

A Natural Inference, Perhaps.

There is a young lady in town who feels that she made a mistake. She is sweet 17 and very girlish looking. The other day she met a young gentleman who is rather slim and not very imposing in appearance. He looks young, too.

"Oh," she said, "do please come with me. I am going to find a servant somewhere on Minna street. I wish you would accompany me, for I don't know where I have to go."

He was only too glad, and between them they discovered the house where the servant girl was to be found. They were ushered into the parlor, and presently a stout, buxom Irish woman appeared.

"You are the woman who wants a situation?"

"Yes, miss."

"Well, our family is very small. There are only three."

The Irish woman gazed at the girlish figure and at the slim young gentleman twirling his hat in his hands.

"Three, begorra! And how old might the baby be?"—S. F. Examiner.

Young Mr. Featherly, a guest, declined cake, and Bobby's eyes grew big with astonishment.

"Don't you want any cake?" he asked.

"No, Bobby," replied Featherly, "I seldom eat it."

"How's that, pa?" inquired Bobby, turning to the old gentleman. "You said that at the dinner table Mr. Featherly always takes the cake."

Ex-Bank President Fish is now a cobbler. Under prison regulations he may write one letter a month during the first three months of his confinement. After that he may only write one each six weeks. He is allowed half an hour every thirty days to see his friends; then back to his dreary routine. Prison life is certainly punishment to a man like Fish.

"Yes," said the doctor to the editor, "you need exercise; your blood is sluggish, your circulation weak, not what it ought to be." "Circulation weak, not what it ought to be," repeated the editor warmly; "why, sir, I wish you to understand that our circulation is double that of any of our contemporaries."

The size of the Great Eastern: Its length is 680 feet, 83 feet beam, 56 feet deep, and 28,093 tons measurement. Noah's ark was 347 feet long, 41 feet beam, 54.7 feet deep, and 21,762 tons measurement. By this it will be seen that Noah's ark is quite overshadowed by the Great Eastern.

We are afraid there must be another "proscription" case in the postoffice at Portsmouth, Ohio. The son and chief deputy of the postmaster having run off with \$2700 of the Government money, the G. O. P. will have another chance to bewail a Democratic raid on the "spoils."
