

A LIBERAL OFFER.

Thousand Dollars to Any Charitable Institution,

Cannot be Done as It is Stated.

West, N. Y., Union and Advertiser.

Friends of Ex-President Arthur are much disquieted.

Of course he is not going to die! He is in the hands of a very particular physician.

His doctor does not call it Bright's disease! No, it is stomach disorder.

He is suffering from now, and every few hours he takes a cold, and from time to time many other symptoms are developed.

These symptoms the public should know are really secondary to Bright's Disease.

Physicians say that everything a medical skill can do for him is being done.

This is not so!

This case is a prominent one because the general is an ex-president; yet there are thousands of farmers dying in their farm houses, secondary symptoms of Bright's disease, called by every other conceivable name; thousands of workmen, wise dying, leaving helpless families; hundreds of thousands in all parts of life who have sickened, and likewise dying, helpless victims of careless physicians.

Eight years ago a very well known physician was about to enter upon commercial transactions. His medical adviser quietly dropped into his office one day and told his confidential clerk that he would be dead in a few months, and that he ought to get up his business affairs at once!

That man is alive and well to-day, and was given up as incurable with the same disease that is killing General Arthur!

Our reporter met this gentleman yesterday, and in conversation about General's case, he said:

"I will give \$5,000 to any charitable institution in the state of New York, to be designated by the editor of the New York World, the editor of the Buffalo News and W. E. Kishburgh of the Troy Times, if Warner's safe cure (taken according to the directions) which cured me eight years ago, cannot cure General Chesapeake A. Arthur of Bright's disease, from which he is suffering."

"Now I want you to understand," he said, "that we do not profess to make new kidneys, but we do know from personal experience and from the experience of many thousands of similar cases, that we can stop the consumption of the kidneys. Many a man has gone through life with one kidney without inconvenience. Thousands of people have lived a majority of their life with one lung. They did not have a new lung made. We do not make new kidneys, but if the kidney is not consumed too much we can stop disease and prolong life if taken in time."

"This offer comes from H. H. Warner, proprietor of Warner's safe cure, of this city."

Mr. Warner also said, "My dear sir, there are governors, senators, presidential candidates, members of congress, prominent men and women all over the country whom I personally know have been cured of disease, such as General Arthur suffers from, by our Warner's safe cure, but owing to the circles in which they move they do not care to give public testimonials to the fact."

Mr. Warner is interested in General Arthur's case because he is personally acquainted with him and he thinks that it is a shame that any man should be allowed to die under the operation of old-fashioned, powerful narcotics, which have no curative effect, rather than a modern, conceded medicine for kidney disease, whose worth is acknowledged world-wide, and would save him."

"If you doubt the efficacy of Warner's safe cure," say the proprietors, "ask your friends and neighbors about it. This is asking but little. They will tell you all you want to know."

"We have kept a standing offer before the public for four years," says Warner, "that we will give \$5,000 to any person who can successfully prove the genuineness, as far as we know, of the testimonials we publish, if none have done it."

Were General Arthur a poor man, he would be left "in the hands of his physician," he would use that great remedy, as many thousands of others have done, and get well. How absurd for people to say that everything can be done is being done for the president, when the one successful remedy in the world that has cured, and can cure a case like his, has been used by them.

Talking for me.

Mr. Featherly," said Bobby at the dinner table, "what's an average?"

"An average?"

"Yes. Pa says you come to see sister a week on an average."

"Featherly was very much amused. Explaining to Bobby the meaning of the word, he said:

"I suppose you thought it was some kind of a carriage, Bobby?"

"I thought perhaps it might be a bicycle, but I knew it couldn't be a carriage, because ma says you're too mean to ride."

"Bobby," interrupted his mother, "all you have another piece of pie?"

"J. Sun."

A sensational suicide occurred at the Pa. George Welker, son of the proprietor of the Kane House, picked up a revolver and asked how a fellow who committed suicide and with remark: "Well, I guess I'll shoot myself, placed the revolver in his head and blew his brains out.—Pittsburgh

MINING NEWS.

The Sitka Alaskan says the snow in some of the mining districts of that country is from fifteen to fifty feet deep.

That remarkable mine, the Minnie Moore, at Broadford, Idaho. They now have immense bodies of ore in sight, very high grade.

A pocket was recently found by a man named Kipp, near Jayhawk, in El Dorado county, Cal., which panned out twenty-two ounces in gold.

A sale has just been perfected of Henry's diggings near Placerville. It is a gravel mining claim and sold for \$30,000 to a Chinese firm of San Francisco.

A rich strike was made in the Independence mine in Elkhorn district, Idaho, last week, and the crew has since taken out several thousand dollars worth of fine ore.

H. M. Hasbrouck is taking out some very rich ore from an opening in the Bismarck, at a depth of fifty feet. He has a very curious specimen from the place where he is working, consisting of the roots of a plant covered with horn silver. Calico Print.

The shaft of the Silver Conner mine, at Eureka, Nev., has been sunk to the 450-foot level and a drift is being sent out for the vein. The Silver Conner is the property of four miners who have been declaring dividends monthly of \$1,000 each for the past two years.

The Prescott, A. T., Journal Miner of recent date, says: John McDermott, lessee of the Lynx creek hydraulic works, came in town with \$1,800 worth of gold, taken out in a partial clean-up only of a ten days' run. They have taken out to date over \$5,000, and water continues to hold out to run a portion of the time each day.

Montana Bar was the richest diggings ever struck in the country; old-timers tell of \$200,000 being taken out of 200 feet of the bar and of a six-mile team, hauling nothing but gold, that struck on Slaughter-house Bar hill and had to be reinforced by ox teams. The miners who worked there in those days believe that the hasty and careless system of mining in use at that time let many thousand dollars run over the short flumes on Montana Bar.—Helena Independent.

The mines in the newly-discovered gold range, near Hawthorne, Nev., on the Carson and Colorado railroad, are all holding out well and are likely to become permanently valuable properties. When these mines were first struck almost the universal prediction was that the surface richness would reach no great depth. It was for this reason that Daily, the discoverer of the Lepanto, the first of the series of gold mines in this district, sold for \$30,000 what would not now be bought for \$250,000.

Active work is still in progress on the Helena, and some fine ore is being brought up by Supt. Swan and stored in the capacious ore house of the company. It is probable that this company will yet take hold of and work the Christmas Gift and may secure all the mines in the Helena district that will pay for working. And it is hinted that experts for an English syndicate have been looking over this promising group of mines during the week. The district ought to be made to produce largely by somebody. It is too promising to lie idle.

The placer excitement which broke out in Sitka just as we were going to press last week, grew out of the discovery of good gold indications in the gravel in a gulch not far from the beach at James-town bay, by Messrs. W. J. Prout and A. A. Starwalt. These gentlemen have gone down sixteen feet and struck a stream of water which temporarily stopped their work. But they are providing force pumps and will prosecute the work to a full test. The indications continue good, and they say they will find the bedrock in spite of the water or "bust."—The Alaskan.

The Baker City Sage Brush of the 6th says of the latest find: Important placer diggings have recently been discovered on Eagle creek, above where the new bridge is built. There are about four hundred prospectors in the vicinity, and they have staked out claims on both sides of the creek as high up as the snow line in the mountains. One enterprising gentleman from Boston has staked out claims for his sisters, his cousins and his aunts until he has 320 acres under his control, but the boys are considering the proposition of jumping about 300 acres of his holdings. They think the gentleman from Boston wants too much. The placers are being worked, as water is plenty, and considerable "dust" is being taken out.

Jacksonville Times: Considerable work is going on in the Gold Hill district. Prospecting continues in many places, and some excellent discoveries are reported. Ex-Governor Chadwick has been inspecting his mining interests in the Gold Hill district. D. King & Co. have struck excellent drifting diggings on Jackson creek, which are said to pay \$4 per hand daily. The Bedford Reduction works are making a run on ore from the New Discovery mine, which promises well. Bedrock was struck in the Sterling mine a short time since, and everything is progressing satisfactorily there. L. D. Brown has put a quartz mill in the vicinity of Swinden & Co.'s ledge in Rock Point precinct, which will soon be running in good style.

Helena Independent: There are signs of an active season of mineral operations in Red, Lee and Bald mountains, which promise a great increase in the districts immediately tributary to Helena. The Red Mountain Consolidated Tunnel company has penetrated with their tunnel, some seven hundred feet in the side of the mountain, and the work is progressing as rapidly as possible. Mineral has been reached which promises to penetrate a rich ore body soon. The company insist that if there is anything in the Red mountain they will certainly find it in their tunnel operations. The Peerless Jennie is in fine shape for working, and there are millions in it beyond question, for there is more than a hundred thousand dollars of ore on the dump. The Caplice-Tate company on Lee mountain have large ore bodies in sight, but are not placing it on the dump, awaiting the completion of the Montana Central to save a second handling. Development on the Hot Springs lode brings better results daily. Messrs. Scott and Fallon of the U. P. made a visit to the mine a few days since and brought in a sample which they submitted to Assayer Gove, who makes the following return: 61 per cent lead, 131.95 ounces, 23.33 oz. gold. Total, \$663.15. This and other assays, and the generally favorable outlook encourages the company to push developments as rapidly as possible and the working force will soon be increased and the tunnel started from the gulch to intersect the central shaft.

CONGRESSIONAL.

LATEST TELEGRAPHIC REPORT.

A Synopsis of Measures Introduced in the National Legislature.

SENATE.

The consular and diplomatic appropriation bill was taken up and passed. Senate confirmed the nomination of Governor Swineford of Alaska.

Berry, from the Committee on Public Lands, reported favorably Senator Stanford's bill granting Seal Rocks to the city of San Francisco, in trust, with an amendment identical with that reported by the House Committee to Representative Felton's bill for the same purpose. The amendment gives the United States the right at all times to control or limit the number of seals taken, to protect fisheries, and provides that whenever any of the rocks or space occupied by them shall be required by the United States for erection or maintenance of any public work the United States shall be reinstated with full control, title and possession of such rocks or space.

After a long debate a bill was passed providing for a commission of three persons, to be appointed by the President, with the consent of the Senate, to investigate the truth of the alleged discovery of a specific cure of yellow fever.

Logan introduced a bill in the Senate to provide for the location and erection of a branch home for disabled volunteer soldiers west of the Rocky mountains. It appropriates \$150,000 for the purpose.

Among measures passed were the following: Bill to relieve the State of Colorado from charges on account of ordnance stores furnished to the Territory and State, amounting to \$33,081. Bill providing for the purchase of a portrait of General Geo. B. Thomas. Bill to establish a new Land District in Wyoming. The bill constitutes the counties of Johnson and Crook, in that Territory, a new Land District.

Bill to legalize the incorporation of national trades unions.

Bill amending section 3,893 of the Revised Statutes, relating to the transportation of obscene publications through the mail. The bill extends the scope of the old section.

Bill authorizing the payment of \$2,500 to Mrs. Louisa A. Jackson, and \$2,500 to the legal representatives of Mrs. Martha Vaughn for patriotic services rendered and hazards and losses incurred in conveying information of great value to Union officers in Kentucky in 1863.

Bill relating to the Supreme Court of the Territory of Montana and providing for the establishment of Judicial Districts in that Territory. The bill makes the Court to consist hereafter of a Chief Justice and three Associate Justices, to hold office for four years. The Territory is divided by the bill into four Judicial Districts.

Bill to create two additional Land Districts in the Territory of Dakota. This bill authorizes the President to appoint a Register and Receiver for each District.

Bill referring to the Court of Claims claims for property seized by General Johnson in the Utah expedition of 1857.

The Chair laid before the Senate a message from the President, with a letter from the Secretary of State, in relation to the distribution of the fund for relief of the owners, officers and crew of the boat Gen. Armstrong.

The agricultural appropriation bill was taken up and passed. It includes an amendment offered by Dolph, appropriating \$5,000 to aid in reclamation of the arid region in Washington Territory by sinking artesian wells.

Among memorials presented was one by Miller, from the Congress of Workingmen's Clubs of the United States, praying for the passage of the bill establishing postal savings banks.

Beck called up his bill to prohibit members of Congress from accepting retainers or employment from railroad companies which have received land grants or pecuniary aid from Congress. The bill passed—aye, 37; noes, 11.

HOUSE.

Cobb moved to suspend the rules and pass the bill repealing the pre-emption, timber culture and desert land Acts. Cobb and Payson supported the bill, and referred to frauds which had existed, as they averred, in entries of lands under the Acts which it was proposed to repeal, Payson declaring that during the past four years 90 per cent of the entries had been fraudulent.

Henley of California, opposed the bill, on the ground that while the desert land should be amended it should not be absolutely repealed.

Springer of Illinois said that under the pre-emption, timber culture and desert land laws vast areas of the public domain were being fraudulently appropriated by cattle syndicates and foreign land grabbers. An English lord had recently acquired 6,000 acres in Este's Park, Colorado, and this was but a sample of the manner in which the public domain was being taken up. If this bill were passed, the people's land would hereafter be held for people's homes.

On motion to suspend the rules and pass the bill was agreed to, yeas 183, nays 40.

Delegate Voorhes of Washington Territory has introduced a bill which gives the Olympia Improvement Company the right to build a dam across Budd's Inlet, in the city of Olympia, on plans to be approved by the Secretary of War. The dam is to be provided with locks and draw for the passage of vessels, with a waste-weir for the passage of logs, and a fish-weir. It provides that Congress shall make an appropriation of \$20,000, to aid the enterprise.

MELODIOUS SNORING.

The Aw-inspiring Night Performances of My Dearest Friend.

I have a friend who snores. My friend's snore is like himself, whole-souled, self-satisfied, meticulous, able-bodied—in fact, the kind of snore that leaves absolutely nothing to the imagination. In my opinion my friend's snore is not equaled in this part of the country, and I ought to know for I've sat up with it nearly every night since it was a shrill treble snore in kneecaps, watched over it with more or less tender solicitude during the trying period in which its voice changed and its mustache sprouted, and celebrated its arrival at the fullness of its deep baritone maturity by congratulating the other members of my friend's family upon their fatal connection with a steamboat explosion early in the fifties. I say I have sat up with my friend's snore all these years out of regard for the truth. My friend and I have always roomed together and always occupied the same bed, but never slept together; he slept, but I didn't; I lay awake to hear him snore. My temperament is artistic in the extreme. Nothing inspires in me such profound reverence as a thoroughly perfect and artistic achievement of any kind, therefore nothing could induce me to fall asleep during the progress of the symphony which my friend nightly performs in his nasal organ. Symphony is a good word. It defines the situation exactly. My friend's snore is not, like that of ordinary individuals, a series of aimless vibrations of the uvula; it has an object in view. It is a symmetrical and well-regulated performance—certain rises to slow music, and when the climax is reached, curtain falls in a blaze of green light with plenty of thunder and lightning. Each performance consists of one act only, which invariably commences about an hour after my friend has retired and continues till his alarm clock has awakened him to a remembrance of those minor duties which the day demands of him.

The steamboat explosion above referred to is the circumstance which brought all these facts within my grasp. On account of this painful incident, my friend, at the tender age of three and a half years, became an orphan. Unable to penetrate the misty veil of the future, my father, who happened along at the time of the explosion, did not leave the boy to perish among the debris of the ill-fated boat and worse-fated passengers, but fished him out and warmed him in the bosom of his family. Thus at a tender age we were thrown together, and despite the orphan's infirmity, which was not long in coming to the surface, we became firm friends. The scenes of our youth were the rolling prairies and virgin forests of Minnesota, and our companions, born necessity, chosen from the youth of the neighboring friendly bands of Sioux and Winnebagos. Ere we were out of our teens the pipe of peace was had smoked with these bands was broken into a thousand pieces and the fragments drenched with blood. The blow came without a moment's warning, and the day before it fell will still be vivid in our memories where recollections of other days have vanished. How distinctly I recall each incident of that memorable day as, now at midnight I recline on one elbow and gaze upon the face of my snoring friend! The curtain has just risen, and more plainly than words, the pleased expression on my friend's face, and the peculiar gurgling cackle which apparently issues from the neighborhood of his epiglottis, recalls to my mind a wigwam on the bank of a river. I am reclining in the shade while my friend assumes himself by taking various liberties with the embryo warriors in different stages of nakedness and dirtiness, who swarm about the wigwam. At one a. m. the pleased expression is still on my friend's face, but he has drawn out another stop and the windows begin to rattle cheerfully. As plainly as I can view the phenomena going on in the region of my friend's larynx my mind's eyes seem to seize one of the dirtiest of the young savages, and holding him by the heels, some him, kicking and whooping, in the river. At three a. m. the occasional bits of plaster which fall from the ceiling, again freshen my memory, and I see distinctly the fast and furious fun my friend is having with the little savages on the river bank. For an instant something seems to stick in my friend's throat. He is pulling out another stop. The pans and plates in the kitchen rattle in sympathy with the result, and the expression of my friend's face becoming more serene, I notice an ill-favored squaw emerge from the wigwam brandishing a huge knife. Another stop and the loud pedal. Bless me, how the bed groans and the foundations of the house tremble! Then scowling braves follow the squaw and draw their knives. My friend suddenly realizes his danger and flies, pursued by the braves with drawn knives. Good Heavens! My friend's entire anatomy must be lined with boiler iron! The savages are gaining on him—a chrome is shaken from its moorings on the wall. My friend stumbles—he falls—the savages are upon him!

The alarm clock goes off and the curtain falls.

"I feel as though I'd been dreaming," my friend mutters, as he gets into his trousers. I answer him not a word, but sink exhausted on my pillow, and sleep the sleep of the innocent till the sun is high in the heavens.—Curtis J. Dunham, in Current.

A very interesting discovery is said to have been made by the experts who are now examining the collection of papyri, consisting of many thousand rolls, which were found at El Fayoum, in Egypt, and were acquired by the Archduke Bainer. The experts declare that among the relics are several autograph letters of the prophet Mahomet.

Chief Engineer John R. Cantlin, of the Philadelphia Fire Department, says that he was cured of a terrible cold by Red Star Cough Cure, and that he has given it to his men with most satisfactory results.

Mr. Wesley Sisson, a well-known lawyer of Chicago, was so helpless with sciatica and inflammatory rheumatism that he could not feed himself. Nothing relieved his sufferings until he used St. Jacobs Oil. It conquered all pain and he rose a cured man.

YOUR HEART'S BLOOD!!

Do You Wish to Die, or Will You Live and Enjoy Life?

It is hard for most people, who are not in perfect health, to realize that they are ill, and it is only when the disease, which may have been long in developing itself, suddenly causes a general break-down of the system, that they send for a physician and seek to recover what they have lost through neglect. In many cases the neglect is pardonable, for the reason that comparatively few persons know enough about their own bodies and the diseases to which they are liable to tell what is the nature of the slight indisposition which they may feel, or to realize the consequences of delay in procuring a restoration of health. In no class of diseases is it so difficult for an ordinary person to realize the danger he is in as in those of the heart, which are so insidious in their approach and development that they readily escape detection until life is in danger. But by those who have informed themselves upon the subject, the slight symptoms by which heart disease makes its presence known are readily recognized, which enables them to apply the proper remedy long before the disease has progressed so far as to render sudden death possible at any moment. Dr. Flint's "Treatise on Heart Disease" has been written with a view of enabling any person who so desires to become familiar with diseases of the heart and kidneys and the other nervous affections to which they give rise, thereby putting it in the power of everyone to recognize the significance of symptoms which would otherwise have no meaning.

The extent to which heart disease has been developed by modern life, the wear and tear of business and the abuse of such articles of general consumption as tea, coffee, alcoholic liquors and tobacco, has rendered it desirable that the public should be informed of the dangers which surround them on every side, of the fatal diseases to which all are exposed, and from which few escape, of the signs by which they may be recognized, and of the methods by which they may be cured. All this has been clearly set forth in Dr. Flint's Treatise, wherein it is also shown why Dr. Flint's Heart Remedy became a specific for all kinds of heart disease, and affections arising from it, and how its use must necessarily prolong life by rendering sudden death from heart disease almost impossible. A clear understanding of the physiology of the heart and the nature of the diseases to which it is subject, will make it clear that heart disease can be cured if the proper remedy be applied, and the only proper remedy is that which reinforces nature in her efforts to expel disease. This Dr. Flint's Heart Remedy does, and the way in which it acts is fully explained in the treatise above mentioned.

There are few people who know that nearly every case of rheumatism is followed by heart disease; that tobacco so thins the walls of the heart that they become hardly thicker than this paper; that tea and coffee give rise to serious heart affections; that consumption, pneumonia and kidney disease are often caused by disease of the heart; that a slight pain in the left arm or shoulder, a tendency to faintness or dizziness, a shortness of breath upon exercising, a faint sense of weight or uneasiness in the chest, are signs of serious disease of the heart. Yet your physician will tell you all this is true, and will show you the report of hospitals in which it is shown how great a proportion of their inmates are afflicted with heart disease, due to these causes producing these effects and manifesting these symptoms. Yet the foregoing gives but a glimpse of the wide range of heart disease, which makes itself manifest in serious and fatal disease of the brain and spinal cord, liver, kidneys, stomach and intestines, consequent upon the derangement of the general circulation which necessarily results from abnormal action of the heart. Thus Bright's disease, inflammation of the kidneys, diabetes, irritation of the brain, meningitis, inflammation of the brain, mania and insanity, epilepsy, insomnia, hemorrhage, head-ache, dropsy, bronchitis, asthma, pneumonia, congestion and inflammation of the liver, and neuralgia, as well as many other diseases not here enumerated, are directly caused by unsuspected disease of the heart. In these and kindred diseases a cure must be effected by restoring the circulation to the normal state, which can be done only by regulating the action of the heart, which is accomplished only by Dr. Flint's Heart Remedy in the way set forth in his treatise. Nervous diseases not dependent upon heart disease, but which derange the heart's action, are also relieved and cured by restoring the circulation to its normal condition. Thus insomnia, nervous exhaustion from worry or overwork, delirium tremens, alcoholism, shaking palsy, sciatica, rheumatism, sea-sickness, sick-headache, etc., are at once reached through the circulation and are rapidly cured.

All this is fully set forth and explained in the treatise referred to, which will be forwarded to any address by the proprietors of Dr. Flint's Heart Remedy.

J. J. MACK & CO., Nos. 9 and 11 Front St., San Francisco. At all druggists.

DR. HENLEY'S Celery, Beef and Iron gives food to the brain, enriches the blood, aids digestion, and gives refreshing sleep where other remedies fail. Try it.

Patrick Mullen was fatally crushed in a mine at Grass Valley, Cal.

FIVE HUNDRED DOLLARS Is the sum Dr. Pierce offers for detection of any calomel or other mineral poison or injurious drug, in his justly celebrated "Pleasant Purgative Pellets." They are about the size of a mustard seed, therefore easily taken, while their operation is unattended by any gripping pain. Biliousness, sick-headache, bad taste in the mouth, and jaundice, yield at once before these "little giants." Of your druggist.

Two miners were suffocated to death at Tintic, Utah, by inhaling fumes of giant powder.

Many persons think that corn is the best food for poultry. It is if you do not wish eggs. For eggs feed soft food, bran or meal, with a little salt, in the morning, and a little cayenne pepper added every other morning; corn, wheat or oats in the evening. A sole diet of corn produces too much fat.

UNDIGESTED FOOD In the stomach develops an acid which stings the upper part of the throat and palate, causing "heartburn." It also evolves a gas which produces "wind on the stomach," and a feeling and appearance of distension in that organ after eating. For both this acidity and swelling Hostetter's Stomach Bitters is a much better remedy than alkaline salts, like hartshorn and carbonate of soda. A wineglassful of the Bitters, after or before dinner, will be found to act as a reliable carminative or preventive. This fine specific for dyspepsia, both in its acute and chronic form, also prevents and cures malarial fever, constipation, liver complaint, kidney troubles, nervousness and debility. Persons who observe in themselves a decline of vigor should use this fine tonic without delay.

In Butte county, Cal., there are 102 land owners whose holdings vary from 1,000 acres to 116,000.

The "Favorite Prescription" of Dr. Pierce cures "female weakness" and kindred affection. By druggists.

Nothing reduces a man's income like a visit from an Assessor.

For Bronchial, Asthmatic, and Pulmonary Complaints. "Broom's Bronchial Troches" manifest remarkable curative properties. 25 cts a box.

TRY GERMEA for breakfast.

HUMILIATING ERUPTIONS ITCHING AND BURNING TORTURES

AND EVERY SPECIES OF ITCHING, Scaly, Pimply, Inherited, Scrofulous, and Contagious Diseases of the Head, Skin, and Scalp, with Loss of Hair, from infancy to old age, are positively cured by the CUTICURA REMEDIES.

CUTICURA RESOLVENT, the new blood purifier, cleanses the blood and perspiration of impurities and poisonous elements, and removes the CAUSE.

CUTICURA, the great Skin Cure, instantly allays itching and inflammation, clears the skin and scalp, heals sores, and restores the hair.

CUTICURA SOAP, an exquisite Skin Beautifier, is indispensable in treating Skin Diseases. Baby Humors, Skin Blemishes, Chapped and Oily Skin. Sold everywhere. Price: CUTICURA, 50c.; RESOLVENT, 40c.; SOAP, 25c. Prepared by the FRETZ DRUG AND CHEMICAL CO., BOSTON, MASS.

Send for "How to Cure Skin Diseases."

RHEUMATIC, Neuralgia, Sciatic, Sudden, Sharp and nervous pains, instantly relieved by the CUTICURA Anti-Pain Plaster. 2c.

HEART DISEASE.

DR. FLINT'S HEART REMEDY

should be used by the over-worked man of business or professional man, who worries annoy, sapping his strength and making all things ready for a sudden and general breakdown in health.

Palpitation of the Heart. Persons who suffer from occasional palpitation of the heart are often unaware that they are the victims of heart disease, and are liable to die without warning. They should tanish this alarming symptom and cure the disease by using Dr. Flint's HEART REMEDY.

Neuralgia of the Heart. Neuralgia of the Heart is a common affliction, and one which is not only extremely painful, but very dangerous. Its paroxysms can be relieved and the disease cured by using Dr. Flint's HEART REMEDY.

Warning Symptoms. Three-quarters of the sudden deaths from heart disease could have been prevented, had the victim taken warning from the symptoms and taken a proper remedy. Whenever heart disease is suspected, take Dr. Flint's HEART REMEDY.

Never Fails. Heart disease can be cured. Therefore, let those afflicted with it take hope. Dr. Flint's HEART REMEDY can be relied upon in cases of long standing, and will not fail in any case, if used faithfully.

Danger Signals. A sense of oppression or weight in the region of the heart, a slight dizziness, an irregular pulse, a preference for certain positions, are untelling signs of heart disease, and are warnings that sudden death is liable to occur. Use, therefore, Dr. Flint's HEART REMEDY.

At druggists, \$1.50. Descriptive treatise with each bottle; or address:
