rogues disguised under stocks and clean shirts. Their first move was a law of Congress increasing the Supreme Bench two members. They found on count that with such addition they could vote down Chief Justice Chase and his gold-tender associates. Poor Chase, he saw what was coming and fought hard against the packing, but fought in vain! The inquiry was consummated.

It was not consummated until Grant sent into the Senate two names to fill the places. Of course, places on the Supreme Bench are not to be had every day, and the most eminent men in the legal profession in the country were spoken of. Everts, Curtis, Black, and others were canvassed, but Grant said openly, and, among others, to my friend Mr. John A. C. Gray of New York, that he would nominate no man to either place who was not pledged to a reversal of the legal-tender decision. He was as good as his word, and to the amazement of the world at large, and to the delight of all the heavy corporations, he nominated Messrs. Strong and Bradley. The lobby got drunk on champagne with delight, and in due course of indecent haste the legal-tender decision was reversed.

ANTIQUITY OF MAN.—A correspondent writes the *London Times*:

"Mr. Sidney B. T. Skertchly, of her majesty's geological survey, who is stationed at Brandon, Suffolk, has recently discovered some flint instruments in that neighborhood, in beds formed before the close of the glacial period. One was picked out of the beds in a pit at Culford Suffolk, and two others were dug out of like beds in a pit at Botany Bay, on the Norfolk side of Brandon. It was not till Mr. Skertchly himself found another implement at Culford, and saw the which he extracted it, that the importance of the discovery dawned upon him. Along side the Culford implement he found a deposit of broken and scraped mammalian bones and some fresh-water shells. These bones were all in a circumscised area. A jawbone containing teeth had been forwarded to London to be examined. Underneath the bones the clay was found to be burned. Mr. Skertchly's explanation is that we have here preserved the one solitary instance in the whole world of a camping-ground of the paleolithic men, and this camping-ground occurred below the boulder-clay which belonged to the earliest part of the glacial period. These remains were thus far older than anything previously discovered. Tracing the boulder-clay and the beds beneath across the country, he saw that the implements found at Botany Bay were of the same age. The men who lived before the boulder clay appeared to him to be more intimately connected in time with the men of the paleolithic age, who scooped out these ancient flint mines near Brandon called "Grimes Graves."

Thousands of Alldavits.
Many having used "patent" and prepared medicines and failed in finding the relief promised, are thereby prejudiced against all medicines. Is this right? Would you condemn all physicians because one failed in giving the relief promised? Some go to California in search of gold, and after working hard for months and finding none, return home and say there is no gold there. Does that prove it? Many suffering with Catarrh and pulmonary affections have used the worthless preparations that crowd the market, and in their disappointment say there is no cure for Catarrh. Does that prove it? Does it not rather prove that they have failed to employ the proper remedy? There are thousands of people in the United States who can make an affidavit that Dr. Sage's Catarrh Remedy and Dr. Pierce's Golden Medical Discovery have effected their entire cure. Many had lost all sense of smell for months, and pieces of bone had repeatedly been removed from the nasal cavities.
