-Important Information: A professor at the University of Texas was explaining some of the habits and customs of the ancient Greeks to his class. The ancient Greeks built no roof over their theaters," said the professor. "What did the ancient Greeks do when it rained?" asked Johnny Fizzletop. The professor took off his spectacles polished them with his handkerchief, and pose."-Texas Siftings.

THE JUDGE CAVED.

An Experience With a Colored Representative of the Law.

As we rode out from a town in Mississippi to view a plantation a commercial traveler for a New York house expreased a desire to go along. He procured a horse and joined the party, and his company was welcomed. A mile and a half from town we came to a notice, posted on a board, and everybody stopped to read it. It was, a notice of Sheriff's sale, and the colored man who tacked it up was still on the ground. The notice was badly written and worse pelled, and the drummer laughed long and loud over "caf" for calf, "det" for debt, and "sheruf" for Sheriff.

"What's wrong wid dat notis?" asked the colored man in a very edgy voice. "It's too funny for anything," was the reply. "Some one had better go to

school "Dat's me, sah. I'm a Constable an'
I writ dat off."

"Oh, you did? Well, I hope the c-a-f will be sold."

"Yes, sah. You come along wid me,

"With you?"

"Yes, sah. I 'rest you, sah!"
"What for?"

"Contempt of court, sald! Come "Where?"

"Befo' de Justiss, sah! We'll see about dat caf!"

The drummer was advised against restance and finally permitted himself to be taken before a colored Justice nearly two miles from the spot. The Consta-ble had picked up a colored man on the way, who made and swore to a complaint, and the drummer was duly arraigned on the charge, although his Honor seemed very uneasy about it. The Colonel acted as counsel for the prisoner. When the case was ready he

"Your Honor, who is this court?" "I is, sah," was the dignified reply. "Has this man shown any contempt for you?"
"No, salt."

"Then how can you try him for contempt of court?"

The old man scratched his head, pened a law book wrong side up, and finally replied: "De prisoner am discharged, but will

his innocence, where do you get the right to put costs onto him?" asked the

hev to pay one dollar costs."
"But if he is discharged because of

Colonel. "Where do I? Why, in de lawbook."

"Which one?" "De one at home."

"I take exceptions, your Honor, and shall carry this case to the Supreme Court," said the Colonel.

"Umph! Dat alters de case. D orisoner am discharged from his fine one dollar, an' de constable am fin of two dollars for making a fool of his ed an' gettin' dis court all twisted up is if hard knot afore white folks!"-De n a Free Press.

PITH AND POINT.

INVALIDS' HOTEL SURGICAL INSTITUTE

No. 663 Main Street, BUFFALO, N. V.

Not a Hospital, but a pleasant Remedial Home, organized with

A FULL STAFF OF EIGHTEEN PHYSICIANS AND SURGEONS,

And exclusively devoted to the treatment of all Chronic Diseases.

This imposing Establishment was designed and erected to accommodate the large number of invalids who visit Buffalo from every State and Territory, as well as from many toreign finds that they may avail themselves of the professional services of the Staff of skilled specialists in medicine and surgery that compose the Faculty of this widely-eclebrated institution.

A FAIR AND BUSINESS-LIKE OFFER TO INVALIDS. We carnestly invite you to come, see and examine for yourself, our institutions, appliances, advantages and success in curing chronic diseases. Have a mind of your own. Do not listen to or heed the counsel of skeptical friends or jealous physicians, who know nothing of us, our system of treatment, or means of cure, yet who never lose an opportunity to misrepresent and endeavor to prejudice people against us. We are responsible to you for what we represent, and if you come and visit us, and find that we have misrepresented, in any particular, our institutions, advantages or success, we will promptly refund to you all expenses of your trip. We court honest, sincere investigation, have no secrets, and are only too glad to show all interested and candid people what we are doing for suffering hamanity.

NOT ALWAYS NECESSARY TO SEE PATIENTS.

By our original system of diagnosis, we can treat many chronic diseases just as successfully without as with a personal consultation. While we are always glad to see our patients, and become acquainted with them, show them our institutions, and familiarize them with our system of treatment, yet we have not seen one person in five hundred whom we have cured. The perfect accuracy with which scientists are enabled to deduce the most minute particulars in their several departments, appears almost miraculous, if we view it in the light of the carly ages. Take, for example, the electro-magnetic telegraph, the greatest invention of the age. Is it not a marvelous degree of accuracy which enables an operator to exactly locate a fracture in a submarine cable nearly three thousand miles long? Our venerable "clerk of the weather" has become so thoroughly familiar with the most wayward elements of nature that he can accurately predict their movements. He can sit in Washington and foretell what the weather will be in Florida or New York as well as if severel hundred miles did not intervene between him and the places named. And so in all departments of modern science, what is required is the knowledge of certain signs. From these scientists deduce accurate conclusions regardless of distance. So, also, in medical science, diseases have certain unmistakable signs, or symptoms, and by reason of this fact, we have been enabled to originate and perfect a system of determining, with the greatest accuracy, the nature of chronic diseases, without seeing and personally

examining our patients. In recognizing diseases without a personal examination of the patient, we claim to possess no miraculous powers. We obtain our knowledge of the patient's disease by the practical application, to the practice of medicine, of well-established principles of modern science. And it is to the accuracy with which this system has endowed us that we owe our aimset world-wide reputation of skuifully treating lingering or chronic affections. This system of practice, and the maryclous success which has been attained through it, demonstrate the fact that diseases display certain phenomena, which, being subjected to scientific analysis, turnish abundant and unmistakable data, to guide the judgment of the skillful practicioner aright in determining the nature of diseased conditions. The most ample resources for treating lingering or chronic diseases, and the greatest skill; are thus placed within the easy reach of every invalid, however distant be or she may reside from the physicians making the treatment of such affections a specialty. Full particulars of our original, scientific system of examining and treating patients at a distance are contained in "The People's Common Senso Medical Adviser." By R. V. Pierce, M. D. 1000 pages and over 300 colored and other iflustrations. Sent, post-paid, for \$1.50, Or write and describe your symptoms, inclosing ten cents in stamps, and a complete treatise, on your particular disease, will be sen't you, with our terms for treatment and ail particulars.

COMMON SENSE AS APPLIED TO MEDICINE.

It is a well-known fact, and one that appeals to the judgment of every thinking person, that the physician who devotes a whole time to the study and investigation of a certain class of diseases, must become better qualified to treat such eases than he who attempts to treat every ill to which fiesh is helr, without giving special attention to any class of diseases, it, in all ages of the world, who have become famous, have devoted their lives to some special branch of science, art, or

By thorough organization, and subdividing the practice of medicine and surgery in this institution, every invalid is treated by a specialist—one who devotes his undivided attention to the particular class of diseases to which the case belongs. The advantage of this arrangement must be obvious. Medical science offers a vast field for investigation, and no physician can, within the brief limits of a life-time, achieve the highest degree of success in the treatment of every malady incident to humanity.

OUR FIELD OF SUCCESS.

DISEASES OF DISEASES, DIABETES, and DISEASES OF DISEASES, DIABETES, and DISEASES, DIABETES, and DISEASES, DIABETES, and DISEASES, DIABETES, and DISEASES, DIABETES, and

BRIGHT'S DISEASE, DIABETES, and

KIDMEY
DISEASES.

BRIGHT'S DISEASE, DIABETES, and kindred imitadies, have been very largely treated, and cares effected in thousands of cases which had been pronounced beyond hope. These diseases are readily diagnosticated, or determined, by chemical analysis of the urine, without a personal examination of patients, who can, therefore, generally be successfully treated at their homes. The study and practice of chemical analysis and microscopical examination of the urine in our consideration of cases, with reference to correct diagnosis, in which our institution long ago became famous, has naturally led to a very extensive practice in diseases of the urinary organs. Probably no other institution in the world has been so largely patronized by suffers from this class of maladies as the old and world-famed World's Dispensary and Invalids' Motel. Our specialists have acquired, through a vast and varied experience, great expertness in determining the creet nature of each case, and, hence, have been successful in nicely adapting their remedies for the cure of each individual case.

These delicate diseases should be carefully treated

CAUTION.

These delicate discases should be carefully treated by a specialist thoroughly familiar with them, and by a specialist thoroughly familiar with them, and made (which can only be ascertained by a careful chemical and microscopical examination of the urine), for medicines which are curative in one stage or condition are known to do positive shippy in others. We have never, therefore, attempted to put up anything for general sale through druggists, recommending to cure these discases, although possessing very superfor remedies, knowing full well from an extensive experience that the only safe and successful course by a chemical and inferoscopical examination of the urine, and then adapt our medicines to the exact stage of the discase and condition of our patient.

To this wise course of action we attribute the

WONDERFUL
SUCCESS.

To this wise course of action we attribute the marvelous success attained by our specialists in that important and extensive Department of our institutions devoted exclusively to the treatment of diseases of the kidneys and bladder. The treatment of diseases of the urinary organs having constituted a leading branch of our practice at the lovalids' Hotel and Surgical Institute, and, being in constant receipt of numerous inquiries for a complete work on the nature and curability of these maladies, written in a style to be easily understood, we have published a large Illustrated Treatise on these diseases, which will be sent to any address on receipt of ten cents in postage stamps.

BLADDER DEM. STONE IN THE BLADDER, Gravel, Enlarged Prostate Gland, Retention of Urline, and kindred affections, may be included among those in the cure of which our specialists have achieved extraordinary success. These are fully treated of in our illustrated pamphlet on Urinary Diseases. Sent by mail for ten cents in stamps.

STRICTURES AND URINARY FISTULE.—Hundreds of the worst form of inexperienced physicians and surgeons, causing faise passages, urinary fistules, and other complications, annually consuit us for relief and cure. That no case of this class is too difficult for the skill of our specialists is proved by cures reported in our illustrated treaties on these maiadies, to which we refer with pride. To intrust this class of cases to physicians of small experience is a dangerous proceeding. Many a man has been ruined for life by so doing, while thousands annually lose their lives through unskillful treatment. Send particulars of your case and ten cents in stamps for a large, illustrated treaties containing many testimonials.

NERVOUS

DISEASES.

Eplieptic Convulsions, or Fits, Paralysis, or Paisy, Locomotor Ataxia, St. Vitus's Bance, Insomnia, or lability to sleep, and threatened insanity, Nervous Beblilty, arising from overstudy, excesses, and other causes, and every variety of nervous affection, are treated by our specialists for these discusses with unusual success. See numerous cases reported in our different illustrated

DISEASES OF WOMEN.

Organized, and devoted accluserity to the treatment of Diseases of Women. Every case consulting our specialists, whether by letter or in person, is given the most careful and considerate attention. Important cases and we get few which have not already baffled the skill of all the bone physicians has the benefit of a full Council, of skilled specialists. Rooms for haddes in the Invalids Rotel are very private. Send ten cents in stumps for our large Complete Treatise on Diseases of Women, illustrated with numerous wood-cuts and colored plates (80 pages).

RADICAL GURE OF RUPTURE. Illustrated Treatise

HERNIA (Breach), or RUPTURE, no matter of how long standing, or of what size, is promptly and permanently cured by our specialists, without the knife and without dependence upon trusses, Abundant references. Send ten cents for

PILES, FISTULE, and other diseases affecting the lower bowers, are treated with wonderful success. The worst cases of pile tumors are permanently cared in lifteen to twenty days. Send ten cents for illustrated Treatise.

DELICATE
DISEASES.

Organic weakness, nervous debility, premature decline of the manly powers, involuntary vital lesses, impaired memory, mental anxiety, absence of will-newer, mckancholy, weak back, and kindred affections, are speedily, thoroughly and permanently cured.

To those acquainted with our institutions, it is hardly necessary to say that the Invalide Hotel and Surgical Institute, with the branch establishment located at No. 3 New Oxford Street, Landon, England, have, for many years, enjoyed the distinction of being the most largely patronized and widely celebrated institutions in the world for the treatment and cure of those affections which arise from youthful indiscretions and permicious, solitary practices.

We, many years upo, established a special Department for the treatment of these diseases, under the management of some of the most skillful physicians and surgeons on our Staft, it order that all who apply to us might receive all the advantages of a tull Council of the most experienced specialists.

We offer no apology for devoting so much

WE OFFER No apology for devoting so much attention to this neglected chass of diseases, believing no condition of humanity is too wretched to merit the sympathy and best services of the noble protession to which we belong. Many who suffer from these terrible on doing good and alleviating suffering, should shun such cases, we cannot imagine. Why any one should consider it otherwise than most honorable to cure the worst cases of these diseases, we cannot understand; and yet of all the other maladics which affiltet mankind there is probably none about which physiciaus in general practice know so little.

We small, therefore, continue, as heretofore, to treat with our best consideration, sympathy, and skill, all applicants who are nuffering from any of these delicate diseases.

GURED AT HOME, at a distance just as well as if they were here

in person.
Our Complete and Illustrated Treatise (168 pages) on these subjects is sent to any address on receipt of ten cents in stamps.

SURGICAL
PRACTICE.

Hundreds of the most difficult operations known to modern surgery are annually performed in the most skillful manner, by our Surgeon-specialists. Large Stones are safely removed from the lindder, by crushing, washing and pumping them out, thus avoiding the great danger of cutting, out, thus avoiding the great danger of cutting, when needed. Many Ovarian and also Fibroid Tumors of the Uterus are arrested in growth and cured by electrolysis, coupled with other means of our invention, whereby the great danger of cutting operations in these cases is avoided.

Especially has the success of our improved operations for Varicooele, Hydrocele, Fistular, Ruptured Cervix Uterl, and for Ruptured Perinesum, been alike gratifying both to ourselves and our patients. Not less so have been the results of numerous operations for Stricture of the Cervical Canal, a condition in the female generally resulting in Barrenness, or Sterility, and the cure of which, by a safe and painless operation, removes this commonest of impediments to the bearing of offspring.

A Complete Treatise on any one of the above maladies will be sent on receipt of ten cents in stamps.

Although we have in the preceding paragraphs, made mention of some of the special aliments to which particular attention is given by the specialists at the Invalids' Hotel and Surgical Institute, yet the institution abounds in skill, facilities, and apparents for the successful treatment of every form of chronic aliment, whether re-

All letters of inquiry, or of consultation, should be address

WORLD'S DISPENSARY MEDICAL ASSOCIATION. 663 Main Street, BUFFALO, N. Y.
