Some years ago, says the Hartford Post, one of our citizens bought and set out some thrifty young apple trees. On one of them he neglected to remove the wooden label which was attached to one of the limbs by a copper wire. Two years later he found that the copper wire was entirely embedded and out of sight in the bark of the tree, and that year the limb was so heavily loaded with apples that he was obliged to prop it up, while there was not a blossom or apple on any other limb. Last year one of our neighbors, when his young apple trees were in full blossom, carefully girdled some limbs Paris Paper.
on several trees, and the blossoms produced no fruit on the limbs thus treated, but this year those limbs have blossomed full and no blossoms on the limbs that bore last year. Pomologists may profit by further experiments in that direction.

FRUIT SAVES DOCTORS' BILLS,-An experienced doctor in the West says his bills are cut down in families in proportion as they eat fresh fruit. Strawberries, currants and tomatoes are better medicine than calomel or jalap, and rather better to take. Apples freely eaten do the work of vermifuge or lozenges. Every fruit or berry has a mission to man hid away within it. Therefore, set out a strawberry bed, if you haven't one. If there is no other place, border your garden walks, and with a sharp hoe and straight line keep the edges cut clearly, leaving a rich mat of vines two me!" feet wide. Plant currants. A fresh cutting will grow if you but stick it in the ground. Border the fence with raspberries. Walk around your place during the early spring days, and make a mental inventory of every spot where you can stick in a fruit tree or berry bush. Plant something.

THE OLDEST THEATER.—The Philadelphia Wall-street Theater is the oldest theater in the United States. The owner is J. S. Clarke, the actor, who lives in London most of the time. Clarke bought the Broad-street Theater, in Philadelphia, a few years ago, and played there on his last visit to this country, instead of going to the Walnut, as usual. Manager Good-win, the lessee of the Walnut, retaliated by hiring the Park Theater and transferring his best engagements to that house leaving only second-rate stars to the Walnut. The latest blow at the Walnut was the production of an absurd drama from the pen of a Philadelphia court interpreter. Nearly all the lawyers of the city made the occasion one of great hilarity, jibing the author, commenting loudly on the play, and hectoring the unfortunate performers.-N. Y. Sun.

FNTOZOA. - A group of invertebrate animals which during some period of their existence live within and derive nourishment from the bodies of other animals, and with but few exceptions belong en-tirely to the class of helminths or worms. Animal parasites form in fact a sort of sub-fauna, and their number is only to be estimated by the extent of the animal kingdom. The presence of helminths or worms in mankind is alarmingly baneful and prevalent, and their existence until recently was so little known that many persons have died from this cause who were treated for some other ailments. Indeed it is only within a few years that heminthology has attained to the position of a true science, and chiefly through the labors of a few observers in Germany. Dr. Vandenberg has on exhibition at his hold six national camp-meetings this office, No. 212 First street, Portland, a large and varied collection of these wonderful and mischievous internal parasites which by his medicines he has expelled from many well known individuals in Portland and elsewhere. As the doctor charges nothing for advice, the afflicted should consult him. The Adventists have fixed July 11th as

THE GREAT WORM EXTERMINATOR

Late of San Francisco,

Would inform the sick generally that about 46 years extensive practice of medicine and surgery in Europe and the United States, of which 29 have been in California, has, by close observation and great experiments come to the conclusion that there are more acute and chonic diseases by worms, hyadadids, animaculæ or othe, species of entoroa. The public generally, or the profession at large, are not aware of the number of patients who are treated by eminent physicians for this, that, or such a complaint, without any relief. If the disease has been understood, a few doses of Dr. Van Denberg's Sovereign Worm Remedy would have immediately cured the complaint, and have saved many a greatmany lives. Dr. Van Denbergh's has collected a large variety of California roots and herbs, which, by analyzing, close observation and extensive experiments, he can conscientiously say that he has discovered new remedies for successful cure of the following diseases:

This is to certify that i had been Impering for fifteen years with a complication of cironic diseases and for mouths confined to my bed without receiving any benefit from many eminent doctors who attended me. Given up to die by the physicians and my friends, i was taken to Dr. J. P. P. Van Benbergh, senior, office No. 522 Sixth street, S. F., unable to stand or walk alone, after a close and careful examination Dr. V. said all my allments and misery were created by a specie of worms, and to my and my friends surprise, the boctor exp lied from me over 3,000 well developed worms within two hours which gave me immediate reli—rea was able to walk and the weeks after the weak a sere expelled I weigh nine pounds more than i disc. .over I believe I should now be dead but for the skillful treatment o Dr. J. Dr. J. P. P. Vax Daxasani—Dear Sir: I deem it my duty to make the following statement: For the last three years I have been suffering with constant grawing pain and a quivering senation in my stomach; also pain in my chest and heart; my foot would not digest, and I was so nervous that it was with difficulty I could follow my occupation, which has been here in Salem for the past ten years, as a practical dentist. In fact, from from the constant pain and misery, I had wasted to a mere akeleton. I had been doctoring a great deal without any benefit, and believing there was no help for me but to linger on until death would relieve me of my suffering. Some of my friends thought I had worms, and had better see Dr. Van Denbergh. He told me at once that worms were the cause of all my troubles, so he gave me five small preders, and in about four hours about 700 worms, from one linch to one and one half inches long, came away from me that day, and the following night some more came, and I am now happy to say I feel like another man again, and am gaining strength from day to day.
