

NEWS SUMMARY.

Events of a Week in a Condensed Form.

Pacific Coast. A hunting party recently killed rabbits near Hanford, Cal. Halibut are being caught in large numbers near Port Townsend, W. T. Columbia river fishermen have fixed the price of salmon for canneries at 60 cents each. A mine of nearly pure carbonate of magnesia has been discovered near Yreka, Cal., one weighing 700 and 800 lbs. The total orange shipments to date from Southern California aggregate 1200 carloads. There is a demand for miners at Yreka, Arizona, and all reliable men can secure employment. Over 4,000 bales of hops have been shipped from Tacoma, W. T., since the reduction in freight rates. The Auditor of Whitman county, W. T., issued receipts for over 3,000 seals one day recently. The salt producers of California protested against the proposed reduction of duty on that article. Joint stock Agricultural Association was organized at Ellensburg, W. T., with a capital of \$50,000. Mary R. Wells, of Rock creek, committed suicide while suffering from a temporary aberration of the mind. Justice of the Peace of Yavapai county, Arizona, sued a man for debt who was about to try the case himself, but was prevented. The Supreme Court of Oregon has decided that the registration law passed at the last session of the Legislature is constitutional. Davenport has secured a \$200,000 contract to construct a tramway from the head of navigation on the Snake river to Wardner on the Snake Fork. Convicts in the Yuma (Arizona) prison struck on account of some fancied injustice in their treatment, and a committee of Arbitration has the matter in hand. The City Council of Walla Walla and the County Commissioners have appropriated money necessary to purchase 160 acres for Penitentiary grounds near that city. John Bennett has been awarded a contract to do the work of grading, grading and tracklaying on the Spokane & Palouse Railroad to Farmington. Work begins at once. The San Francisco hotels are reaping a harvest from the unexpected number of visitors from the East. Many are compelled to turn away daily for want of room to accommodate them. The Canadian Government is considering a plan to subsidize a line of ships on the Pacific Ocean. It is expected the Government will grant a subsidy of \$500,000 for ten years on the proposed line. Scholars entered St. Joseph's Catholic Church at San Jose, Cal., and saw several hundred medals, crucifixes, a brass crucifix and two censures. Most of the articles appeared to be of gold and silver, but with the exception of one and parts of the monstrances were of brass. Eastern and Foreign. Several villages in Berlin have been destroyed by floods. The French Government is discussing emigration. The Postoffice building at Minneapolis, Minn., was destroyed by fire, and \$75,000. A cyclone passed over Nodaway county, Mo., killing three persons and destroying many others. The Earl of Shaftsbury, while riding in a cab at London, drew a revolver and fatally shot himself. Louis C. Wilcox, a well-known broker of New York city, committed suicide with a pistol. Twenty-four persons were drowned in the wrecking of the steamer Taora at Wellington, New Zealand. Three men from Nacosari, Mexico, reported that two American prospectors were killed by Indians near that place. Alexander Balfour, head of the great shipping house of Balfour, Guthrie & Co. died at his residence in Liverpool. The Governor of Tennessee has appointed W. C. Whitehouse to succeed Jackson as United States Senator. William Barton, a live-stock dealer from Edward, Ontario, walked off a train while asleep and was killed. Coal strikers were found guilty of criminal conduct during the recent disturbances at El Paso, N. M., and sentenced to ninety days in jail. Flood and Sauk Rapids, Minn., were swept by a terribly destructive flood. Over 100 persons were killed and several hundred were wounded. The City Council of St. Paul voted to aid the sufferers, and commissions have been sent from various places. Care of Violent Purgatives. The Simmons Liver Regulator in small quantities will do just what you need. It can be taken with regularity by the oldest person or the youngest child, and all those whose systems have become debilitated. Millions of people have been benefited by the use of this medicine with the utmost confidence in its safety and efficacy. It is a safe and efficient medicine, and has never been tried and found to be unsatisfactory and pleasant remedy for the life as Simmons Liver Regulator. H. HATNER, St. Louis, Mo.

MAKING HOUSEKEEPERS.

A Chicago Institution Which Gives Practical Instruction to Girls. Miss Bentley gave an exhibition of her garden pupils recently. The class consisted of twenty-four little girls, ranging in age from twelve to fifteen, and representing almost every European country. Their long, white pinafores, fluted muslin caps, and prim little ties gave them an appearance that was very refreshing. They entered the room in single file to a military march, carrying miniature tables and boxes. In the latter were linen, cutlery and small table furniture. Brought to a halt, Miss Bentley put the little housewives through a catechism of domestic literature, from which the following quotations were caught: "How often should a room be swept?" "Thoroughly once a week," answered a wee bit of a Swede with a voice bigger than herself. "What kind of a broom is best for the corners and edges of a room?" "Whisk broom," sang out a maid with yellow pig-tails, who seemed to be having her throat sawed by the well-laudered tie under her chin. "Why is a dust rag better than a feather duster?" "Because the feathers scatter the dust instead of gathering it," and such queries of similar practicality. After this part of the programme the girls took out their little table cloths, the piano struck up a series of popular tunes and the board was spread in a manner that was calculated to charm an epicurean. Before the little beds were made the class had an oral recitation, one question being: "What three things are necessary for nice bed making?" The answer being: "Level mattress, smooth clothes and square corners." Then the mattresses were whipped into shape, the pillows knocked in form and in an incredibly short time every bed was as flat as the nap on a fifteen-dollar ulster, and the children retired under a murmur of applause. On their return they carried trays, with which they went through a series of pretty maneuvers, the words being suggested by the trio in "Patience." Dishes were washed, and after the place was "tidied up," brooms were used for an exercise in calisthenics. It is needless to say that the exhibition was enthusiastically received. The little girls have been under the instruction of Miss Bentley for the last two years, the school session being held Saturdays only. As soon as her pupils have completed the prescribed course it is the teacher's intention to provide each graduate with a position in some first-class family, where the intelligence of the girl will be appreciated. A feature in the course is compulsory education, no pupil being allowed to take a diploma who is not able to read, write and understand enough arithmetic for practical economy. - Chicago Tribune.

HINTS ON HYGIENE.

May Children Go Barefoot Without Injury to Their Health? This question is every now and again proposed for discussion; and when it is so, we are compelled to give the same answer. On physiological grounds, it is manifestly a sound practice to accustom children to develop the circulatory and muscular systems of the lower extremities, precisely as those of the hands are developed, by free use and exposure. It is not supposed to be either necessary or desirable that children should wear gloves for hygienic purposes. When the hands of little folks are thus decorated, the parental idea is confessedly to give them what is conventionally regarded as a genteel appearance. No one thinks a child ought to be protected from the weather, so far as its hands are concerned. On the contrary, it is recognized that the upper extremities should be kept warm by exercise and habitual exposure. Precisely the same view holds good with regard to the lower extremities. Contact with bodies that abstract heat, even more than the earth abstracts it, is an almost constant condition of child-life. In short, it is entirely in deference to fashion and the usages of society that children wear foot coverings. There is much to be said in favor of a more natural practice. The foot is an organ of wondrous complexity, regarded as a bony and muscular apparatus. It is, moreover, provided with nerves and blood vessels of especial intricacy. The softest and most flexible shoe to a very great extent, and a boot almost entirely, reduces this organ to the character of a jointed block with little self-movement. Obviously this reduction must detract not only from the efficiency of the foot, but of the organism as a whole. If the foot and leg are fully developed, as they can only be when the foot is habitually exposed, the quantity of blood which the lower extremities can be made to receive, and, if need be, attract for a time, is very considerable. We can only say that children who are allowed to go barefooted enjoy almost immunity from the danger of "cold" by accidental chilling of the feet, and they are altogether healthier and happier than those who, in obedience to the usages of social life, have their lower extremities permanently invalidated, so to say, carefully swathed and put away in rigid cases. As regards the poorer classes of children, there can be no sort of doubt in the mind of any one that it is incomparably better that they should go barefooted than wear boots that let in the wet and stockings that are nearly always damp and foul. - London Lancet.

THE INDIAN STOREHOUSE.

A Hut Designed for the Preservation of Dried Fishes and Game. Upon the plantation and near the residence of Colonel Seaborn Jones, known as Mill-Haven, in Screven County, Ga., may be seen, in excellent condition, one of those structures at a remote period in general use among the Southern Indians, and designed for the temporary preservation of dried fishes and game. For quite a century and a half it has maintained its identity. It is located upon the declivity of the right bank of Briar creek, in proximity to that stream, and in the midst of a beautiful forest of oak, holly and pine. Cylindrical in shape, this receptacle has a diameter of eighty feet, and is about six feet deep. The excavation in the ground was at first carefully and regularly made; and when completed its sides and bottoms were covered with a uniform layer of well-kneaded red clay four inches in thickness. These clay walls, the interior surface of which were pressed hard and smooth—are still nearly perfect. As one looks upon the structure it presents the appearance of a huge cylindrical terra-cotta vessel set into the earth. To Briar creek, and especially to this neighborhood, did the Creek Indians resort to fish and hunt. The adjacent bluffs and fields give token most abundant of former and long-continued occupancy. Village sites may still be recognized, littered with fragments of earthenware flint chips, spear and arrow points, scrapers and other objects of primitive manufacture. Even now this stream abounds in fishes, turtles and alligators; and its dependent swamps at an early period were filled with wild turkeys, deer and other game held in repute by the natives. Doubtless, during the use of this receptacle, it was furnished with a roof or covering which long since perished. It is probable that in it were stored from time to time the fishes caught by visiting Indians. These, having been previously dried, they accumulated until the season arrived for the homeward journey, when they were removed and transported to the permanent abodes of their captors. Physical proofs of the prior occupancy by the red race of our region are each year becoming more indistinct, and it is hoped that care will be exercised in the preservation of this interesting object. - Augusta (Ga.) Chronicle.

TELEPATHY.

A Subject Which is Agitating Its Devotees in England and America. The subject of telepathy, or the action of one mind upon another, irrespective of distance, is attracting attention in Philadelphia as well as in London. A singular incident occurred a few evenings since, which shows that if there is nothing in telepathy there is at least something queer in coincidences. Dr. J. J. Leveck was sitting in his library talking to a friend, and incidentally the subject turned upon telepathy. He had been illustrating it by anecdotes of what he had noticed in hospital practice, and in this way the subject of the great fire of 1850 in Philadelphia was brought up. He spoke of the fact that it originated from the explosion of saltpeter in Brock's warehouse, and remarked: "This gave rise to the question, will saltpeter explode?" He had not spoken or thought of this matter before for twenty years. The conversation reverting to telepathy was explained by saying: "Now, if what we are talking about should be interesting another mind, as there is nothing to suggest it, that would be telepathy." The conversation broke up about midnight, the friend going home and Dr. Leveck retiring. The next day each accidentally took up an evening paper and read the following paragraph: "There used to be a much-voiced question in Philadelphia as to the explosive nature of saltpeter, growing out of the explosion at Brock's store, in Water street in 1850. Now that a brewery has been blown up by an explosion of oat meal, the old question comes up in a new form: 'Will lager beer explode?' While they were talking some one, unknown to either of them, was penning the paragraph in question. - Philadelphia Times.

Spontaneous Gratitude.

Scene in a street car—Seats all occupied. Enter young lady. Young gentleman rises and offers his place. Young lady slams down into it. Young gentleman (inquiringly)—"I beg pardon?" Young lady glances at him silently. Young gentleman unbuckles his overcoat and produces an amphiphone. Grasping it firmly in his teeth he bends forward in bland but resolute expectancy. Young lady gives up the struggle, yells "Thank—s—s!" and leaves the car at the next crossing. - News-Letter.

O. & C. E. TIME TABLE.

Mail Train north, 9:41 A. M. Mail train south, 2:30 P. M. OFFICE HOURS, EUGENE CITY POSTOFFICE. General Delivery, from 7 A. M. to 7 P. M. Money Order, from 7 A. M. to 5 P. M. Registers, from 7 A. M. to 5 P. M. Mails for north close at 9:15 A. M. Mails for south close at 1:30 P. M. Mails for Franklin close at 7 A. M. Monday and Thursday. Mails for Mabel close at 7 A. M. Monday and Thursday. Mails for Cartwright close 7 A. M. Monday.

SOCIETIES.

EUGENE LODGE NO. 11, A. O. U. W. Meets first and third Wednesdays in each month. SPENCER BUTTE LODGE NO. 9, I. O. O. F. Meets every Tuesday evening. WIMAWIALA ENCAMPMENT NO. 6. Meets on the second and fourth Wednesdays in each month. EUGENE LODGE NO. 15, A. O. U. W. Meets at Masonic Hall the second and fourth Fridays in each month. M. W. J. M. GEARY POST NO. 49, G. A. R. MEETS at Masonic Hall the first and third Fridays of each month. By order, COMMANDER. ORDER OF CHOSEN FRIENDS. MEETS the first and third Saturday evenings at Masonic Hall. By order of G. C. BUTTE LODGE NO. 36, I. O. O. F. MEETS every Saturday night in Odd Fellows Hall. W. C. T. LEADING STAR BAND OF HOPE. MEETS at the C. P. Church every Sunday afternoon at 3:30. Visitors made welcome.
