

THE EUGENE CITY GUARD.

SATURDAY, APRIL 17, 1886.

The County Convention.

Before the next week's issue of the GUARD, the Democracy of Lane county will have placed their standard bearers so far as the county is concerned, in the field. It is to be hoped that the Convention will act wisely, and put forward men for the different positions whose reputations for honesty and qualifications for the positions to which they may be called by the voice of the people, are unquestioned. The legislative portion of the ticket, especially, should be filled by men with broad views and with some business experience. They will be called upon to enact measures which will materially affect our future prosperity both in county and state. It is not only essential to have men, who, if elected, will vote right on those questions which so materially affect our interests, but their capabilities for personally promoting and influencing legislation should be considered.

In the selection of men for county offices, fitness should be specially considered. The affairs of the county should be honestly and economically administered, and to obtain this result in which all, irrespective of party are interested, the candidates for county commissioners particularly should be men of firmness, capable and willing to conduct the business of the county, as they would their own.

The sectional issue should have no weight with the convention. Many times a weak man, who is certain of defeat, will be nominated because by accident he happens to live in a certain locality; while a candidate who would be elected is passed by and discarded for the same reason.

No personal feeling is observable which is certainly a favorable omen of success, and we believe that when the candidates are nominated the defeated aspirants will stand up firm and true to the nominations. The county is nearly evenly divided, and to insure success harmony must prevail.

Mr. Charles W. Johnson, who was appointed register of the land office at Roseburg on Wednesday, as announced in the Oregonian's dispatches, has been a resident of Portland for three years, during which time he was engaged as head book-keeper for W. S. Mason and Mason, Ebraim & Co. Mr. Johnson is a brother of the late George Penn Johnston, the well known Pacific coast journalist, who died in San Francisco in 1883. He is a good citizen, a Democrat to the backbone, and will make an efficient officer.

More than nine thousand bills have already been introduced into the Forty-ninth Congress; more than seventy-two hundred in the House alone. Yet there are no signs of the end of this session and next December more bills will be in order. Perhaps one in a hundred of those thus far introduced may become laws. It seems a waste of time to accumulate such a quantity of material with which to block the files of committees and overload the calendars. But it would be a less harmless use of time to pass the greater part of these measures.

George Hearst, the new senator from California, is the largest mine owner in America. Among the mines in which he is interested are the Ontario, the Homestake and the Anaconda, which give employment to nearly 3,000 men. They are all dividend paying and have been managed with the greatest skill. The Ontario, which is located in Utah will pay its one hundred and second dividend soon, making an aggregate for this mine alone of \$6,100,000 in the way of dividends.

The Republicans are ostensibly united from a common hostility to the administration. But they are without any distinctive issue upon which an appeal can be successfully made to the country, and they are divided on every question of public interest sufficiently to create factions and to prevent harmonious action in Congress or out.—N. Y. Sun.

The four-masted schooner Novelty, built at North Bend by Simpson Bros., was launched at Coos Bay a short time ago. She is 170 feet long, 40 feet beam and 14 feet depth of hold and will carry 800,000 feet of lumber. She is the first four-masted schooner built on this coast and has no bowsprit, while her masts are all one piece, no topmasts whatever being used.

Hon. Roswell P. Flower, of New York, interviewed at Denver, complimented the President and declared him to be more than holding his own; in fact, to be gaining in popular esteem every day.

The tactics of the Bell Telephone Company, one of the most brazen faced monopolies of the land, for low-lived mean ness would do credit to the devil himself. Persistently, ferociously and without a single thought of honor, truth or conscience they have sought to smirch Attorney General Garland whose only offense is that of being unfortunate enough to own some stock in a rival company, and have subsidized the press to a large extent, threatened and intimidated the President, filled the land with unblushing falsehoods and as far as possible turned hell upside down and wrong side out in their infamous efforts to hold to the spoils of robbery and the ill gotten privileges which were stolen from the rightful owners. At least that's the way we look at it, and we admire the pluck of President Cleveland who insists that neither he nor his administration can be bulldozed by such a gang.—Independence West Side, Ind.

In the United States every two hundredth man takes a college course; in England, every fifth hundredth; in Scotland, every six hundredths, and in Germany every two hundred and thirtieth. The United States is the only country in the world which spends more upon education than on war or preparation for war.

Why does not some one make the remark that the world-wide business depression is caused by the payment of the rebel debt and for the slaves emancipated. Let the woful lamentation be made and then give reasons why and how the calamity is to come about.

It would be a great mistake to make any change in the tariff that would reduce the wages of American workmen to the level of the French artisans, who are "protected," whose pay is something like sixty per cent. less than is received in adjoining Free Trade countries.

In the contest for chess championship between Steinitz and Zukertort, Steinitz lost four successive games and was considered to be practically out of the contest. But Zukertort broke down under the continued mental strain, and toward the last fell an easy victim.

D. P. Thompson, of Portland, states in Washington that the Oregon Short Line will soon survey a road through southeastern Oregon to the Willamette valley and thence to Portland. He has some connection with this company and says the road will soon be built.

The fact that the depression in business is felt in every country in the world whatever their commercial policy whether free or "protective," would carry to men of the smallest minds the conviction that the moving cause is not in these matters.

Say what you please, the present tariff is a Republican measure and 75,000 men are out of employment, the manufacturers are importing paper labor and "elevating American labor," which does not take kindly to the process.

The three European countries that pay the highest wages are all Free Trade countries. They are the wealthiest nations on the face of the globe and they are not scared either by "the howls of anti-monopolists."

The European country the least progressive, in which the accumulation of wealth is slowest, in natural resources the first in the world, cherishes a protective tariff and pays her workmen the lowest wages.

Two feet of snow on the 6th of April in Detroit, Michigan, sounds queer to a resident of this favored locality, where a slight frost makes us shiver and wonder when warm weather is coming again.

De Lesseps in a speech at Nazaire, France, recently said: "I say that nearly half of the canal is finished. We promised that the canal should be ready in 1889."

If even the private papers of the president must be made public, what inconsistency is it for the Republican Senate to hold secret sessions.

The National debt was reduced \$14,000,000 in the windy month of March.

The Senate has relapsed into a state of "innocuous desuetude."

Over 1,000,000 ties have been ordered for shipment to the terminus of the California and Oregon railroad, where active construction is now going on.

Bacon's HAMBLETONIAN. A Safeguard. The fatal rapidity with which slight Colds and Coughs frequently develop into the gravest maladies of the throat and lungs, is a consideration which should impel every prudent person to keep at hand, as a household remedy, a bottle of AYER'S CHERRY PECTORAL.

THIS HIGH-BRED TROTTER STALLION will stand at Eugene City the coming season. PRINCE—Hambledonian is by Hambledonian Jr., or Fitch's Hambledonian, he by Rysdyk's Hambledonian, which is the head of all great trotters.

NOTICE TO CONTRACTORS. BY VIRTUE OF AN ORDER OF THE County Court of Lane County, Oregon, made and entered of record at the regular March term thereof, 1886, I will, at public outcry, at 1 o'clock P. M., on Thursday, the 29th day of April, 1886, let to the lowest responsible bidder the contract to make a grade around "Plymouth" rock, on the right bank of the Siuslaw river, and also around "Wild Cat," on line of the survey of the county road, and said grades to be all on rock bed foundations where rock exists, and the raise in grade in rock work to not exceed 12 inches in any one rod, and road-bed to be at least 10 feet wide and at least two feet above highest water mark, reserving the right to the County Court to reject any and all bids.

Ayer's Cherry Pectoral. Is not a new claimant for popular confidence, but a medicine which is to-day saving the lives of the third generation who have come into being since it was first offered to the public. There is not a household in which this invaluable remedy has once been introduced where its use has ever been abandoned, and there is not a person who has ever given it a proper trial for any throat or lung disease susceptible of cure, who has not been made well by it.
