LATEST TELEGRAPHIC REPORT. A Synops s of Me.sures introduced in the National Legislature.

The Committe on Commerce made the following increases over the House completed in 1887, a French firm having appropriation for Pacific Coast im-

provements: Mouth of the Columbia, from \$125,

000 to \$300,000. Cascades, from \$100,000 to \$150,-

Yaquina, from \$50,000 to \$80,000. Lower Willamette and Columbia rivers, from \$35,000 to \$80,000.

It will be seen that the increase, including \$15,000 for a boat railway, is \$315,000 over the House bill. The total for Oregon rivers and harbors, as passed by the House, was \$365,000. Mr. Dolph's efforts to secure large appropriations were supplemented by those of two or three Senators who have visited Oregon. Senator Gorman was the most outspoken of non-resident Senators for liberal appropria-tions. The exceptionally large in-crease for the mouth of the Columbia was secured largely through his in-fluence. He holds that by far the largest single appropriation should be applied at this point.

Dolph, from the conference committee on the Senate amendments to the House bill to repeal all pre-emption, timber culture and desert land laws, reported disagreement, and asked for a new conference. He said, in answer to a question by Ingalls, that the differences in the conference committee were quite radical, but they might be overcome. The most important point was as to whether alleged fraudulent cases should finanly decided by the inferior department or by the courts. The House conferrees took the ground that the interior department should be sole and final judge in the matter, whereas the Senate conferrees insisted that a man whose title was attacked in the land office should have the right of appeal to the courts.
