TO DAM THE COLUMBIA.—Maj Jones, of the U S engineer department suggests to the legislature the scheme of damming the Columbia at the head of the narrows above The Dalles so as to cover the rapids at Celilo. A dam at the point named would have to be eighty feet high. There would have to be a canal and locks about one mile long. One danger attending the project would be in case of the dam giving away The Dalles would be flooded. The legislative committee is somewhat amazed at the proposition but are not set against it. The committee is in favor of pushing the work at the Cascades.

A cyclone of rather distinctive proportions, which seemed to come from the east, swept over this place, passed through here about four o'clock Saturday evening and from all accounts the monster started about two miles west of here and assumed the proportions of the regular cyclone on a small scale, uprooting and twisting off mammoth fir trees, totally carrying off and destroying fencing, with which it came in contact, carrying sheep into the air, striking the water from ponds, etc. It had subsided, or scattered, when it reached the town, and did no damage, further than to blow down some signs and the cap from the water tank at the planing mill and send shingles, fir boughs and other small objects through the air. A heavy shower of hail had just preceded the whirlwind. Sunday was a clear, cool day and froze quite hard during the night. Monday morning was clear but clouded up and rained about 10 P M, which continued until Tuesday evening about 8 P M, when it began to snow, consequently have about two inches of snow this morning.

EDITOR GUILD.—Please pardon the liberty I take in asking space to make an explanation which I think is due from me in justice to myself and the good people of our neighborhood. The people in this vicinity have long been annoyed by the scribbling of a fellow purporting to write Dexter and Trent items. But he reached the climax of audacity in the last issue of the GUILD, when he attempted to palm off the production signed "Who be I" as a friend and ally of "Who be I" and "Who be I" are one and the same person. And as your correspondent has been unjustly accused of writing the items signed "Who be I," as at former times he was accused of writing those signed "Who be I," I take this opportunity of vigorously denying any connection with either the one or the other, and so let "Who be I" and "Who be I" himself bear whatever glory or shame attaches to his writings. Yours respectfully, Wm. M. MILLER.

Reported Conclusion of the Sale of the O and C.

New York dispatch, Jan 19th: Negotiations for the sale of the property of the Oregon and California Railroad company to the C P Huntington interest, which have been pending for nearly three years, have been at last brought to an end by the conclusion of a definite contract between Andrew Hays, of the firm of Hays and Son, acting for the Southern Pacific company and the Pacific Improvement company. The purchase of the property by the Huntington interest will result within eighteen months in the completion of the Oregon and California road to a junction with the Central Pacific system at the California boundary, thus opening through lines between San Francisco and Portland.

The girl went home to her mother, while the defendant was taken before Justice Taylor, when he waived examination and was bound over to await the action of the grand jury in the sum of \$250, which he was unable to give, hence he will be bound until April in jail at the expense of the county.
