IS THERE ANY HOPE? NEW AND IMPORTANT OPINIONS OF PUL

Can the Universal Consumption be Successfully Treated

MONARY EXPERTS!

Dr. Borgeon, a leading French doctor, has a new treatment for consumption!

He gives an enema of carbonic acid and sulphuretted hydrogen gases, the latter gas carrying the former into every part of the throat and lungs.

This treatment, too, is directed at effects-the cause remains undisturbed.

What this cause is has been stated by perhaps the highest pulmonary authority in the world, i. e., the Brompton Hespital for Consumptives, in Lendon, Eng.

This malady every year carries off

from one-seventh to one-fifth of the

entire population of England! Dr. Payne, M. D., M. R. C. P., London, is authority for this statement. The same or a greater proportion of deaths obtains in America.

Dr. Payne also says that one-half the total number of deaths from all other causes have seeds of this disease in the system which only require some irritant to develop!

Dr. Hermann Brehmer, an eminent German authority, says that consumpion is caused by deficient nutrition the lungs, by poor blood. These authorities cannot be dis-

wd. The medical world recognizes bem. The uric acid is the irritant in he blood that causes the development the seeds which Dr. Brehmer says e dormant in the blood.

Every particle of blood which passes brough the lungs and heart, also goes brough the kidneys, and if they are n the least deranged they cannot rid he blood of its killing poison. The honsand little hair-like sewer tubes of he kidneys very easily get blocked up nd diseased; and when they do, they grupt instead of purifying the blood. lidney disease may exist, and yet no sin occur in that organ, because it is eficient in nerves of sensation.

THE ORIENTAL HAREM.

A Brief Glimpse of One of the Peculiar Features of Mohammedism.

One of the conditions upon which a woman enters the harem is that she give up all family ties and connections with the outside world. While polygamy is permitted in Turkey, not more than five per cent of his Majesty's Moslem subjects have harems. General Wallace depicted in a humorous vein the curiosity of American women to visit the harems. They always have a great desire to see the poor creatures at home, and to devise some means to raise them from their degraded condition. After a visit many of these ladies change their minds about the fearful fate of the Turkish women. The Turkish ladies assemble in a common reception room richly furnished. They are attended by a throng of slaves, white and black, who do their every bidding. The mistresses of these harems wear costumes which the speaker, after apologizing for his deficiency on the subject of feminine apparel, undertook to describe. Their elothing is of the richest material. Of the general intelligence of these women their American sisters who have seen them do not speak in flattering terms. The conversation between the Turkish women and their visitors nearly always runs about this way:

"Where are you from?" inquire the luxurious wives of the Mahommedans.

"From America." "Where is America?"

"It's over the ocean."

"Do you ever go out there without wearing veils? Aren't you ashamed before the men?" "We don't pay any attention to the

It is the general opinion that ladies of the harem are prisoners. This is merely a delusion. Every Turkish woman has her own quarters and her own slaves to wait upon her. She can take a ride whenever she wishes, and she wears what she pleases without any interference. The Turkish headdress is, with due deference to the styles of Paris and New York, the most becoming of any in the world. It makes the homeliest women handsome and the handsome angelie. The Turkish women are, next to our own American women, the most beautiful I have ever Glimpses of them can be caught on Fridays, the Turkish Sunday, or from their carriages. They do their own shopping, it is theirs to buy as they please and their husbands to pay for it. It is incorrect to say that there is no home-life among the Turks. Laying aside the tie of husband and wife, there remains that almost as dearparent and child. The residents of the harem, which means a sacred or secret ms of consumption were afflicted place, are passionately devoted to their children, upon whom they can shower tted the unic acid poison to remain all the tenderness of a woman's nature. From a Lecture by General Lew Wal-

FRANCE'S MINERALS.

Ore Production.

From the Bureau of the Minister of Public Works has been recently issued a statement of the iron and coal proon of the kidneys, explains why, duction of France up to the end of 1881, which shows both in that and the gion, one must rid the blood of previous year a fair amount of intic said irritant which inflames crease. The total yield of iron ore for burns up the lung substance. For 1881 was 3,689,000 tons, an increase purpose there is nothing equal to of 5 per cent, over that of 1880, which at specific. Warner's safe cure | We less by 158,000 tons. The protion of Algeria was 657,000 tons for 1881, an increase of 42,000 tons. Iron ore is worked in France in 33 departments, half of the whole amount (1,796,000 tons) being furnished by the department of Muerthe de Moselle, Next comes Ardeche, with 197,000; Haute Marne, 169,000; Saone et Loire, 162,000; Pyrenees Orientales, 133,000. Besides the increase of production, there has been a similar increase of importation from Algeria, Spain, Germany, Italy and Belgium, the total amount being 1,287,000 more than in the previous year. The consumption of iron ore during 1881 in the various smelting works was 4,231,000 tons, of which 6 per cent, came from Algeria and 24 per cent, from foreign sources.

The production of coal, anthracite and lignite, for the year was 19,766,000 tons, an increase of 582,000 over that of the previous year. The departments of Nord and Pas-de-Calais figure for 8,992,000, followed at a respectful distance by the Loire col basin with 3,516,000. Gard with 1,933,000, Burgundy and Nivernais with 1,552,000, Tarn and Aveyron 1,080,000, Bourbonnais 951,000. All these minor coal fields have fallen off in their production, and the increase for the year is solely due to Nord and Pas-de-Calais. The import of fuel into France in 1881 very minute, every hour, day was 10,221,000 tons, of which 5,396,000 came from Belgium, 3,569,000 from England and 1,225 from Germany. Coal importation has been steadily increasing for several years in France, that of 1872 being only 7,709,000. The exports of coal are very small and are as steadily decreasing, having been 603,000 tons in 1880 and 601,000 in 1881. The peat fuel industry is also on the decrease, for in 1872 the working of peat bogs amounted to 325,000 ions, and in 1881 to 233,000. The peat is, however, still largely used, there being upward of 1,073 reorganized peat beds in the State, on which are 8,400 separate workings, employing about 26,000 hands. - London Times.

Revenge is Sweet.

She wasn't very young, but she had money. He didn't want the earth.

"Dearest," he began, but she stopped

"I anticipate what you are about to say, Mr. Sampson," she said, "and I would spare your feelings, for it can never, never be. I esteem you highly, and will be a sister to -

"I have four sisters already," he reaker in a settlement near ils a newspaper reporter that, order is a little over one har. Clara," he went on passionately, "if you can not be my wife will you not give me a mother's protecting love?

HER HUSBAND MADE FUN OF IT.

Some people va'ue remedies according as to whether they are frightful in appear-ance or nauseous to the taste. When such folks hear about Compound Oxygen and learn that it is something not to be swal-lowed but simply to be inhaled, and that

A Montana lady who had been troubled. with lung disease, and a bad cough, writes

husband is very favorably impressed with the Oxygen, and is willing for me to take another Treatment. He at first made lun of it, as co much water bot-tied up, but he don't think that now,"

When we come to inquire why the hus-band stopped making tun of Compound Oxygen we find it in what the lady says

of her improvement:

"I am feeling fifty per cent, better than when I commenced taking Orygen; indeed, I would think I was in perfect health but for the slight cough and occasional pain in my lui g. My apietite is excellent, and my bowels were never more even. I notice now that I can walk farther or go up steps without losing my breath so bad and can enjoy a good laugh without coughing."

That will do. It cures. Write to Drs. STARKEY & PALEN, 1529 Arch St., Philadelphia, for a little book which tells in good earnest a great many interesting facts about Compound Oxygen.

Orders for the Compound Oxygen Home Treatment will be filled by H. A. Mathews, 645 Powell Street, San Francisco.

During the session of 1885 the United States Fish Commission distributed over 18 (100,010 young shad in the various streams and waters of the country, and at an expense of less than \$20,000. As less than 6 000,000 shad are taken for the market in a season, finen young the ket in a season, fifteen young fish were put into the water for every old one re

A GENIAL RESTORATIVE.

Hostetter's Stomach Blitters are emphatically genial restorative. The changes which this goe t betanic remedy produces in the disordered organization are always agreeably, though surely progressive, never abrupt and violent, On this account it is admirably adapted to persons of delicate constitution and weak nerves, to whom the powerful mineral drugs are positively injurious. That it initiates those processes which result in the re-establishment of healthful vigor is conspicuously shown in cases healthful vigor is conspicuously shown in cases where it is taken to overcome that fruitful cause of debility, indigestion, coupled, as it usually is, with billousness and constitution. Thorough digestion, regular evacuation and abundant secretion, are results which promptly and invariably attend its systematic use. It is, besides, the best protective against malaria, and a first rate digretic. and a first rate diuretic.

The Omaha anarchists attempted to as sasinate the editors of a Behemian paper

"OH! BUT I SALIVATED HIM!" Was the actual exclamation of an honest physician, spoken of one of his patients to whom he bad given calomel for the cure of biliousness and a discased liver. And he had salivated him for certain, from which he never recovered. All these discrete consequences and the salivated him for certain, from which he never recovered. tressing consequences are avoided by the use of Dr. Pierce's "Pleasant Purgative Pellets," a purely vegetable remedy that will not salivate, but produce the most pleasing effect, invigorate the liver, cure
