the turf. Geronimo, the Apache chief, has

surrendered. Watermelons of good quality are still being picked at Vacaville, Cal. Marie Augustine, a colored woman,

died in New Orleans at the age of 125

Mike Healy was killed by a snowslide in Bullion gulch, near Hailey, Idaho Territory.

Notwithstanding that it is midwinter, suri bathing is being indulged in at Santa Cruz, Cal.

C. W. Haines of Santa Cruz, Cal., was instantly killed while asleep by a tree crushing in his house. The Commissioner of Pensions esti-

mates that \$75,800,000 will be required for pensions the next fiscal year. The captain and first mate of the brig Robert Moore were swept over-

board and drowned in the Atlantic. The national encampment of the Grand Army of the Republic, will be held in San Francisco next August.

At New Orleans, Jas. Marshall shot J. H. McKenna dead, and a stray shot seriously wounded Jonas Goodman. Citizens of Walla Walla, Washington Territory, have offered \$100,000

for the location of the Capital at that David P. Mish, a salesman, was shot and instantly killed by Dr. J. A. J. Mc-Donald, at the latter's office in San

Francisco. Frank Leslie, Government scont. killed the Quartermaster and his Sergeant at Cave, Arizona, after a quarrel

about rations. The boiler in a sawmill at Breckenridge, Mo., exploded, killing Spencer Reed, the engineer, and Samuel Adams, fireman.

People who lost relatives in the typhoid epidemic at Plymouth, Pa., last spring are suing the water company for \$10,000 apiece.

At Paris, Texas, a mob of 100 men rode up to the jail, overpowered the keeper, took out R. T. Garrat and strung him up to a tree.

As a passenger train was entering the town of Thomaston, Texas, Mrs. Percy Edgar threw herself under the engine and was killed.

John Donovan, while assisting in unloading a safe at Dixon, Cal., was caught between the platform and the safe and fatally crushed.

The Canadian Pacific Railroad Company has decided not to establish a steamship line from Victoria to San Francisco, as was proposed.

Argentine Republic statistics for the past year show that the country has a foreign trade of \$140,000,000, and a domestic traffic of \$150,000,000,

Wm. Roche, a sailor, went into a butcher shop at San Francisco, picked up a knife and cut his throat. He died before reaching the hospital.

Gen. David Hunter, U. S. A., died suddenly at his home in Washington, D. C. He was President of the Military Court that tried Mrs. Surratt.

The Department of State has directed an investigation to be made of the circumstances attending the killing of Captain Crawford by Mexican troops,

Alfred Smith, a sailor, murdered his wife and a woman named Louisa Jane Wilson, and then attempted suicide by cutting his throat, at Cleveland, Ohio.

The Sharon will contest has been brought to a close in the Probate Court at San Francisco, Judge Coffey declaring that Sarah Althea Terry had no interest in contesting the will.

A disastrous collision occurred on the Chesapeake and Ohio Railroad at Staunton, Va. Engineer Lowry and Fireman Gittings were killed and several others were severely wounded.

George Waterhouse, aged 14 years, was attacked by hydrophobia at Cohoes, N. Y. After administering all medicine generally used in such cases, without effect, it was deemed advisable to smother him, which was done.

Coroner O'Donnell was arrested at San Francisco for suspending a large banner bearing the inscription "The people's choice for Governor," across the street sin violation of the city ordinance, but was released on giving

The brig Robert Moore, has arrived at Lewis, Md. When nmeteen days out, and while scudding before a gale, Captain Geo, Staff and First Mate John Hanson, both of New York, were swept overboard by heavy seas, and were drowned.

General Theodore S. West, of Wisconsin, has been appointed Special Agent of the Treasury Department for the Fourteenth District, comprising the States of California and Oregon, and the Territories of Washington and Alaska, with headquarters at San Francisco.

Reports from the mineral region of Pachuaca, in the State of Hidalgo, Mexico, are that several thousand silver miners are out of work, owing to the action of companies in stopping operations by way of reply to the State Government, which refuses to repeal the export tax of two per cent. on silver.

(From the Christian Advocate, N.w. Orleans.)

"A general complaint, that spares nei-ther class nor condition of person, is seated in the liver. It may be truly said this is our national disease, and it gives us great pleasure to hear or read the testimony of bersons of well-known veracity and intelresons of well-known veracity and inter-tigence to the value of Simmons Liver Regulator as a remedy. The testimony of so many friends satisfies us that this is one of the exceptions to the general hum-buggery of medical specialties."

GREAT GUNS.

The Immense Strides Made in Naval Ord nance Since the War-A Comparison Be tween the Old-Fashloned "Smooth-Bore" Armament and the Guns for the

New Steel Cruisers. If the brave fellows who manned the vessels under Uncle Sam's flag during the late war had been told then that the guns they were using would in the near future be looked upon almost as so many popguns, the prediction would have been ridiculed as are the notions of some "perpetual motion erank," and yet in the short space of twenty years almost a revolution in naval armament has taken place. Inventions in this field have been numerous, though most of the noise over such matters has been made by foreigners. Krupp, the German, has come to be known throughout Chr stendom for the powerful weapons he has been turning out from his works. Yet, in this country, notwithstanding the fact that there has been continued peace and no need of such things, immense strides in the construction of naval ordnance have been made. During and since the war the arma-

ment of our naval vessels consisted of two classes-"smooth-bores" and "rifles"-both of which were loaded at the muzzle. The "smooth-bores" fired project les of spherical form, while the rifle projectiles were of cylindrical shape, one end being pointed. All of these cannons were made of cast iron, the rifles having bands of wrought iron shrunk over the cast iron bodies to strengthen them. The "smooth-bores" ranged in caliber, or diameter of bore, from about six inches to fifteen inches, their projectiles varying from thirty-two pounds to 450 pounds in weight, and the r powder charges from six pounds to one hundred pounds. The fifteeninch smooth-bore with its battering charge of one hundred pounds of powder and solid shot weighing 450 pounds has a penetration of fifteen inches of iron at short range. The "smoothbore" guns of smaller caliber than fifteen inches were not considered as "armor-piercing" guns, their projectiles being spherical shells filled with powder and titted with fuses to burn a certan number of seconds, according to the range desired, when the shells would explode and fragments be scattered over an extended area. The ride guns used during the war varied in caliber from the three and one-half inches to six and one-half inches, their proje tiles from twenty pounds in weight to one hundred pounds, and their powder charges from two to ten pounds.

Efforts were made for many years to produce breech-loading rifle guns of large caliber, but the mechanical difficulties of manufacture and failure to find a material strong enough to withstand the destructive pressures of large charges of powder were not overcome until within the past ten years. The guns being built for the new cruisers represent the most advanced types of their respective calibers. They are made of forged steel and are of the built up pattern, or composed of a numpieces. There is first a tube which forms the bore and powder chamber; over the rear end of the tube and extending nearly one-half the length of it is shrunk a jacket, and over both jacket and tube are shrunk strengthen ing hoops of a high grade of steel. The breech is closed by a plug on which a heavy screw thread is cut; one half of th's thread is removed, a corresponding thread is cut on the inside of the rear end of the jacket, one half of which is also removed. The circumference of these threads is divided into six parts and each alternate part is removed, thus permitting the threaded part of the bree h plug to pass longitudinally along the renewed portion of the threaded part of the hole in the jacket, so by turning the plug one sixth of a turn the threaded portions engage each other and the plug is thus prevented from being forced to the rear, when the gun

The calibers for the guns of the new cruisers are of five, six and eight inches, their projectiles weighing seventy, one hundred and two hundred and fifty pounds respectively, and their powder charges being one-half the weight of the project le in each case. As these guns are made very long, thirty calibers, a much larger charge of powder can be burned and a correspondingly greater velocity given to the projectile. By this means the guns become much more powerful. One of the new guns of eight nches ealiber will penetrate at least sixteen inches of wrought iron, or more than can be pierced by the old tifteeninch gun.

The material, forged steel, for the five and six-inch guns is produced in the United States, but that for the larger guns is imported, though it is expected that material for the eight-inch gun will

soon be made here. In addition to the foregoing the Naval Ordnance Bureau has now in course of construction steel guns of ten and ten and a half inches caliber, and has the plans ready for guns up to sixteen inches caliber, which will be built when Congress provides the money. The ten-inch guns are to throw a projectile of five hundred pounds with a powder charge of two hundred and fifty pounds, and will pierce more than twenty inches of wrought iron, while the sixteen inch gun will have a projectile weighing two thousand pounds and a powder charge of one thousand pounds, and will send its shot through thirty-two inches of

The officers who have charge of the construction of the guns for the new war vessels are among the most skillful in the whole line of the navy. Thay have been selected because of the proficiency they have attained in this branch of their profession. The ordnance corps of the army has also made great strides in the war of improved guns, but their progress has not kept pace with that made in the navy. - Washington Cor. Ceveland Leader.

-In a dispute regarding his residence the Plain Dealer asserts that "the stinglest man in America lives in Cleveland. ie is the man who hails the newsboys, takes a paper from his hands, looks it arefully through, keeping the boy wait-

THE AVERAGE GIRL.

A Philosophical Dis ertation Upon an Interesting Top'c.

It is now confessed that cause affect all things, and that a sparrow lives under the laws of the universe just as truly as that Dante or Webster is the express on of his period. The girl of to-day is therefore a new form of human nature because new influences can not but bring about new shapes of character. The girl who is enjoying to the full the liberty of education and best form of Amer can social and home i'e is really an object to be admired. Her vivacity, her industry, her wit, her taste, her kindness are such as to compel the notice and admirat on of an anchorite. The 1 berty and equality which are the cardinal ideas of the country have helped the modern girl away from servitude just as truly as they have helped the slaves to the old yoke which they and their fathers had worn for centuries. The daughter of tifteen can converse with her father and mother and mature friends. Fear has departed without taking away modesty and without bringing in a reign of egotism and disrespect. Terrori m was always a blemish in society, whether it existed between man and servant, husband and wife, or parent and child. Force is the law of brutes, and hence terrorism belonged to the brute kingdom and came into man's world in times when the wall was not high between the animal and the human. The educated : id of to-day overflows

with affection toward her parents. Sharp words, fearful reprimands, are unusual. The child so fully desires to do what the pare t wishes should be done that the home-life is a constant flow of companionship and affection rather than the eternal reign of author-

The girl of to-day, with rare exceptions, is industrious and with a breadth of invention and execution. The ironical and often mean essays on the woman of the present picture her as good for little except for accompanying a Saratoga trunk on its wanderings in summer and for filling tashionable engagements in winter. Much of this sarcasm is deserved by the few, but when the millions of girls are thought of as they are ornamenting their mothers' homes in the villages and cities, the honest heart can not but confess that the word "girl" never meant more than it means to-day. This being when found in her best estate can go gracefully from her silk dress and piano to a plain garb and to work among plants or to the kitchen, or to a mis ion school class. Nothing any longer is beyond her. In the city she can easily walk three miles. Languer has ceased to be fashionable; sleep in the daytime not to be endured. The soul is thought to be action, not

All can contradict these words of praise; because all who think a moment can find exceptions in girls who are always just dead with a headache. or as averse a mummy to any kind of conversat on or activity; girls who are pleased with nothing and no-These exceptions are so disagreeable that they seem to mar the whole world and make the beautiful characters invisible. In matters of this kind one can only offer opinions. One dare not assert with confidence. At a popular summer resort where quite a number of these sixeen-year mo tals were met and oberved da ly, it appeared in evidence and in common fame that to be full of obelience toward parents, of kindness toward a l persons and things, to be industrious to be full of laquiry and rational tark, was not the exception, but the average of condition.

Why should a few girls of marked vanity and of giggling tendencies cast into reproach that multitude whose hearts are as innocent as the June flowers and June birds? Much of the roin in character comes in the later years of woman when the imprudence of late dancing, late suppers and the mental anx ety and perhaps sorrows which come from the vain efforts of the heart to create a paradise of pleasure away from duty, make the cheeks fade early and the eye lose its luster in the morning like a sun that goes behind clouds before noon. As for noble g rls of sixteen, the Western Coatment is full of them. They are in the c ties, in the villages, in the farm-hou es. We meet them on all streets, along all paths, in the lonely and lovely country. They are ready for all duty and happiness, and const tute to all us older and fading hearts the most beautiful and divine scene on earth. - Dabid Swing, in Current.

THE PROFESSION.

A Woman Who Was Guilty of Unprofessional Conduct.

In driving out into the country on the Grand River Road a few days ago, a Detroit lawyer encountered a horse and buggy driven by a woman. As she was driving on the wrong side of the road he made up his mind not to give up his rights. As a consequence the two borses finally came to a standstill with their noses rubbing each other. The lawyer stared at the wo man, and the woman stared back. Then be pulled a newspaper from his pocket and began reading. In a minute she had her kni ting out and was industriously at work. Ten long min utes in a broiling sun passed away, and the lawyer looked up and asked:

"How long are you going to stay

"How long are you?"

"All day."
"And I'll stay here a whole week." He read and she knit for another ten minutes, and then the lawyer called

"Do you know that I'm a lawyer?" "I don't care for that," she replied; 'I'm the wife of a Justice of the

"Oh-ah-excuse me, madam. Really, but if I'd known you belonged to the purie-h this would not have happened. Take this side, madam take the whole road!"

Oh, no no, no! I'm sorry I detained you. Here—drive on, and exng, and, after glean' ig what he wants tained you. Here—drive on, and ex-rom the paper, says: "Here sonny, is cuse me if I have been guilty of unpro-our paper. Don't want it; nothing in fessional conduct."—Detroit rec
