EUGENE CITY, OREGON.

RELIGIOUS AND EDUCATIONAL.

-"When you have learned to submit," says Prof. Riddle, "to do faith-

fully, patiently, duty that is most distasteful to you, God may permit you to do work you like." —The common-school system intro-duced into Utah by the various religious

denominations is said to be slowly but surely undermining the system of polygamy .- Chicago Times.

—The Chilian Republic has formally disestablished the Roman Catholic Church, stricken the promise to support it from the President's oath of office, and enacted the freedom and equality of all Christian denominations throughout its

-A large Buddhist temple is now in course of erection at Kiota, Japan. All its timbers and pillars are put in place by ropes made of human hair The devotees of the god they worship offer their hair on its shrine. The hair is then cut off and is twisted by the priests into church ropes.

-The Educational Weekly, of Canada, recognizing the growing tendency, in the schools, toward the study of the English language and literature, advises all young teachers to give special attention to these subjects, as they hope twenty years hence to be counted among the educational leaders of the day.

-The Turin Royal Academy of Sciences will award a prize of \$2,400 in 1866, to the author of the best work on physics, chemistry, physiology, natural history, geology, history, geography, or to the author of the most brilliant or useful discovery. The competition is open to all countries .- Chicago Cur-

-By the last annual report of the Commissioner of Education it appears that the relative number of women teachers in the United States is on the increase. From the territorty which has reported, the sex of teachers there are given the figures of 106,676 men, and 166,705 women. Eighteen States show an increase in the average salary of teachers. -N. Y. Sun.

-Only five colleges in the country have adequate endowments," says the "These are Columbia, with Collegian. \$5,000,000; John Hopkins University, \$3,000,000; Harvard, \$2,000,00; Cornell, \$2,000,000; Princeton, \$1,000,000. Less than half a dozen more have even tolerably liberal endowments: Tufts, \$750,000; Brown, \$720,000; Lafayette, \$600,000; Cincinnati University, \$560,-000. So far as we can ascertain, no other college has an endowment of over \$450,000."

Prof. Tarbell, an educator of high rank, has declared the great work of the public schools of to-day to be the preparation of the pupil, by technical education, for those employments in which a skilled hand is necessary. According to his view, it only remains for the public to express a decided sentiment in favor of industrial education, in order that the schools shall respond earnestly and readily to the demand. This sentiment seems to be particularly strong in New England, doubtless due to the existence of so many manufactories in that region. - Current.

WIT AND WISDOM.

An Illinois man sneezed a bullet out of his nose the other day. Tho e fellows who will persist in looking into the muzzles of their guns to see if they are loaded must suffer the consequences. -Burlington Free Press.

-Burdette has evidently worked on a farm. He remarks: "Where the zephyrs dimple the fields of golden rye, I hear the song the harvesters are singing clear and high. I hear a note that rises above the reaper's hum; I know the driver's tried to clear the cog-wheel with his thumb."

-He stood corrected: Boston girls are not ignorant of geometry. A young Bostonian handed his girl a lozenge shaped like a heart the other night. "What is this?" she asked. "It is a kiss," he replied. "A kiss is not heart-shaped," she said. "No?" "No, it is elliptical."—Boston Courier.

-The wealthiest heiress that any man ever married did not bring him riches to compare with the eyes of diamonds, teeth of pearls, hair of gold, cheeks of rubies, and a voice of silver. The fair sex can acquire most of this wealth if they will begin young enough. It will attract a better man than dollars. - Chicago Journal.

-The hero. O you who linger in the night of toli!
And long for day,
Take heart. The grandest here is the man
Of whom the world shall say

That from the roadside of defeat he plucked The flower success,
Bravely and with a modesty sublime,
Not with blind eagerness.

— W. T. Taibott.

-Young artist (displaying a picture)
-"This painting is entitled 'Jonah and
the Whale.'" Possible purchaser—
"Where is Jonah?" Young artist— "You notice the rather distended appearance of the whale's stomach midway between the tail and the neck?"

Possible purchaser—"Yes." Young artist—"That's Jonah.—N. Y. Sun. Young

"H'I see, said an Englishman, "that Richard Grant White declares speech which 'e took up in hinfancy. This is a mistake. I 'ave only been you," some one replied. "Yes, but actly.—Exchange, what right as 'e to make such assertions? If White should talk to me, I'd simply say: 'Mr. White, git h'out. You don't know good English from an 'hole in the ground.' - Arkansaw

Traveler. The Prine of Wales' son is coming to this country. The American women who quarrelled about dancing with Albert Edward while he was making a tour of this country, a quarter of a century ago, are now grand—excuse us, plump and pleasing matrons.—N. Y. Herald. SEASICKNESS.

A New England Doctor Suggests How It

The sem -circular canals of the internal ears are nowadays pretty well understood not to be organs of hearing but of equilibrium. The sensation they normally give us is that of change of direct on and speed in the movements of our head through space. When over-excited they gave r se to vertigo and nausea. A large percentage of deaf mutes, in whom the canals are presumably thrown out of function, are insusceptible of leng made dizzy. Of a considerable number of such deaf mutes who had been exposed to seasiekness, none, with the exception of two doubtful cases, had ever suffered. these facts lead to the hypothesis that seasiekness may arise, in the first instance, from the over-excitement of these sensitive organs, and, finally, that such over-excitement might be warded off or allayed by "counter-irritation" which consists in blistering or otherwise reddening the skin above and behind the ear. The experiment is so simple, and would be, if successful, so pregnant of relief that it seems a shame t should not be tested by a large number of persons. I have tried it mysel The first time was on the British Channel, on a very rough day. when every one around me was vio-lently sick. I simply rubbed the skin behind my ears till it was slightly excorlated. An incipient nauseau, which I felt at the end of the first half hour, completely vanished as the sensation of cutaneous burning became strong. In crossing the Atlantic I was less succ asful but my seasiekness was ra her anomalous, its prine pal symptom being a high fever and no nauseau, and I do not consider the failure to be a refutation of the method. It may be that the latter will serve for short exposures, like channel voyages, but not for longer ones. At any rate, the scientific presumption in favor of its utility is certainly large enough to warrant experimentation by any one who dreads the direct of all forms of misery .- Dr. William Jones, Cambridge, Mass. Permanent Security.

T. O. Lewis, San Francisco, Cal. Oct. 28, 1881, says, "I have suffered for ten years with congested kidneys, and have passed stones ranging in size from the head of a pin to a pea, which caused stranguary of the neck of the bladder. The best physicians in this city said I could not recover. I used four bottles of Warner's SAFE Cure, and got rid of four calculi." Writing June 23d, 1884, he says, "The cure effected in 1881 was permanent."

PUNGENT PARAGRAPHS.

-"Papa's pants will soon fit brother" is the first line of a new song, and yet it is said that there is no literary or musical genius in this country.-Philadelphia Call.

—A Georgia negro after living nine-ty-five years of single happiness, fell heir to a small fortune and has been married. Some men never can stand prosperity. -N. Y. Graphic.

-"Actions speak louder than words," said the blacksmith, suiting the action to the word by hammering so violently on his anvil that the book agent who was bothering him turned "I his gas." Boston Globe.

more than five or six men of genius in an age." "Now you understand," said a present of \$10,000, and is going to Brown, "why I am so sad. Solitude will be the death of me, I fear." "Even solitude," observed Fogg, "has its compensations."—Boston Transcript.

Never.

Mrs. Helen Leikem, West McHenry Ill., two years ago used Warner's SAFE Nervine for complete nervous prostration. August, 1884, she wrote, "1 have never enjoyed such good health, have had no return of my old trouble.' Try it.

A Notable, Arrest.

C. H. Oberbeck, Deputy Sheriff, St. Louis, Mo., in 1882 took Warner's SAFE Cure for a very severe kidney and liver complaint; he had lost 75 pounds in weight under the doctor's care. Five bottles of Warner's SAFE Cure arrested and cured the disease, and December, 1884, he wrote, "I now weigh 260 of \$250 for information concerning any pounds and never felt better in my unregistered ones. The number of Cure."

A POOR ITALIAN'S WINDFALL. He Draws the Capital Prize in the Louisiana Lottery.

San Francisco is acquiring quite a reputation as a fortunate locality in which to buy lottery tickets, the capital prize, or portions of it, in The Louisiana State Lottery appearing to have come oftener to this city than anywhere else. Heretofore there has been no difficulty in discovering the lucky winners, they, as a rule, not being slow in making their good fortunes known. But the holder of the winning ticket, 28,600, in the February drawing, seems to be an unusually reticent sort of person, and although it has been known for several weeks that the prize was won in this city the identity of the lucky man was not disclosed. The they lead to the practical suggestion only fact definitely known was that he is an Italian. Within a day or two the money has been paid through one of the banks of this city and it has leaked out that A. Vatuone is the person who has suddenly come into possession of this fortune. He is one of the proprietors of the Hotel d'Italia, on the corner of Pacific and Sansome Streets. He foremerly kept a nursery on the Ocean House road, which he sold out a little over two years ago, and in partnership with his brother purchased the hotel, inexperienced in the details of the (Conn.) Courant. business. These facts were obtained from a person closely related to the fortunate hotel-keeper. On being questioned further in regards to Mr. Vatuone's financial condition that gentleman replied:

"He was supposed to be doing fairly well, but it is well known that a day or two prior to the drawing his furniture was attached for debt.'

"Was he in the habit of investing in lottery tickets?"

"Oh, no; I believe the only ticket he purchased besides this one was in the San Francisco lottery of 1870."

"How did he come to buy this one?" "Well he, was almost forced into it."

"How's that?"

"An Italian, who deals in these tickets, had offered to sell him a portion of one a few weeks ago, but he declined, saying he wanted a whole one. The dealer managed to get one for him, but when he returned to the hotel Vatuone refused it, as he had better and more pressing need of his money. The man was anxious to sell and said he would price being \$6.25. Vatuone was tempted to try his luck, and is said to have scraped his last dime out of the drawer to buy, kicking at his silliness the meanwhile. He charged the money to his own account, saying that he did not propose that his brother should lose anything on account of his foolishness. It is stated that when he told his wife of it she upbraided him and remarked that it would have been wiser to have bought himself a pair of shoes, which he was in need of.

"What kind of a man is he?" "He's a little, black eved, curly-headhis good fortune very quietly. He has

HUMOROUS.

-"I say, Jim did your sister know you at the masked ball last night?" Well, I think she must have done so, for when I patted her on the shoulder she turned round and said "You donkey!"-Chicago Journal.

-Professor in mediæval history, reading from some old authorities, says: "It was no uncommon thing for Charlemage to eat at one meal, beside bread and wine, a peacock, large roasts of pork, several ducks, geese, and a hare. man on the back seat mutters:

'Lucky to get only one hair in all that.' -There is no blank so blank as the blank that appears before a man when he gets up in public assembly and forgets what he is going to say-unless it is the blank which appears before an amateur in a skating rink when his legs tegin to spread and he don't know which one to follow .- Burlington Free Press.

-A remarkable case of longevity exists in a Stonington family. Ten brothers and sisters, all born here, are still living, though scattered over the entire country from ocean, to ocean, Not one of them is less than sixty years of age. Among the number are men prominent in their adopted State. Those remaining here fill high positions in so-ciety.—Norwich (Conn.) Bulletin.

"THE THUNDERER."

The London Times Reaches the End of Its First Century.

Founded on the 1st of January, 1785,

the Times has reached the hundredth year of its existence. To survive to so great an age is as rare among newspapers as it is among human beings, still rarer is it, in both cases, for the hun-Lyme, had been seriously injured at New Orleans was incorrect. His full out any trace or token of decreptude The and decay. There is but one London morning journal which, having lived compton Constitution Bill and Kansas-for upward of a century, continues Nebraska Bill. All are sons of Hon. brimful of life and vigor, which is even although they were both ignorant and James A. Bill, of Lyme. - Hartford more lusty and energetic now than in earlier days and bids fair to see succeeding centuries pass over its head. This is the Morning Post, which was founded in 1772 with the title of the Morning Post and General Advertiser. Other London morning journals, enjoying a boundless circulation and an unprecedented popularity, are comparatively young. The oldest among them is the Morning Advertiser, which is aged ninety; the youngest is the Standard, which is only twenty-eight. The Daily News has lived and exercised worldwide influence for thirty-nine years: the Daily Telegraph and Daily Chronicle for thirty. Newspapers, like human beings, "have their day and cease to be," and in the cases of both their disappearance seems often untimely and incomprehensible. Not many years ago 1880, and July 1st, 1884, he writes, the Morning Herald and the Morning Chronicle were, to all appearances, as popular and powerful as several of the contemporaries which have survived them. Their conductors were enter-

prising and untiring in collecting news; the ablest pens of the day con-tributed to their columns. Both journals appeared to be indispensible to a large section of the reading public, and both enjoyed the favor of many advertisers, when they rapidly decayed and passed away. For many years the Morning Star twinkled brightly in the journalistic firmament, yet its light was suddenly quenched. Others, such as the Representative and the Mirror, the Constitutional, the Day, and the Hour, expired after a very short struggle for existence. Though the first number of the Times was published on the 1st of January, 1785, yet the journal was not called by its present name till the appearance of its 940th number on the lst of January, 1788. It was then no unusual thing for an established newspaper to assume a new face. For in-stance, the Public Advertiser, to which "Junius" contributed, was first known as the London Daily Post and General Advertiser, next as the General Advertiser, and lastly by the title which is now familiar. The Morning Post has dropped half of its original designation. For the first three years of its existence the Times was styled the Daily Universal Register... On the 24th of December, 1787, the following intimation was made to its readers: "Various reasons having occurred, since the first publication of the Universal Register which render it essentially necessary to change the present title, we respectfully inform our readers that on the 1st of January next it will appear with an entire new set of features under the title of the Times." Thus, for the first title, which was "The Daily Universal Register, printed logographically, by His Majesty's patent," there was substituted the following: "The Times, or Daily Universal Register, printed logographic-The last number of the journal under its old title does not materially differ from the earlier ones under its new one, nor at the outset was there a marked superiority of the new journal over its contemporaries. - The Nineleenth Century.

—A Georgia paper relates of william Jones, of Hall County, who is nine y-two years of age, that his hair has been perfectly white, but seven or eight years ago it began to change, and now is perfectly black and luxuriant, while his beard is still white. Mr. Jones was in the war of 1812, and served four years in the late unpleasantness.

-P. T. Barnum made glad the hearts of ambitious school-boys in Fridgeport, Conn., by presenting the bigh school with a gold-medal fund of \$1,000.

WHAT IS CATARRH!

WHAT IS CATARRH!

Catarrh is a muco purulent discharge eaused by the presence and development of the vegetable parasite amorbs in the internal linking membrane of the rose. This parasite is only developed under favorable circumstances, and these are: Morbid state of the blood, as the highted corpuscio of tubercle, the germ polson of synilis, mercury, toxonnea, from the retention of the effect matter of the skin, suppressed perspiration, badly ventillated sleeping apartments, and other poisons that are germinated in the blood. These poisons keep the internal linking membrane of the nose in a constant state of irritation, ever ready for the deposit of the seeds of these cerms, which apread up the nostrils and down the fauces or back of throat, causing ulceration of the throat; up the custachian tubes, causing deafness: burrowing in the vocal cords, causing hearseness; usurping the proper structure of the bronchilal tubes, onding in polinonary consumption and death.

Many attempts have been made to discover a cure for this distressing disease by the use of inhalents and other ingenious devices, but none of these treatments can do a particle of good until the parasites are either destroyed or removed from the mucons tissue.

Some time since a well known physician of forty years standing, after much experimenting, succeeded in discovering the necessary combination of ingredients which never falls in absolutely and permanently cradicating this horrible disease, whether standing for one year or forty years. Those who may be suffering from the above disease should, without delay, communicate with the managers, Measrs, A. H. Dixon & Son, 306 King Street West, Tevonto, and get full particulars and treatise free by enclosing stamp.

Frost has kil'ed all the peaches, apples plums and pears in Ohio.

Young men or middle-aged ones, suffering from nervous debility, and kindred weak-nesses should send three letter stamps for illustrated book suggesting sure means of cure. Address World's Medical Associa-tion, Buffalo, N. Y.
