At San Francisco, August 2d, Patrick McGrath, an engineer, on being re-proached for his drinking, remarked: "I'll stop it to-night for good and for all," and immediately thereafter went off and cut his head so completely as nearly to sever the head from the body.

A mystery involving the fate of a woman and child occurred at the Presidio, Cal., recently. A woman, accompanied by a little girl, was observed to disrobe herself and child, and proceed towards the bay, only a few hundred feet distant. Nothing was afterwards seen of them. The clothing of the woman showed the name of Maria Gotto.

At Bar Harbor, Me., July 27th, a pleasure party of eight, consisting of six ladies and two gentlemen, mostly from Boston, were out driving in a buckboard, and when they were on the brow of a steep hill the rocker-pin broke, throwing the occupants of the vehicle front on the horses, frightening them, and they ran down the hill. Miss Mabel Case had her neck broken and all the rest of the party were severely injured.

A New York dispatch of August 1st says: The situation of the telegraphic strike is about the same. There are rumore that an important movement will soon occur on the part of the strikers, but nothing can be learned regarding it. Business is apparently going smoothly at the Western Union. All the operators were paid off yesterday and are at work his morning. Strikers who desire money were paid off by the brotherhood to day.

The total bushels of grain exported from New York in sailing vessels during the six months ending July 1, was 2,692,383, against 1,566,841 the same period last year. Of the former amount the American flag carried 41,922 bush-The amount carried in steam vessels the same period this year was 21,-922,390, against 14,441,673 the same period last year. The United States transported nothing by steam from that port. The lion's share belonged to England, which carried in the neighborheod of two-thirds each year. Belgium comes next. Last year corn formed less than one-half of the exports of grain, while this year it is fully one-half. Wheat formed last year two-thirds of all, but this year a little more than two-fifths.

The sivages will let us alone for about a month or so while they go on murderous expeditions to Chihuahua. This week they attacked a party, killing three persons. At the same time they attacked another party near Los Charcos, killing two men. A squad of infantry returned yesterday. They did not succeed in overtaking the Indians, who are well mounted, and coming directly from Arizona toward the Sierra Madre. These same soldiers saw the tracks of a large herd of cattle that the Indians stole, and were taking to the Sierra Madre."

A San Francisco dispatch of Aug. 2d says: Arrangements are about completed for expediting the delivery of eastern mails intended for eastern Oregon and southeastern Washington Territory. Mutilda Lotz, formerly of the California Art School of Design, now in Europe, has a painting in the Paris Salon representing two dogs, "Ronflo" and "Rough," which is favorably mentioned by the Paris correspondent of the Baltimore Sun.

Queen Victoria has invited the cele brated painter, Professor Von Angeli, of Vienna, to visit England and make a life-size portrait of her, to be presented to the German Emperor on the twentyfifth anniversary of his assumption of the Regency of Prussia.

In repairing the Protestant church of St. James at Ausburg recently, the workmen had occasion to take down the old organ, and in so doing detached some of the plaster from the wall behind it. The color of the uncovered surface led to an investigation which revealed several large and beautiful frescoes beneath numerons coats of whitewash, ancient and modern. Below was found an inscription showing that the frescoes were executed between the years 1480 and 1496.

The statue of General Zachary Taylor over his grave at Louisville is a little larger than life of white Carrara marble, cut in Italy, and shows the general in full military uniform. The figure stands on a polished shaft fourteen and a half feet high, having at the center a bronze medalion of the general inclosed by a wreath of laurel. A base of Maine granite, eight square, is left rough in honor of "Old Rough and Ready." The name and other inscriptions appear on the die of the pedestal.

The Paris correspondent of the Balki-more Sun says: The Americans have their full proportion of the limited num-ber of awards at the Paris Salon, though several of the best are left out. Three third-class medals have fallen to the lot of three of the best. Whistler's portrait of his mother, "The Water Carrier," by Charles Sprague Petrce, a Bonnot pupil, and a "Contrabandier Aragonese," Dannat (William, of New York), Munkacay's clever pupil, who was named last year among the most deserving by "An amateur," were the three which obtained the largest number of votes. Dannat's "Smuggler" is of the life size and gigantic stature, and painted with extraordinary vigor—so extraordinary that the French Government has laid claim to him (the "Smuggler"), and will not allow him to leave the country. He is firmly planted, standing with legs apart, his arms in shirt sleeves lifted far above his head, holding in his hands a jug, from which he pours a stream of water into seemly manner, she would talk to them his mouth. "Death is always a bad thing to contemplate. One day we are full of health and joy and cold vituals, and the next we are screwed in a box, a few words are said over our remains, and a few tears are shed, and then there is a race to see who shall get from the cemetery first, and though we may think we are an important factor in the world's progress, stage. Now Boise City and finally to Baker City, you would have thought that rooster's hen would have remained faithful to him for a week at least. I have watched them all the spring, and I never saw a more perfect picture of devotion than that between the bantam rocater and his hen. They were constantly together and there was nothing too good for her. He would dig up angle worms and call her, and when she came up on a gallop and saw the great big worm on the ground ued during the night. All the bodies she would look so proud of her rooster, recovered were burned immediately to and he would straighten up and look as prevent miasma. An eye witness de- though he was saying to her, 'I'm a cribes the scene at the theater, at the time daisy,' and then she would look at him the earthquake occurred, as an awful as if she would like to bite him, and just one. The curtain had just arisen when as she was going to pick up the worm he would snatch it and swallow it himself, fearful roar, and the ground rocked like and chuckle and walk around and be

ing buried beneath the timbers of the would look disappointed at first, and building which fell on them. Then two then she would look resigned, as much more shocks occurred. All who could as to say: 'Worms are too rich for rushed out of the theater, and hundreds my blood anyway, and the poor dear clambered into trees in search of safety, rooster needs them more than I do, because he has to do all the crowing,' and she would go off and find a grasshopper and eat it on the sly, for fear he would see her and complain because she didn't divide. Oh, I have never seen anything that seemed to me so human as the relations between that rooster and hen. He seemed to try to do everything for her. He would make her stop cackling when she laid an egg, and he would try to cackle and crow over it as though he had laid it, and she would get off in a corner and cluck in a modest, retiring manner, as though she wished to convey the idea to the servant girls in the kitchen that the rooster had to do all the hard work. and she was only a useless appendage fit only for society and company for him. But I was disgusted with him when the poor hen was setting. The first week that she sat on the eggs he seemed to get along firstrate, because he had a couple of flower beds to dig up, which a press of business had caused him to neglect before, and a couple of neighbors' gardens to destroy, so he seemed to be gtad to have his hen retire to her bondoir and set; but after he had been shoo-ed out of the garden and flower beds he seemed to be nervous, and evidently wanted to be petted, and would go near the hen, and she would tell him to go and take a walk around the block, because she hadn't time to leave her business, and if she didn't attend to it they would have a lot

of spoiled eggs on their hands, and no family to bring up. He would scold and seem to tell her that it was all foolishness; that for his part he didn't want to hear a lot of chickens squawking around. He would seem to argue with her that a brood of chickens would be a dead give-away on them both, and they would at once be classed as old folks, while if they were alone in the world they would be spring chickens, and could go in young society, but the hen would scold back and tell him he ought to be ashamed of himself to talk that way, and he would go off mad, and sulk around a spell, and then go to a neighbor's henhouse, and sometimes he wouldn't come back till the next day. The hen would be sorry she had spoken so cross, and would seem pained at his going away, and would look anxiously for his return, and when he came back, after being out in the rain all night, she would be solicitous after his health, and tell him he ought to wrap something around him, but he acted as though he didn't care for health, and he would go out again and get chilled through. Finally the hen came off the nest with ten chickens, and the rooster seemed very proud, and when anybody came out to look at them he would crow, and seemed to say they were all his chickens, though the hen was a long time hatching them, and if it had been him that was setting on them he would have batched them out

in a week or died a trying. But the ex-

posure told on him, and he went into a

decline, and one morning we found him

dead. Do you know I never seen a hen that seemed to realize a calamity as she

did. She looked pale, and her eyes looked red, and she seemed to be utterly

would have an excuse to go after them a perfect shame. She is out in the alley half of her time, and I could cuff her. It seems to me wrong to so soon forget a deceased rooster; but I suppose a hen can't be any more than human. Say, you don't want to buy a good dead rooster, do you? You could pick it and sell it to somebody that owes you, for a

spring chicken. "No. I don't want any deceased poultry that died of grief, and you had better go home and watch your hen, or you will be bereaved some more," and the groceryman went out into the shed to see if the cat was over its fit, and when he came back the boy was gone, and after awhile the groceryman saw a crowd in front of the store, and he went out and found the dead rooster lying on the vegetable stand, with a paper pinned on its breast, on which was a sign: "This ruster dide of colix. For sale cheap to boarding-house only." He took the dead rooster and threw it out into the street. and looked up and down the street for the bad boy, and went in and hid a rawhide where he could reach it handy .-

Dr. N. B. Richardson, of London, the octed physician, says he was recently able to convey a considerable amount of conviction to an intelligent scholar by a simple experiment. The scholar was singing the praise of the "Ruddy Bumper," and saying he could not get through the city without it, when Dr. Richardson said to him.

A Rich Man Starved.

"So Jones is dead," said one Somerville man to another. "Yes, poor fellow," was the reply; "he's gone.

Said the doctor: 'You must avoid all kinds of salt meats, salt fish, potatoes, cabbage, and vegetables of every kind.' Jones followed the advice, but found himself no better. He went to another doctor, and, after being examfned, was informed that he must avoid all kinds of fresh meats also. This did not do him any good, as he thought, and he went to another doctor, who highly approved of the advice which had previously been given, and further warned him against all kinds of pastry, likewise shellfish, including oysters and clams. 'The best thing for you is a milk diet,' said this doctor; so Jones lived wholly upon milk. Not feeling himself any better he went to another doctor, who cautioned him to avoid milk, above all things, if he wanted to get well. This reduced Jones to a diet of cold water and fresh air, and, finding himself no better under this regime, he went to another doctor, who advised him to beware of drinking too much water and being too much in the air. This last advice cut off the last of Jones' articles of diet, and he died of starvation, as I have told you."-Somerville Journal.

Changes in English Society.

During the last thirty or forty years not merely the superstructure but the foundation of English society has changed. The plutocratic has gradually been substituted for the aristocratic principle; many of the prejudices and sentiments of the latter may have been assimilated by the former, and it is for this reason that there exists a tendency to ignore or to minimize the fundamental character of the metamorphosis. The Speciator a few days ago published a list of the enormous sums left by a selection of rich men who have died during the last decade, and the large proportion of these consisted of persons belonging to the class of nouveaux riches or parvenus. Before the Crimean war the number of families who had attained a conspicuous position in London society by dint of mere wealth was extremely small.
