# Another Murder.

The dispatches tell us of another horrible murder committed near Walla Walla, being the sixth within the past four months. The murder took place about 12 miles from that city, as is supposed on Sunday night. The murdered man's name is George B. Hager, and it is supposed that he was killed for his money.

He was cut to pieces and his body burned by having cordwood piled upon it and saturated with coal oil after which the cabin he lived in was fired. He was known to carry considerable gold around his body in a belt. He had but recently located and was just on bles and accumulations of debris and the point of starting for San Francisco dirt are the seeds of miasmatic disto get married and bring his wife back eases. BALKY HORSES .- Among the suggestions said to be published by some anticruelty to animals society, are these: If the horse when he balks, can have his attention diverted there is usually no trouble in starting him. This may be done in various ways, of which the following are a few that have been employed: Take the horse out of the shafts and turn him around several times quite rapidly. This will make him entirely dizzy and lead him to forget that he does not wish to draw the load. A stout twine twisted around the fore-leg has been used with good results. A string tied around the ear has the same effect. We have seen horses of the balkiest sort started by putting lumps of earth into their mouths. Even a piece of sugar or a handful of fresh grass will so divert the attention of a balker that he will often start off without trouble. Some mild treatments like these that set the animals thinking of something foreign to his work is vastly better than any amount of whipping, and is much eas. er of application.

Typhoid fever creeps into the house through the cellar. Decaying vegetawarm weather is approaching, for every cellar in the city and in the the cellar first. The doctor may lose,
