In view of the harmful results which so frequently attend the use of socalled patent or proprietary cough syrups containing morphia, opium and other equally dangerous drugs, the undersigned, physicians of Maryland, take pleasure in endorsing the official opinions expressed by the Commissioner of Health of Baltimore: Dr. Samuel K. Cox, analytical chemist. of Washington, and other authorities to the effect that the RED STAR COUGH CURB is not only a perfectly harmless, but at the same time an original and most effective remedy, and that it commends itself alike for being entirely vegetable - free from opiates, poisons and narcotics-and for its prompt efficacy, as demonstrated by

practical tests. BALTIMORE, MD., Feb. 12, 1885.

C. FAWCETT, M. D., For thirty-three years Resident Physi cian Union Protestant Infirmary.

J. J. GROSS, M. D., St. Vincent's Hospital.

J D. FISKE, M. D., Port Physician.

S. R. MORSE, M. D., Marine Hospital.

JOHN J. CALDWELL, M. D.,

The above certificate, coming from men who stand high in the medical profession, and many of whom hold such responsible positions as guar-dians of public health, appeals in the strongest manner to every intelligent parents.

For centuries it has been contended from his lodge and decamped. that a cough medicine to be effective table and at the same time efficacious cough cure has been considered an impossibility. The harmful and at deaths have, according to the testi-mony of physicians and coroners, resulted from the use of these dangerous preparations. It is for this reason, wer fought was between the Earl of that medical authorities and leading public men spçak so enthusiastically of the importance and value of the discovery of Red Star Cough Cure, which costs the trifling sum of twentyfive cents a botte.

Among those who have publicly desirable new departure in the treatment of throat and lung troubles, and advance toward each other, step for who after having personally used it step, and both declare in the same have certified to its remarkably effi-cacy, are breath that they were sorry for what

Dr. SAMUEL K. COX. D. D., Analyti-

cal Chemist, Washington, D. C.

Aside from these Governor McLane and Attorney-General Roberts, of Maryland; Mayor Latrobe and Postmaster Adreon, of Baltimore, and other well-known officials of Federal, State and municipal governments have publicly certified to the harmlessness and marked efficacy of Red Star Cough Cure. Every one will find it a safe, sure cure. It is entirely free from opiates, narcotics, emetics and poisons. It leaves no bad effects. It does not derange the system. It is pure, pleasant, prompt. Sold by druggists and dealers in medicines throughout the United States at twenty-five cents a bottle. THE CHARLES A. VOGELER COMPANY, Sole Proprietors, Baltimore, Maryland.

-The instrumental music question, which has been debated annually for fifteen years by the Presbyterians of Ireland, but never satisfactorily settled, well nigh caused a schism this year. Indeed, a number of ministers and elders did secede from the assembly for a short fime and held an opposition meeting. In a few hours, however, a truce was arranged, but such was the —that made Melbourne marvelous. I truce was arranged, but such was the tension of feeling that it was deemed expedient to continue debate on the subject, which was accordingly postponed till next year .- Chicago Journal.

-The Commissioner of Education reports that in the South the school' enrollment of white children has increased 297,185, and of the colored children 199,281 during the past two years. The total expenditure for public schools in 1884 was \$17,053,467, an increas. of \$2,232,495 over that of 1882. FOREIGN GOSSIP.

## MELBOURNE.

Three decades are an immense period

in the history of such a city as Mel-

Hon. WM. MUTCHLER, Member of The Early Days on a Magnificent and Marvelum Town.

> ourne; and it is far from improbable that the market value of "town lots" has increased in something like cubic ratio within the last thirty years. Most marvelous of all, perhaps, is it to reflect that not only the site of Melbourne and its suburbs, but an immense tract of the surrounding country, was once within an ace of being sold, "lock, stock and barrel," for, metaphorically speaking, an old song. I allude to the amous Merry Creek treaty. At the beginning of June, 1835, Mr. Batman ascended the Yarra and Saltwater Rivers, and a few days afterward he inluced certain aboriginal chiefs named Jaga Jaga, Cooloolock, Bungaree, Yan Yan and Movuhip, to execute a formal ieed of assignment, conveying to him and his heirs forever an area of between 500,000 and 700,000 acres of land, which would have comprised the sites of the cities of Melbourne, Geelong and Collingwood, the towns of Emerald Hill and St. Hilda, and the borough of Sandridge, the consideration given for this tremendous cession be ng 20 pa rs of blankets, 30 knives, 12 tomshawks. 10 looking-glasses, 12 airs f scissors, 50 handerchiefs, 12 red shirt , 4 flannel jack ts, 4 su ts of cot es a d fifty pounds of flour. Well, business is busines. Did not William Penn have his treaty with the Indians, and how many thousands of pounds sterto pay to the descendants of the Penn amily as compensation for the loss of their territorial rights in Pennsylvania? "The worth of anything is just so much is it will bring, and bush land about the Yawra district was probably not worth much in 1835. It is true that J hn Batman might have thrown in a few bottles of rum for luck. Governor Bourke, however, was hard-hearted enough to declare the whole arra gement with Jaga Jaga and his friends to be null and void, although a solatium of some £7,000 was afterward granted

chanced the other day in the inn parlor at a little township in Victoria, called Wangaratta, to light on a rude lithograph depicting the arrival of the first gold escort from the diggings at the Government building in William street, in 1852. The gold has been brought down in huge chests, three of which form a load, to a dray drawn by a long string of bullocks. There is an escort of troopers, armed to the teeth, for in the early mining days attempts on the part of bushrangers to "stick up" or rob the gold escorts were frequent.

Young as were the days of mining in 1851, you see in the picture John Chinaman, already about and as busy as a The letterpress at the bottom of it tells you that the people looking from the windows of the blue-stone building in William street are the clerks and draftsmen employed in the office of the Surveyor-General, and that on the day following the arrival of the gold escort these gentlemen all threw up their appointments under Government and were off to the diggings. The crews of ships at Williamstown and Port Melbourne used to act in precisely the same manner. They would desert en masse. Those were the days of alluvial deposits, of big nuggets looking the diggers in the face, so to say. Large portions of the colony of Victoria were then a veritable Tom Tiddler's Ground, where gold was to be had for the picking up, for the scooping out, for the shoveling together. The consequence was that everybody, from all parts of the world, who had a little money and a great deal more energy and pluck, started for the diggings. There was a proportion of weak-kneed brethren, whose pluck vanished as quickly as their money did, and it soon became # case of the survival of the fittest. There was left a residuum of real "live men. as the Americans say, and those live men and their sons have made Melbourne what she is-magnificent and marvelous .- George Augustus Sala, in London Telegraph.

#### URUGUAY.

A Constry Which Promises to Be a Powerful Commercial Rival of the United States.

We are accustomed to regard Uruguay as an obscure and insignificant country, worth not even a thought, but the commercial strides she is making show that she means competition with the United States in the near future. Chili has taken the flour market of the west coast of South America away from California, and Uruguay and the Argentine Republic are soon to meet our Dakota, Illinois and Kansas wheat in the markets of Europe, while they threaten an even greater danger to our cattle interests. With 100,000,000 sheep in the Argentine Republic, and 11,000,000 sheep in Uruguay; with 30,-000,000 cattle in one country and 7,000,-000 in the other, and only about 4,000,-000 people to furnish domestic consumers between them, it is easy to see what the supply of beef and wool and mutton will soon be for exportation. There is more cause for alarm in the ranches of Uruguay and Argentine than in the manufactures of England and Germany. We can compete with foreign industries in the quality and price of mechanical products, but we can not compete with ranchmen who can put beef cattle into the market at \$10 and \$12 per

One of the greatest advantages the cattle producer of Uruguay and Argentine will always have over those of the United States is the pearness of their ranges to the sea. The present supply of beef in both these countries for the export market comes from within a radius of one hundred miles from au ocean harbor, in which can be found the steamers of every maritime nation on earth except our own. Ocean vessels can go a thousand miles up the River Plata, and five hundred mi es up the Uruguay River into the heart of the cattle country, and almost tie up to the trees on the ranches, while our cattle have to be carried 1,500 to 4,000 miles on the cars. The geographical and navig ble conditions of these countries are such that ours would on'y equal them if ocean steamers could visit Denver and Fort Dodge. Any man of business can calculate the difference in the value of the product and the differences in prof-It is c'aimed that the cattle companies of the countries of which I have been speaking can sell marketable steers at \$10 and \$12 a head and declare thirty per cent. dividends .- Montevideo Cor. Chicago Inter-Ocean.

### A CURIOUS TRIBE.

The Sakels of the Malay Peninsula and Their Habits and Customs.

The report of the Resident in the Sta e of Selangore, in the Malay Peninsula, for the last year contains some curious intormation with regard to "aboriginal tr bes" called the Sakeis, who number between seven hundred and eight bundred. They are in nine divisions, un er head-men ca led Batins, and they live mainly by collecting gutta, rattans and other jungle produce. As far as is known they have no form of religious worship, but they are very superstitious, believing n good and bad omens, the sacred character of certain birds, and they always desert a vil age as unlucky on the death of any member of the tribe. They tattoo figures on their arms, but apparently only for the sake of ornament, and do not use any specially significant figures, peculiar to each tribe analogous to the totems of the North American Indians. They consider no kind of edible food unclean, but eat even mon-keys, snakes and scorpions, keys, snakes and scorping, which they kill by means of a blow-pipe, throwing a dart poisoned with the juice throwing thro of the poh or upas tree. For large game they use a kind of cross-bow, con-sisting of a sharpened bamboo spear placed horizontally on a grooved log, and a bent sapling fastened back by a rattan cord. This cord is stretched across a path in the jungle, and, on being touched, releases the sapling with sufficient force to drive it completely through a deer's body. The Sakeis live in small huts built of bamboo and thatched with leaves of the Bertam palm, raised eight feet or more above the ground. They are shy and easily frightened, but are quite harmless, and are gradually becoming accustomed to Europeans, by whom they are employed to track game and cut paths through the jungle. They are small in stature, but are otherwise very similar in ap-pearance to the Malays, from whom they differ, however, in usually having wavy instead of straight-growing hair. A few Malays are attached to every A few Malays are attached to sale Sakei community to act as go-betweens in the sale of their produce, and the officials have received special instructions to protect these aboriginal tribes.

Boston supports 800 insane, says Mr. T. B. Sanborn, not 75 of whom will recover!

This is frightful! Insanity has increased 40 per cent. in a decade, and most of the cases are incurable Whatever the individual cause may be, the fact remains that uric acid blood sets the brain on fire, destroys its tissues, and then comes some form of fatal lunacy.

Nothing is so pitiable as a mind diseased. Most brain troubles begin in the stomach; then if the blood is filled with uric acid, caused by failure of kidney action, and the consequent destruction of the blood life-albumen-you have the fuel and the flame, and a brain in full blaze as when one raves, or in slow combustion, as in milder forms of insanity. Rev. E. D. Hopkins, of St. Johnsbury Vt., a few years ago was confined in an asylum. He took a terrible cold while aiding in putting out a fire in a neighbor's burning house, and for twenty-five years that cold was slowly filling his blood with uric acid, and finally the deadly work was done. The case looked hopeless, but he happily used Warner's Safe Cure and recovered. That was three years ago, and having rid his blood of all surplus uric acid, he has remained well until this day.

It is indeed a terrible thing to lose one's mind, but it is a more terrible thing to suffer such a condition when it can be so easily prevented.

French rivers are being stocked with

A VALUABLE MEDICAL TREATISE. The edition for 1886 of the sterling Medical Annuai, known as Hostetter's Almanac, is now Annual, known as Hostetter's Almanac, is now ready, and may be obtained, free of cost, of sruggists and general country dealers in all parts of the United States, Mexico, and indeed in every civilized portion of the Western Hemisphere This Almanac has been issued regularly at the commencement of every year for over one fifth of a century. It combines, with the soundest practical advice for the preservation and restoration of health, a large amount of interesting and amusing light reading, and the calendar, astronomical calculations, chronological items, &c., are prepared with great the calendar, astronomical calculations, chro-nological items, &c., are prepared with great care, and will be found entirely accurate. The issue of Hostetter's Almanac for 1886 will prob-ably be the largest edition of a medical work ever published in any country. The proprie-tors, Messra. Rosetter & Co., Pittsburgh, Pa., on receipt of a two-cent stamp, will forward a copy by mail to any person who cannot procure one in his neighborhood.

The annual fire losses in this country are \$160,000,000.
