How Money is Made by Monopolists.

Daily Standard.

Last month the gross earnings of the O. R. & N. Co. were \$158,300, and the net earnings \$234,300. Nearly a quarter of a million dollars earned above all expenses in a month, by a transportation company that goes through a sparsely settled country! What better argument for legislative interference can the people want? To make profits so fabulous for the Eastern magnates we are all taxed, from the broad we cat to the clothes on our backs. How in the name of common sense could profits so immense be made, considering our and oppressive charges? We should ern Democrats, bears out the belief like one of the monopoly mouthpieces held by many that that wing of the in this city to explain, if possible, how party is about ready to swing away so vast a sum was secured in profits last from Pennsylvania's leadership. month by the O. R. & N. Co., without charging high rates! Will any paper dare to risk its reputation for common raised East of the mountains than the O. R. & N. Co. could handle, and it is but the other day that we printed an item about thousands of bushels lying in that region exposed to the weather, waiting shipment, much of which had begun to sprout through the sacks.

Acdonald on the Tariff.

Ex-Senator Joseph E. McDonald, of Indiania, differs in his views very mate-Constitution clearly vested in Congress as a revenue measure and that its proper exercise is in strict accordance with that idea, and whatever protection arises under a tariff ought to be incidental to it, and not its purpose or object. He believes in raising revenue to support the federal government, as far as practicable, by import duties, and would be very glad to do away with the internal revenue almost entirely. He thinks the true theory of all commercial countries is free trade and that the sooner we can approach to bottle. Sold by Osburn and Co, Eugene. that, consistently with supplying governmental wants, the better.

When the purpose of the tariff is simply protection, and not revenue, it assumes the form of bounty on which the consumer is taxed for the benefit of the producer or manufacturer. And as there are more consumers than manufacturers or producers, it is a tax on the many for the benefit of the few. He thinks the benefit of the few. He thinks the benefit of the few. He thinks the benefits of free trade are fully illustrated by our own internal policy, under which all trade between the States. Sole everywhere. 25 cents a bettle.

Untspoken for Free Trade.

The Post's Washington correspond ent says: Sparks, (Democrat) of Illinois, says there will be sharp agitation of the tariff question this session. Exactly what shade the fight will take has not yet appeared; but it is coming, and when it breaks there may be time at least for serious divisiens in what has been the Democratic party. It is presumed that new school protectionist Democrats would make trouble, but free traders are going to make a square open fight and trust to the future to show the wisdom of their boldness. He belleved that Illinois would approve a revenue tariff reform movement by 5,000 majority, and in greater or less degree by all States of the grain belt.
