COMBINATION WIRE AND PICKET FENCE.
Improved Combination.
Patented May 22, 1883. No. 277,877.
Wire and Picket Farm Fence and Machi e for its Manufacture.
The Cheapest and Most Perfect Fence in Use.
Pig Tight, Horse High, Cattle Strong; STEEL & WOOD INTERWOVEN.

We use from six to eight wires interwoven solidly, with from forty to forty-five light wooden slats to the rod, thus producing a fence that will hold all stock, from the smallest pig to the largest beast.
It is the most durable fence made, as the slats are in a vertical position, clear of the ground. There are no bars to cut or maim stock or tear the wool from your sheep. It is as visible to the eye as a board fence and ten times as strong. It will stand a side pressure of from 12,000 to 15,000 pounds.
It is woven or manufactured on the posts. One man and a boy can build from 40 to 60 rods in a day. Farmers can build their own fence and use material that would otherwise be lost or used as fuel, and thus save from \$100 to \$150 per mile.
We can refer to thousands of farmers in Kansas, Iowa and Missouri who are using our fence. We feel great pleasure in presenting this fence to the farmers of Lane County, filling as it does a want long felt. Being practical farmers we know what we say.
