Catarrh is the most prevalent of any known disease. It is insidious and generally pronounced to be incurable. Swallowing, while asleep, the vicid secretions of catarrhal colds, poisons the lungs and from thence undermines every function of system. The senses of taste, smell, and hearing are impaired the breath becomes disgusting, and breathing through the nostrils is rendered impossible. Scrofula, Deaness, Bronchitis, Polypuses, and Consumption are the natural legacies. Spurts of the nose or over the eyes and pressure within the chest, are experienced when neither the cause nor the fearful consequences are dreamed.
