Jesse James' Cave.

Mr. D. K. Spinners, a prominent merchant of Gallatin, Tenn., and Maj; W. S. Munday, while exploring the cave recently discovered on the farmi of Col. James Alexander, which for the last five years has been the rendervous of the James' brothers gang of outlaws; discovered a large flat rock in one of the chambers, and thinking that some of the secrets of the gang might be hidden away under it, removed it with great difficulty, when to their utter adtonishment a large cast iron sugar bet: tle filled with specie and jewels of various kinds met their view. They could hardly believe their senses, but finally managed to examine the treasure, and found that there was over \$400,000 in specie, besides numerous gold watches, rings; diamonds, and other jewelry of great value. Majof Munday guarded the great treasure while Mr. Spillers hastened to Gallating and securing his horse and wagon, fer turned as speedily as possible to the cave. They placed the kettle and its contents in the wagon and drove rapidly to Gallatin, and at once deposited their treasure in the vaults of the Sumner deposit Company. The greatest excitement prevails, and the Sumner Guards have been ordered to the caye to prevent a hungry horde of curiosity: hunters and treasure-seekers from com: pletely ransacking it.

This is the second lot of valuables found in the cave since the death of Jesse James. Thousands of visitors have been denied admission by Colonel Alexander, and it is only by strenuous efforts that any portion of its contents are spared from seekers of mementoes of the great bandits.

A considerable portion of the jewelry is in the original boxes as they left the jewelers, and contain the addresses of many jewelers throughout the West, and also a few in the East. #### Success in Farming.

To achieve success in farming, or in producing improved stock, the two must go hand in hand. To grow drops of wheat to sell in the market may do as an expedient to raise a temporary breeze, but is disastrous to follow. Look where you will, in localities where it has been followed as a specialty it has taught a severe lesson by the reduction of the fertility of the land.

The best animals soon degenerate without persistent care in feeding and become scrubs, unfit to reproduce. Localize all farming interests around a good home and introduce the best seed; prepare the land with the best tools in the best manner; set out trees, both of live stock you intend to produce, one or more, by the selection of the best. Do not take a scrub to breed, even as # gift.
