

THE EUGENE CITY GUARD.

TURSDAY, JANUARY 9, 1886.

A Chinese syndicate recently offered \$200,000 for the Palace Hotel in San Francisco, and were prepared to pay \$500,000, but finally concluded that an investment would be an unwise one at the present time.

The little son of the Mayor of New Orleans hurt himself with a toy pistol; the next day somebody with a toy pistol shot the Mayor's dog, and on the day following the Mayor issued a proclamation against the toy pistol.

According to the Astorian the captains of thirty-one English deep-sea vessels had their Christmas dinner inside the Columbia river bar. There were but two American vessels, the Southard and the Starbuck, in port.

Governor Foraker, of Ohio, has received more than five thousand applications for the few petty offices within his gift. There must be some mistake about this. It is only the Democrats who are "very hungry and very thirsty."

Democrats should remember that the County Registration Board will sit in the different precincts April 5th, 6th and 7th. No one will be allowed to vote who shall not have registered. Democrats see that your neighbor registers.

The Government has given orders for the recoinage into dimes of all the uncurrent subsidiary silver in the Treasury. Dimes are not very valuable, but they are often found extremely useful.

A poor young lady in the State of New York, who, about a year ago, assisted an old lady across the street, has been left a fortune of \$50,000 by the grateful old person. The dukes who stood and looked on are reading the news to each other.

The President declared in his message that "Congress should deal with the tariff in such a manner as to protect the interests of American labor." This is good Democratic doctrine. Heretofore the rule has been to deal with it so as to protect the interests of organized capital, leaving labor to shift the best way it could.

"We are not President Cleveland's apologist or mouthpiece," says the New York Freeman (negro organ). "He is eminently capable of taking care of himself. As long as he treats the race fairly and administers the government justly we will continue to commend him and his policy. We do this not as a partisan journalist, but as an unshakled, unbiased journalist, solicitous for the welfare of the race and the country."

August Belmont, of New York, on Saturday brought suit in the State Circuit Court to recover \$154,000 from Ben Holliday. Plaintiff alleges that judgment for \$114,000 was obtained by plaintiff against defendant in the Circuit Court of New York, which has never been satisfied. That the interest, etc., has swelled the \$114,000 to \$154,000, which amount the plaintiff prays the court may give him judgment for.

Three companies, two of them backed by great wealth and resources, and one a home organization, are contending for the right of way to build a ship railway around the chief obstructions to the navigation of the Columbia at The Dalles, and get the railway in operation before the completion of the canal and locks at the Cascades. The object is to transport steamboats and freighted craft on this railway, around The Dalles, thus opening the river to unobstructed navigation. The project is a gigantic one, but it will probably be accomplished in time.

The oldest man in this Congress is John T. Wait, of Connecticut, who was born in 1811, and is 74 years of age. The youngest man is Wm. McAdoo, of New Jersey, who was born in Ireland, October 25, 1852, and is 32 years old. Next to him comes Charlie Voorhees, of Washington Territory, who is the son of Dan Voorhees, who is also 32, but who was born in June instead of October. There are in the present Congress four men who are over 70—Wait, of Connecticut, Eldridge, of Michigan, Singleton, of Mississippi, and Judge Kelly of Pennsylvania. Twenty-seven members of the present Congress have ages ranging between 60 and 70; sixty-seven are between 50 and 60 years of age; and hundred and thirty-eight are between 40 and 50; and thirty-six are between 30 and 40 years of age.—Washington Letter.

Telegraphy in Brazil.

In Brazil the air lines have to contend both with the natural decay, rapid as that is in a tropical country, and with the sudden fall of the temperature at sundown, that causes wires and insulators to break by contraction. All nature is leagued against them. The luxuriant vegetation of the tropics, despite all attempts to keep it down, causes no end of trouble. Birds build their nests on tops of the poles, and ants up their sides, while skunks and armadillos undermine them and cause their sudden fall. The ants' nests have to be chopped off with axes when old and hard. Wasps build nests in the bell shaped porcelain insulators, apes meddle with the wires, and enormous swarms of birds, flying by night, often wreck or tangle them. More mischievous than any of these is a huge spider that weaves its web between and interferes with the electric currents. Worst of all, the tremendous tropical thunderstorms smash wires, poles, insulators and all, almost daily in their season, despite all precautions.

The Funny Men of the House.

The Democrat who succeeds Roswell G. Horr is a young Irishman with the euphonious and illiterative name of Timothy Tarsney, says a Washington correspondent of the Cleveland Leader. Mr. Tarsney is said to inherit all the wit of his Irish ancestors, and his Michigan friends say he can tell a story better than any other man in America. They expect him to take Horr's place on the floor of the House as a national humorist, but Mr. Tarsney tells us he never uses his humor in making speeches. He believes there is a time to laugh, and does not think this time is during so serious a matter as a speech in Congress. His speeches will be sober and sensible, and I suppose that John J. O'Neill, of Missouri, with his turn-up nose and laugh inciting grin, will still be the funny man of the congressional circus.

A circular of information, designed for contractors who have been invited to bid on the tunnel work on the Cascade branch, gives the following specifications of the work required. The tunnel is to be 9850 feet long, without the approaches, and including the approaches will be considerably over two miles. Its height is to be 22 feet and its width 16 feet and 6 inches. Proposals are to be received, the contract will soon be allotted therefor and work commenced as soon as possible in the Spring. Two years and four months are to be allowed for its completion. Forty-nine miles of road must be built from Ellensburg westward before the location of the tunnel is reached.—Goldendale Tribune.

A recent improvement in the Bessemer steel process as carried out at the Edgar Thompson Steel Works, near Pittsburg, will have the effect, it is said, of making Bessemer steel equal in quality to the crucible product, and at only about one-tenth the price. The change consists in a thorough mixing of the spiegelisen with the molten iron in a ladle, in such a manner as to make the carbonization much more uniform than at present. Bessemer steel can be produced at a cost of a cent to a cent and a half per pound, while that made in crucibles costs at least eleven cents per pound.

"This is a wonderful city of over 350,000 inhabitants, and is a revelation to me," writes Minister Hanna from Buenos Ayres. "There is more money here than any place I ever saw, but they are now having our greenback days over again, gold being worth 4 1/2. It is the most extravagant government on earth."

The threat of the seventeen Orangemen elected to Parliament, from the north of Ireland, that "bloodshed, pandemonium and massacre" would follow home rule, is about as sensible as the bloody-shirt speeches of Sherman.

A Safeguard.

The fatal rapidity with which slight Colds and Coughs frequently develop into the gravest maladies of the throat and lungs, is a consideration which should impel every prudent person to keep at hand, as a household remedy, a bottle of AYER'S CHERRY PECTORAL. Nothing else gives such immediate relief and works so sure a cure in all affections of this class. That eminent physician, Prof. F. Sweetzer, of the Maine Medical School, Brunswick, Me., says:—

"Medical science has produced no other remedy so prompt and effective as AYER'S CHERRY PECTORAL. It is invaluable for diseases of the throat and lungs."

The same opinion is expressed by the well-known Dr. L. J. Addison, of Chicago, Ill., who says:—

"I have never found, in thirty-five years of continuous study and practice of medicine, any preparation so great a value as AYER'S CHERRY PECTORAL, for treatment of diseases of the throat and lungs. It not only breaks up colds and cures severe coughs, but is more effective than anything else in relieving even the most serious bronchial and pulmonary affections."

AYER'S Cherry Pectoral

Is not a new claimant for popular confidence, but a medicine which is to-day saving the lives of the third generation who have come into being since it was first offered to the public.

There is not a household in which this invaluable remedy has once been introduced where its use has ever been abandoned, and there is not a person who has ever given it a proper trial for any throat or lung disease susceptible of cure, who has not been made well by it.

AYER'S CHERRY PECTORAL has, in numberless instances, cured obstinate cases of chronic Bronchitis, Laryngitis, and even acute Pneumonia, and has saved many patients in the earlier stages of Pulmonary Consumption. It is a medicine that only requires to be taken in small doses, is pleasant to the taste, and is needed in every house where there are children, as there is nothing so good as AYER'S CHERRY PECTORAL for treatment of Croup and Whooping Cough.

These are all plain facts, which can be verified by anybody, and should be remembered by everybody.
