The Belleville Standard, Texas, makes this explanation in a personal matter:

The Standard wishes to correct a false impression in reference to the "firing" of the editor's wife and mother in-law from the Methodist church. They were not put out of the building by the pastor, as some suppose, but merely had their names erased from the roll of membership. The editor is not the kind of a man to quietly submit to having his wife and mother "fired" bodily from a church or elsewhere. He is not built that way; neither is his mother-in-law.

Dr. Blalock will use on his extensive farm at Blalock's a traction steam engine to haul plows in the place of horses. The width of the tires of the drive wheels are 18 inches. The doctor proposes to plow this season 10,000 acres. He has 17 gang plows for horses which turn 34 furrows, and the plows hauled by the traction engine will turn seven furrows.

For every dollar his father put into the Baltimore and Ohio railroad, Robert Garret will take out two hundred and twenty. This is a heavy interest for a forty years' investment.

COMBINATION WIRE AND PICKET FENCE.

Improved Combination.

Patented May 22, 1883. No. 277,877.

Wire and Picket Farm Fence and Machine for its Manufacture.

The Cheapest and Most Perfect Fence in Use.

Pig Tight, Horse High, Cattle Strong; STEEL & WOOD INTERWOVEN.

We use from six to eight wires interwoven solidly, with from forty to forty-five light wooden slats to the rod, thus producing a fence that will hold all stock, from the smallest pig to the largest beast.

It is the most durable fence made, as the slats are in a vertical position, clear of the ground. There are no barbs to cut or maim stock or tear the wool from your sheep. It is as visible to the eye as a board fence and ten times as strong. It will stand a side pressure of from 12,000 to 15,000 pounds.

It is woven or manufactured on the posts. One man and a boy can build from 40 to 60 rods in a day. Farmers can build their own fence and use material that would otherwise be lost or used as fuel, and thus save from $100 to $150 per mile.

We can refer to thousands of farmers in Kansas, Iowa and Missouri who are using our fence. We feel great pleasure in presenting this fence to the farmers of Lane County, filling as it does a want long felt. Being practical farmers we know what we say.

On examining the urinary deposits a ropy sediment will often be found, and sometimes small particles of albumen will appear, or the color will be of a thin, whitish hue, again changing to a dark and turbid appearance. There are many men who die of this difficulty, ignorant of the cause, which is the second stage of seminal weakness.
